erks Co. aims r grain pest elimination

By JUDY MITCHELL
Berks Co. Reporter

EESPORT - On June 17, s County, in cooperation the federal and state sored biological control eriment aimed at inating the cereal leaf le, launched its cam- n against the pest which capable of inflicting siderable damage to at, oats, barley, and r small grain crops.

enior County Agent es F. Haldeman, who n distributing oat stems taining beetle larvae cted with the eggs of a wasp at the Berks Co. ns in Bern Township on rsday, explained the hod of control.

cording to the agent, the stems contain beetle ae which have been cted with the eggs of a t-sized wasp know to on the cereal leaf le. The stems are placed to growing grain in the , and from them the ae move to the growing ley, oats, or wheat. When young wasps hatch, they the beetle host and blish new colonies of ps which, in turn, work to trol cereal leaf beetles sent in the field. The ps, originally imported n Europe, are minute in and are harmless to n, animals, plants - rything except the cereal beetle.

he cereal leaf beetle is marily a European-Asian t. It was first identified in United States in southern chigan in 1962, and since n it has been spreading idly east and south from t point. Both adults and vae of the beetle damage in crops by feeding on ves, chewing out long ps between the veins. avy feeding gives plants a llowish-white, frosted pearance.

Haldeman commented on reporter's observation t some adverse reaction the cereal leaf beetle trol program in the nty may be resulting cause of the controversy er a similar program ing conducted at the sent time. The other gram is to combat the psy moth which was ponsible for defoliating 00 acres of forest lands in mountain regions of ks and Schuylkill nties in 1972. Calls ived at the Extension vice office, the agent l, have indicated that

The contest was over, and what better way to refresh oneself than with a tall, cool glass of milk as these three dairy princesses from Berks County are doing. They are (l. to r.) Christine Adam, second runner-up; Nedra Yoder, Dairy Princess; and Tammy Hafer, first runner-up.

Debra Kreider is Lancaster dairy princess

By SALLY BAIR
Feature Writer

LANCASTER - Seventeen-year-old Debra R. Kreider, daughter of Mr. and Mrs. J. Richard Kreider, Manheim R5, was named the 1976 Lancaster County Dairy Princess at the contest held at the Farm and Home Center Saturday night. She was crowned by the 1975 Dairy Princess Donna Akers.

First runner-up was Twila Brubaker, 16, daughter of Mr. and Mrs. Harold Brubaker, Manheim R2. Both girls will be seniors at Manheim Central High School in the Fall.

June R. Grube, 16, daughter of Mr. and Mrs. Weidler Grube, Manheim, R7, was selected as Miss Congeniality by her fellow contestants. She is a senior at Hempfield High School.

Other contestants were Bobbi Jean Reinhart, 17, duaghter of George H. Reinhart, Kirkwood, R1; Joyce E. Denlinger, 17, daughter of Mr. and Mrs. Ellis R. Denlinger, 262 A Belmont Road, Gordonville; Ellen L. Schmuck, 17, daughter of Dr. and Mrs. Larry Schmuck, Peach Bottom R1; and Lois E. Wanner, 17, daughter of Mr. and Mrs. R. Guy Wanner, Narvon R2.

The selection came amidst a Bicentennial celebration setting with red, white and

Dairy princess works with Shorthorns

By DIETER KRIEG

WYOMISSING - In what all three judges unaminously agreed was the closest contest they had ever witnessed, Nedra Yoder narrowly edged first runner-up Tammy Hafer to become the 1976 Berks County Dairy Princess.

Crowned last Saturday night before a capacity crowd at the Berkshire Mall, here, Miss Yoder received her crown and accompanying responsibilities from the 1975 Princess, Cathy Yanos. She competed for the title along with nine other girls. Together, they had the judges studying their notations for more than five hours. The crowning ceremony topped off a week-long promotional effort by Berks County dairy farmers and cooperating agencies and businesses. Informative and educational exhibits were set up throughout the mall, creating what some called an "exemplary effort to reach the consumer."

Dark haired and outgoing, the new dairy princess is a 4-H and FFA member, an enthusiastic owner of Milking Shorthorn cattle, and highly active in school sports and activities. With a career in nursing in her plans and a life on the farm in her thoughts, the 17-year old girl believes strongly in milk. She claimed to be very health conscious and cited

Hog producers up voluntary contributions

By DIETER KRIEG

STRASBURG — After more than 8½ years of not increasing their voluntary check-off rates, members of the national policy committee for the National Pork Producers Council (NPPC) voted unanimously to seek additional funds through increased contributions.

Starting July 1, pork producers are being asked to freely give ten cents per marketed hog, and five cents per feeder pig towards national, state and local promotional programs. The decision to raise the check-off rates was made in March at the American Pork Congress.

Lancaster County hog producer, John Henkel, who had a hand in the proceedings and formulation of both the original and updated programs, proudly notes that the NPPC is the largest single commodity group in the country and stresses that the check-off program is strictly producer funded and operated. There are no strings attached to governmental agencies. According to Henkel the strength and integrity of the program lie in the fact that it is voluntary and independent.

Although the initial move for increased funding must be made by producers themselves, the Strasburg area hog producers emphasizes that cooperation from marketing points is essential. "We appreciate the cooperation," he commented, "because without it we could not get our story across ... but they have things to gain too, they get a better market through better hogs coming in."

There are approximtely 80,000 hog producers in the United States who are members of the NPPC, and membership therein is restricted to farmers who are actually marketing hogs. Policy formulations are thus entirely representative of the producer end, Henkel noted. Approximately 65 percent of the hogs marketed in the United States come from farms where producers have voluntarily agreed to the check-off program, Henkel said.

"The Power of a Dime" is the title of a new brochure which describes the check-off program. In it's introduction it states:

"The initial nickel investment helped the NPPC determine through research the best way to promote

Ms. Eileen Moyer, left, conducting tour group through hatchery.

At Moyer's we are not only interested in proclaiming the benefits of the DEKALB layer to interested poultrymen - we also conduct educational tours through our hatchery for interested schools and camps. Thus far in 1976 over 1250 children have toured our plant.

We feel it's important to help youngsters understand and appreciate the importance of poultry and eggs in their future.

Local Grain

Thursday, June 24

These prices are made up of the average prices quoted by a number of participating area feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn and soybean meal which are per ton.

The average prices quoted Thursday, June 24, are as follows:

	Bid+	Offered+
Ear Corn	78.00	88.00
Shelled Corn	3.13	3.30
Barley	2.11	2.31
Oats		
Local	1.74	1.94
Western	2.20	2.39
Wheat		
Millers	3.38	3.58
Soybeans	6.30	——
Soybean Meal		233.00

+Bid is the price the dealer will pay at the farm; offered is the price he will sell for at his mill.

Middleburg

June 22, 1976

Due To Higher Grain Prices, 78% Of The Cost Of Producing A Dozen Eggs Is Attributed To Feed Costs . . .

WOULD YOU ENJOY HAVING A LOWER FEED BILL? ? ?

Hy-Line® BRAND CHICKS

"TRY THE NEWEST MODEL HY-LINE W-36 AS YOUR NEXT BIRD"

"The New Combination Layer That Puts It All Together!"

Hy-Line® BRAND CHICKS

As the lowest body weight layer of all leading commercial white egg strains on the market today, W-36 is the best tool available for reducing the size of your feed bill.

Here are feed intake figures from 7 local Lancaster County flocks - all of which are producing at a high rate with Hard - Sound - Strong - Smooth - White Shells of above average size.

FLOCK	QUANTITY	LBS./FEED/100/DAILY	LBS./FEED/DOZ. TO DATE (9 MONTHS)
A	10,200	21.23 lb.	3.24 lb.
B	6,000	22.33 lb.	3.53 lb.
C	8,000	22.54 lb.	3.68 lb.
D	6,000	22.59 lb.	3.44 lb.
E	4,000	22.68 lb.	3.56 lb.
F	4,000	22.84 lb.	3.57 lb
G	6,000	23.03 lb.	3.49 lb.
AVERAGE	6,314	22.246 lb.	3.50 lb.

Would You Like A Flock Which Would Produce Eggs On 3½ Lbs. of Feed Per Dozen Eggs Sold ? ? ?

Would You Like A Flock Which Would Have An Average Feed Intake Of Only 22¼ Lbs. of Feed Per 100 Per Day While Averaging 77.86% Production For 8 Months From 20 Weeks Of Age On A Litter Floor (Cage Could Do Better) ? ? ?

YOU CAN ACCOMPLISH FIGURES EQUAL TO THESE BY TRYING THE NEW COMBINATION LAYER THAT PUTS IT ALL TOGETHER!!!

Try The Newest Model Hy-Line W-36 As Your Next Bird!

PROFESSIONAL TECHNICIAN SERVICE

C. Robert Greider has recently been named Representative for American Breeders Service in the Berks County Area. Bob is responsible for daily breeding service and he provides direct herd service for the area. He also coordinates the Genetic Mating Service and Associated Herd Programs for local dairymen.

Bob grew up on a dairy farm near Columbia and attended Elizabethtown College where he majored in Biology with advanced work in genetics. He recently attended an ABS Training Seminar and has completed the ABS A.I. Management Course. Bob and his wife reside in the Sinking Spring area.

Why not let a professional ABS representative design a profitable breeding program for you today. He will be glad to serve you.

SERVICE best describes this A.B.S. REPRESENTATIVE!

Lancaster Farming
Serving The Central and Southeastern Pennsylvania Areas

EDITORIAL COMMENTS

BY DIETER KRIEG, EDITOR

The two-way cow path

Much has been said and written about the need for better understanding between farmers and consumers, but seldom is it admitted that this process should include having facts available from both sides of the fence.

There's a lack of information apparent, and surprisingly, people in agriculture are sometimes lacking facts which they in turn expect the consumer to take for granted. Following are a few questions with which the farmer can test himself:

How many dairy farmers are there in the state of Pennsylvania?

Where does Pennsylvania's milk production rank nationally?

How large a part does American agriculture play in the overall U.S. economy?

What's the price of milk at the supermarket?

How much fuel do you use on your farm in a year - or month?

What does homogenization do to milk?

How many off the farm jobs are created by American agriculture?

Which vitamin is added to milk after it leaves the farm?

How many people does the average American farmer produce food for?

What is the average age of the American farmer?

How many eggs does the average hen lay in a year?

What's the price of a ton of 10-20-10 fertilizer?

How much better is food buying power here, compared to the Soviet Union, for example?

What is the tax load on your farm?

How many Cadillacs is that new combine worth?

How does the return on investment in your farming operation compare with that of a business in town?

What fraction of the cost of a dozen eggs at the store actually goes back to the farm?

Why is fresh meat better than the boxed or imported variety?

My point in all this is that both farmers and consumers need facts. There have obviously been some misunderstandings somewhere. And they've been on both sides of the fence. Information is frequently taken for granted or totally lacking on both sides.

If a farmer can answer the above questions and countless of similar ones, then he's in pretty good shape to be his own public relations man. A farmer who isn't prepared with pertinent information about his own business can't honestly expect the consumer to know the facts.

To be in even better shape to discuss his situation intelligently, a farmer should also have some familiarity with the living conditions and styles of his counterpart in town so he can make accurate comparisons. Naturally, this is also a two-way street and town folk should be persuaded to familiarize themselves with problems and facts involved in running a farm.

Admittedly, it's no easy task.

There is one important aspect in this which is frequently overlooked, and that concerns the people from rural and town areas who most frequently come in contact with one another. They're the students in our society.

If young people from farms can answer the questions previously listed (many of them can't) then they can do a little bit of the leg work involved in creating better understanding. But without the proper facts and figures we often cause the public relations effort more harm than good.

No one can realistically expect to accomplish the feat by taking the attitude that "the consumer should know it." They don't usually know the facts, and sometimes we ourselves don't.

It's fair to say, that if farmers expect a consumer to know how much it costs to produce a bundle of celery, he must first know the figure himself. If stretched a little further — for matters of comparison, he may be asked to know the production costs of a ballpoint pen, for example.

It's a two-way cow path, and with farmers being by far the smaller group, they'll have to make a greater effort to "educate" the public, including themselves.

RURAL ROUTE

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

GOD AND CEASAR

Lesson for June 27, 1976

Background Scripture: I Kings 22:1-28; Acts 5:21b-29; Romans 13:1-10; Revelation 13:11-18.

Devotional Reading: Philippians 3:12-21.

It has often been rightly said that, quoted out of context, the Bible could be used to support almost any teaching or religious concept. Used in a careless manner, various passages in the Bible could be used to support polygamy, incest, mass murder, robbery, fraud, and a whole host of acts that we consider to be immoral. Thus, it has often been said that when we quote any portion of the Bible, we need to keep in mind the rest of the Bible as well.

"But I say to you"

Jesus himself was aware of this problem. He knew that certain commandments of the Old Testament were superceded by his own message from God. Thus, at times, he would say: "You have heard that it was said of old . . . but I say to you . . ." Many of the rules and regulations of the Old Testament are no longer applicable to the Christian because the Gospel has carried us beyond that level of religion.

Even in the New Testament we must be careful to interpret Christian teachings in the context of the whole New Testament. Nowhere is this more clearly illustrated than in Romans 13.

Paul is speaking of the Christian's relationship to his government and his ideas seem clear and concise:

"Let every person be subject to the governing authorities . . ."

". . . those authorities that exist have been instituted by God . . ."

". . . he who resists the authorities resists what God has appointed . . ."

". . . rulers are not a terror to good conduct, but to bad . . ."

It would seem from these statements that the Christian ought never to oppose or resist the government in any way. Yet, if Christians had followed this concept rigidly, the whole course of Christian history would have been altered. There would have been few, if any, Christian martyrs. The church probably would never have expanded beyond the boundaries of Palestine. Nor would there have been a Reformation or the American Revolution!

Paul's words in Romans, however, must be kept in the context of his concern for Christian citizenship. Paul would not want his words about obedience to be construed to mean that the Christian ought never to resist or oppose his government. Paul's own actions are indicative of this. There were a number of times in his life when he was in opposition to the local government and was put in jail for various reasons. When conscience demanded, he resisted the government.

Nor was Paul alone in this. In Acts 5 we find the story of Peter and John being thrown in jail and resisting the orders of Jewish Council. Though respectful, Peter clearly draws the line between obedience to the state and faithfulness to one's God. When it is a conflict between the state and what God lays upon our hearts: "we must obey God rather than men."

NOW IS THE TIME...

To Control Flies

With improved moisture conditions in the past week fly population has been on the increase. This is especially true around buildings housing livestock. The start on good fly control is to pay attention to all good sanitation practices; flies like filth and when this type of material is removed, the flies do not have good breeding places. To clean out all manure weekly and to treat manure piles with Dimethoate (Cygon) will keep the fly maggots from developing. There are several residual fly sprays that may be used on the buildings, but we suggest that the materials be changed from year to year in order to prevent the build-up of resistance in the strain of flies. Additional details are available from insecticide dealers or from any Penn State Extension Office.

To Spray Or Dust

A number of office calls have related to the practice of either spraying or dusting to control insects and diseases. Both methods may be used but generally spraying is more effective and at less cost. To dust plants means doing the job when the plants are moist with dew (very early morning) in order to get the dust to cling to the plant tissues; also, it usually costs more money for dusts than it does wettable powders or emulsions. To spray plants we usually get better coverage, especially on the under-side of leaves, it can be done at any time of the day, and at less cost for the entire growing period. Personally, I favor spraying plants for the best job of disease or insect control.

To Operate Combines Carefully

Barley harvest is underway and soon wheat will be ripe enough to harvest. Those who are combining the grain should make every effort to get the grain in the bin and not throw it out with the straw; volunteer growth of the grain later this summer in the field will reflect just how much of the grain went out with the straw. Too much speed is often the reason for loss of grain; also, trying to combine when the grain is too moist is another reason for a poor job of getting the grains out of the head. We urge operators to have their machines adjusted properly

(Continued on Page 29)

Farm Calendar

Sunday, June 27
Testimonial Dinner for N.J. Ag. Sec., Philip Alampi, Cedar Garden Restaurant, 6 p.m.

Monday, June 28
Schuylkill County PFA directors meet at the Extension Office, 8 p.m.

Grange apprehensive about Act

WASHINGTON - The country's oldest and second largest farm organization, the National Grage, is voicing apprehension about the Young Farmers' Homestead Act, a bill currently before the Senate subcommittee on Agricultural Credit and Rural Electrification.

John Scott, Master of the National Grange, said the bill will advocate the creation of a government agency to buy, lease and sell farm land. He said the Grange fears this could lead to socialized farming and that farm ownership would shift from private hands to government. He said the Board responsible for deciding who could buy, sell or lease farm land could become an agricultural Czar.

Scott said the most important feature in any new program to assist young farmers is to provide a profit incentive. He said the Grange will continue its support of new long-term, low interest rate loan programs and changes in federal estate tax laws to make it less of a financial burden to pass farm land from one generation to the next. He said if young family farmers can be assured they can work in cooperation with government, in supplying food and fiber and do so at a reasonable profit, then the future of American agriculture will be secure.

FFA Week winners

The new Pennsylvania FFA President, Randy Ranck, is shown front and center with other officers of the southeastern Pa. region. They are, left to right: Earl Geib, eastern regional vice president from Manheim; Roger Imes, state treasurer from Oley Valley; Herman Manbeck, state chaplain from Conrad Weiser; Ranck; Jeff Miller, state sentinel from Kutztown; Ruby Ginder, secretary, Manheim, and David Miller, south-central regional vice president from Red Lion.

Lauxmont Farms to host Chianina field day

WRIGHTSVILLE — The Northeast region of the American Chianina Association announces the second annual field day will take place August 21 at Lauxmont Farms, here.

The field day will start off with a Crossbred Steer Show for 4-H and FFA members in the Northeast region of the United States. Events will start at 9 a.m. All 4-H and FFA members are invited, and those with ¼, ½, and ¾ blood Chianina steers are to bring their steers to the show. There is no entry fee. Top prize is $100.

After the Steer Show the National Sale cattle and the Regional Sale cattle will be picked and discussed along with the other merits of the Crossbred Chianina, which steers won almost every major steer show in the United States in 1975. The Northeast Regional Sale will also be held at Lauxmont Farms, Friday evening, November 5. Finally, after the placing and selection of the cattle, there will be an auction of assorted goodies to raise money for the Northeast Region to help promote this breed of cattle.

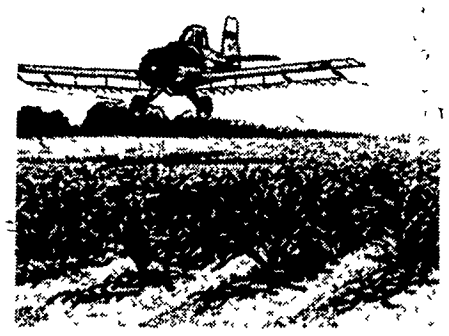
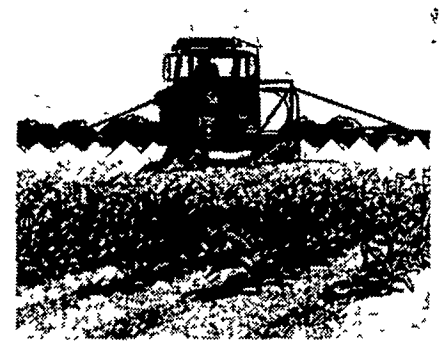
Spark™

GROWTH STIMULANT



AERIAL APPLICATION:
Apply 1 pint of SPARK in 5 gallons of water per acre.



GROUND APPLICATION:
Apply 1 pint of SPARK in 15 gallons of water per acre. This means keep the spray booms high.

Spark. . . proven in the field and proven in seven years of University Research

Here's how SPARK can help promote 5% to 10% grain yield increases:

- Enhanced corn growth
- Silks emerge about 2 days sooner
- Tassels emerge about 2 days sooner

TIMING IS CRITICAL . . .
APPLICATION MUST BE DONE NOW

1. Thurman Peterman, MM UB, 294-10; 2. Larry Fry, Washington Boro, JD G, 264-2; 3. Ray Brubaker, AC UC, 258-8.

9000 Farm Class

1. Gene Middleton, IH856, 291-5; 2. Claude Homan, JD 4000, 287-9; 3. Chris Stiles, Gaithersburg, Md., Ford 8000, 275-6.

9000 Stock

1. Amos Stauffer, Deutz 8006, full pull; 2. Jim Brubaker, Quarryville, AC D-21, 272-8; 3. Chris Stiles, Ford 8000, 267-9.

15,000 Stock Turbo

1. Thomas Middleton, IH 1466, 239-5; 2. Tom Eckenrode, Lebanon, IH 1566, 229-1; 3. Amos Stauffer, Deutz 8006, 228-10.

Unlimited Farm Class

1. Joe Eckenrode, Lebanon, IH1566; 278-6; 2. Tom Middleton, IH1466, 248-8; 3. Gene Middleton, IH1066, 242-10.

Dealership recognized

CHAMBERSBURG - Chambersburg Farm Service was recognized this Thursday (June 24) for achieving International Harvester's highest business standards for dealerships.

Manager John Hostetter accepted a plaque from IH officials in recognition of becoming the fourth dealer in Pennsylvania to qualify for IH's XL dealer program.

The presentation was held following a dinner at the Holiday Inn, here, which was attended by Chambersburg Farm Service employees, directors and IH officials.

Among the requirements the dealership completed in the program, IH officials say, were having a certified service facility, a computerized accounting and parts replenishment system, new identification, and a succession plan to insure the continuation of the dealership.

xxx

A gentleman on a bus was smoking a nasty cigar. Turning to the little lady sitting beside him, he asked, "My smoking won't bother you, will it?"

"No," she said, "not if my getting sick won't bother you."

xxx

Teenager pointing to crumpled fender on the family car: "Great news, Dad! You haven't been pouring those insurance payments down the drain after all."

Lebanon FFA member heads to Switzerland

ALEXANDRIA, Va. - Frances Bragg of Jonestown met with D. Kellerhals representing the Switzerland Embassy recently at a luncheon sponsored by the National FFA Organization in Alexandria, Va. Bragg was one of 50 FFA members who met with attaches from the countries in which they will spend the summer as exchange trainees in the FFA's Work Experience Abroad program.

Bragg, who is the daughter of Mr. and Mrs. Arthur Bragg and a member of the Northern Lebanon FFA Chapter will spend six months in Switzerland. The purpose of the luncheon was to give WEA participants an opportunity to visit with host country representatives and discuss their plans for the summer experience program. Other Embassy representatives also attended the luncheon and participated in an orientation program that followed.

The luncheon was part of a four-day orientation program conducted by the National FFA Organization for WEA participants prior to leaving for their host countries. Following the orientation, Bragg and other FFA members departed to Washington, D.C., for a further briefing in Luxembourg prior to their placement in Europe.

The FFA "Work Experience Abroad" program is sponsored by the National FFA Organizaiton to give FFA members an opportunity to become acquainted with students observing and using the agricultural methods of their host country as they learn the history, culture, traditions, and life styles.

D. Kellerhal, agriculture attache in Washington, D.C. discusses agriculture and farm life in Switzerland with Frances Bragg, daughter of Mr. and Mrs. Arthur Bragg of Jonestown, Pa.

Co-op council hosts youths

WEST CHESTER — Ten outstanding boys and girls have been named winner in the Cooperative Business Education Program sponsored by the Chester-Delaware Co-op Council and will represent this area at the Pennsylvania Association of Farmer Cooperatives Summer Institute at Shippensubrg State College, July 11-14.

Those chosen to attend the Institute are: Roberta Ekdahl, West Chester; Edward Kulp and Eugene Kulp, both of Pottstown; Lane Keen, Glenmoore; Stephen Greer, Oxford; Bruce Wrigley, Cochranville and Dawn Gidner, Thornton, first-year scholars; and Catherine E. Wollaston, Toughkenamon; Edwin A. Mast, Elverson; and David Nolan, Birchrunville.

Winners were selected on the basis of their knowledge of the business enterprise system in America, and cooperative way of doing business, and on activities of the participants identifying them with school, community, church, and youth organizations.

These young leaders will be accompanied to Shippensburg by Thomas E. Mitchell, assistant county agricultural agent, who will act as chaperone and resource person for the delegation.

The Institute program is designed to teach youth more about the business enterprise system in the United States to help them in planning their future by pointing our career possibilities in agribusiness, and provide opportunities for individual - leadership development.

Approximately 250 young adults, representing the best of over 4,000 participants in the annual P.A.F.C. youth education program, will attend the four-day event.

The Institute is a joint effort of the Pennsylvania Association of Farmer Cooperatives, local Co-op Councils, and the College of Agriculture of The Pennsylvania State University.

Special beef field day slated

NIVERSITY PARK - A al beef cattle field day be held at the South- tern Pennsylvania ge-Beef Farm, ap- imately five miles west Greensburg, between Harrison City and Export in Westmoreland County, on Saturday, July 31. This field day will be co-sponsored by The Pennsylvania State University, the Pennsylvania Cattlemen's Association, and the Pennsylvania Grassland Council.

The 300-acre farm, known in the area as the Ryan Farm, has been under the supervision of Dr. Les Burdette, Penn State Extension Animal Scientist for about three years. The farm is divided into three separate management systems. One section involves a high rate of fertilizer and pasture renovation, and is used to maintain a herd of about 80 brood cows, or one cow per two acres.

The second unit is using no fertilizer or lime, and no pasture renovation has been done on this unit. This section of the farm is used to maintain approximately 15 cows, or one cow per five acres.

The third unit involves a moderate level of fertilizer and lime and some pasture renovation. It is a moderate level of management about half-way between the other two units. This unit maintains approximately 25 cows, or one cow per three acres.

The economics of producing cattle under these three different management levels will be discussed, based on the records which has been accumulated so far in the project.

In addition to the above three comparisons, special demonstration areas will be available on sod-seeding of grasses and legumes, livestock watering systems, large round bale harvesting and feeding techniques, and different breeds and crosses. An especially interesting set of calves sired by Jersey bulls, to reduce calving difficulty in first-time heifers, will be available to see, and to compare with calves sired by bulls of other breeds.

The Southwestern Pennsylvania Forage-Beef Farm management is provided by a Committee composed of county extension agents and beef cattle producers in the southwestern part of the state, in addition to specialists from agronomy and animal science departments at Penn State. According to Burdette "for many years we have needed a demonstration-research forage-beef farm in southwestern Pennsylvania, and we hope that the several different projects here will contribute to growth and strengthening of the beef cattle industry in this area".

A special pit beef bar-b-que will be available at lunch time, and there will also be many other demonstrations and exhibits on hand.

According to Dr. L. L. Wilson, professor of animal science at Penn State, "this is the second annual summer field day co-sponsored by the Cattlemen's Association, and promises to be of interest to many people involved in beef production and other agricultural areas. We extend an invitation to cattlemen's associations and individuals from surrounding states to join with us at this summer field day.

Leave baby birds where you find them

"One thing that bothers me about this whole business of finding a young bird or an animal is that people will sometimes encourage their children to try to raise one as an educational process. But," says Linehan, "it's the wrong kind of educational process. It would be much better to leave the young animal with its parents and to find out from observation and reading how these parents raise their young. If human parents are geneally interested in fostering this kind of learning, the right message comes across and children learn respect for the ways of the wild. If they're more interested in just letting their youngster have a tactile sensation, they're making a poor educational choice."

Resisting the temptation to try to play foster parent to some wild creature calls for a certain humility. Each person has to size things up for himself and use his own conscience in making a decision when the interests of nature and his own interests conflict.

Cereal leaf beetle

[Continued from Page 1]

some confusion does exist. The program to fight the gypsy moth which, according to recent newspaper reports, is expected to cause some damage in isolated areas in the county, particularly in Cumru Township, is being conducted by the state, Haldeman pointed out, and should not be confused with the control experiment for the cereal leaf beetle.

The function of the Co-Operative Extension Service, he further commented, is primarily an educational one. Regarding spray programs, "if people call, we tell them how to proceed," he said.

"Spray programs have been operated at the federal, state, and county levels in the past, but the county has not been active in them for the past couple of years," Haldeman continued.

He expressed confidence that some of the parasites which have been put out in similar pest control programs have been effective. Although acknowledging that the cereal leaf beetle control experiment "is something which requires close study" to determine its effectiveness, he pointed out that the pest does not pose an immediate threat to crop yields in Berks County.

In addition to the county farms in Bern Township, the infected larvae received at the Agricultural Center will be distributed to two other farm locations in the eastern and western sections of the county.

Other educational programs planned by the Extension Service during the coming summer months include methods of combating problems created by blackbirds and the Multiflora Rose.

The Berks County Penn State campus has become infested with blackbirds, Haldeman said, "and in the latter part of July or early August, we will be out there using distress bird calls, noise makers, and the like, to disturb the flocks coming into the winter roost area."

He added that his office will "also be working with farmers in an educational way on the problem of birds in their feed lots." Although a date has not yet been set, an informational meeting dealing with this problem is planned for later in the summer.

The Co-Operative Extension Service and the County Agricultural Stabilization Conservation Service (ASCS) are cooperating in the program aimed at combating the spread of the Multiflora Rose. The ASCS, whose roll in the project is cost sharing with the farmer, said that because of limited funds this year, five farms in the county have been selected for "demonstration only" of the Tordon 10K Pellets, a highly effective brush killer which is applied to the soil for the control of undesirable woody plants. The exact dates, times and locations of the demonstrations will be released on availability of the product which is expected around July 1.

The ASCS is hopeful that next year funds will be available to assist all farmers who wish to enroll.

The treatment for the cereal beetle begins with placing blade of oats infected with larva into the field.

Meat imports up

WASHINGTON — U.S. cattle imports continue to zoom. April total, at 78,492 head, is more than eight-times the April 1975 total. That brings cattle imports for the first four months of 1976 to 290,551 — nearly nine-times the Jan.-April total of a year earlier. But last year's total cattle imports, at only 380,622 for all of 1975, were the lowest since 1956.

On hog imports, the April total, at 4,637 head is double that of a year earlier; Jan.-April total, at 12,545 head, up one-third from a year earlier. But, hog imports for all of 1975 totaled only 29,768 head, down from 196,347 head in 1974 — and the lowest since 1969.

Parity unchanged

WASHINGTON — Dairy price support prices remain unchanged. Secretary of Agriculture Earl L. Butz, noting that milk production has been increasing at a greater than seasonal rate, said the current $8.13 per cwt. price for manufacturing milk would continue for July-Sept. quarter. Level of support was 80 pct. of parity in April. He estimates it'll still be 80 pct. on July 1

Dairy princess

[Continued from Page 1]

milk as being a most nutritional and healthy food. Although she does not presently live on a farm, her parents, Mr. and Mrs. Samuel G. Yoder, have some land near Shoemakersville where they own and operate a 50-cow dairy farm. Miss Yoder helps out both morning and evening during the summer and adds that the family is making plans to move to the farm once the children are out of school. The second of four chilren, Miss Yoder attends Hamburg High School and has been active in 4-H, FFA, the Future Nurses Club, girls track, basketball and hockey, the student council and the National Honor Society.

First runner-up in the close competition was Tammy Hafer, 17-year old daughter of Mr. and Mrs. Earl R. Hafer, Douglassville R1. A business student, and now a secretary for the Reading Bone Fertilizer firm, Miss Hafer is a 1976 graduate of Daniel Boone High School. A healthy looking girl with attractively styled short blond hair, the second princess will take part in a number of public appearances along with Missy Yoder.

The Hafers have a milking herd of 75 Holsteins, with which Tammy helps out as needed. "People should know of milk and how farmers work, and that milk can't just be gotten off the shelf," she commented at one point in the contest. She is the oldest of four children and a former 4-H member.

Placing third in the contest was 19-year old Christine Adam, daughter of Mr. and Mrs. James H. Adam, Hamburg R2. A graduate of Hamburg High School, Miss Adam is presently a student at the Penn State University Berks Campus where she is majoring in agricultural education. She lists 4-H, the Grange, and the Junior Holstein Club as some of her activities and plans a career in either teaching or extension work. As the oldest of six children, she has become well-acquainted with a variety of chores on her parents' 265 acre dairy farm. The family owns 135 head of Holsteins, and she herself has done the milking on many occasions. She also said she enjoyed driving tracotrs, sewing, and gardening, and considers the close-knit farm family to be one of the main advantages of living on a farm. She has shown some of her Holsteins for the past ten years and continues to be active on the farm and in related areas in spite of her studies.

All ten of the girls, as well as dairy prinesses from previous years and coordinators, and volunteers, took part in the week-long dairy promotion event held at the mall. Aside from the various educational displays, the girls also had demonstrations on cooking, butter making, and baking.

An additional attraction to the conclusion of Dairy Week in Berks County was the appearance of the "Singing Millers," a well-known Dauphin County dairy farm family which entertains across the state at various functions.

As the winner of the dairy princess pageant, Miss Yoder will represent her county in statewide competition in September at Harrisburg.

The Berks County Dairy Princess Pageant was held at the Berkshire Mall, just west of Reading, and drew large crowds. Other attractions included the "Singing Millers" and various exhibits depicting agriculture and food.

Bulls fly from U.S. to Brazil

On May 17, twenty-one bulls of ten beef and dairy breeds, were flown from Madison, Wis. to Londrina, Brazil. The bulls were sold by American Breeders Service (ABS), a division of W. R. Grace & Co., to CIPARI, a Brazilian animal insemination company.

Dr. Robert E. Walton, president of ABS, stated, "The bulls, along with semen and technical training in bull semen production, will aid CIPARI in expanding A.I. services to Brazilian cattlemen."

Breeds in the shipment include Angus, Red Angus, Hereford, Polled Hereford, Limousin, Santa Gertrudis, Simmental, Shorthorn, Holstein and Jersey. CIPARI, at present, offers only sires of the native Brahman-type breeds and will now expand their bull power through the addition of these new sires.

Dr. Julio Brouwer, longtime ABS Sales Manager in South America, is working on site with CIPARI on its expansion of facilities, technology and marketing.

American Breeders Service, with international headquarters at DeForest, Wis.; has facilities at Wellington, Colo. and DeForest. ABS, a leader in A.I. for the past 35 years, carries on extensive research in animal genetics and in bull semen production, and markets superior genetics to cattlemen in the United States and in over 40 other countries.

The bulls left Madison by Convair 880 and are expected to arrive in Londrina 15 hours later.

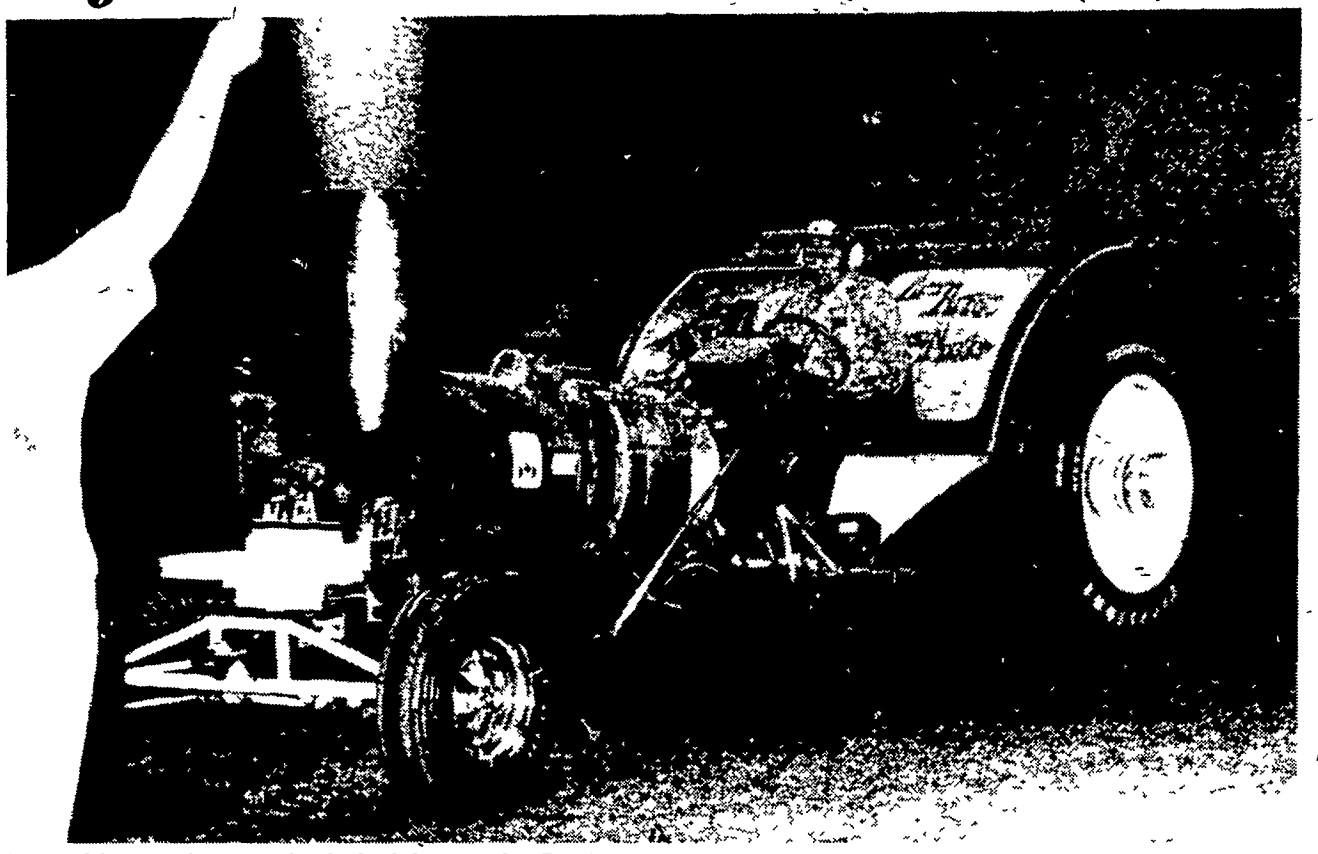
Jet turbine tractors invade Buck



Jet turbine engines made their debut at the Buck Tractor Pulls last weekend when Art Arfons and Bob brought their screaming machines to the track. The occasion was the Penn Springnationals.

Arfons' "Green Monster" won the 9000-pound modified and 12,000-pound open classes. The 7000-pound modified class was won by Banter Brothers, whose tractor was propelled by two Chevy engines.

Tractors from the surrounding area captured the top spots in the 5000 and 7000 super stock classes. Dale Smoker won with his Allis Chalmers 180 and Donald Thomas with his John Deere 4020.

The jet-powered "Green Monster" will be at the Pa. Summer Nationals on July 8, 9 and 10, at Kinzer.

FAST, ACCURATE SPINNER SPREADERS

3 Top Performers. New Idea offers three quality Spinner Spreader/Seeders—and you'll find one that's just right for your operation. Your choice of single or twin spinners. All feature uniform, accurate spreading of all types of fertilizer and most seeds. All three have rugged, seamless steel hoppers, and are easy to maintain. They provide top performance for a low cost.

690 lb. (8.5 bu.) capacity single spinner

1400 lb. (17.0 bu.) capacity single spinner

917 lb. (11.3 bu.) capacity twin spinner

HIGH-PERFORMANCE ELEVATORS

Two New Augers. New 6-inch and 8-inch augers have big capacity with either high or low moisture shelled corn, soybeans, small grain . . . commercial feed. 6-inch model handles up to 1750 bushels per hour, and the 8-inch handles up to 3000. Both are available in lengths of 27, 34, 41, 46, 53 and 60 feet, and offer a choice of gasoline, electric, or PTO drives.

Versatile Flight type. New Idea's rugged 20-inch wide flight-type elevator handles ear corn, shelled corn, beans, small grain, baled hay, and ensilage with ease. Your choice of five lengths from 31 to 51 feet, and gasoline, electric, or PTO drives. You get big capacity, long life and it's priced right, too!

AVCO NEW IDEA FARM EQUIPMENT

Coldwater, Ohio 45828

where the whole idea means better performance.

Farm visitation day is tomorrow

COLLEGE PARK, Md. - Bicentennial themes will pervade at two host farms in Prince Georges and Washington counties during this year's tenth annual statewide Farm Visitation Day, set for June 27.

And open house hospitality at 10 dairy farms in seven counties of northern Maryland's piedmont area - and in Anne Arundel County - will help to observe the 40th anniversary of "June Dairy Month" during this traditional last-Sunday-in-June event.

Keyed to give urban families a close look at their farm neighbors, Farm Visitation Day is again being sponsored by the Maryland Farm-City Committee, with assistance from the University of Maryland's statewide Cooperative Extension Service, along with 4-H and FFA youth organizations, Farm Bureau young farmers, and other rural-oriented groups.

Visiting hours are again set for 1 to 5 p.m. At least one host farm, the U.S. Naval Academy dairy farm at Gambrills (Anne Arundel County), has scheduled an alternate open house date two weeks later (July 11) in case of rain on June 27.

This year's line-up involves 24 host farms - the same number as last year - and 10 counties - two more than in 1975. Participating counties this year include Washington, Frederick, Montgomery, Carroll, Baltimore, Harford, Cecil, Anne Arundel, Calvert and Prince Georges. The latter two counties were not included in last year's event, but they had participated in earlier years.

One farm in Harford County - the Holloway Brothers beef cattle and swine operation east of Darlington - has been involved in Farm Visitation Day activities every year since 1968. It is located near Conowingo dam and the Susquehanna river. The fifth-generation family homestead was built in 1805.

A short distance across the river in Cecil County, visitors will have opportunity to visit one of Maryland's outstanding dairy herds. It is also a family operation - Kilby's, Inc., near Colora. The Kilbys were selected early this year to receive a Master Farmer award from the Pennsylvania Farmer magazine.

They were the first Maryland residents to be so recognized since 1931.

Closer to Baltimore - and perhaps more appealing for the kindergarten set - the FFA chapter at Hereford high school on York road near Gunpowder State Park (Baltimore County) will again operate its "kiddie farm" for the afternoon.

This will offer children a chance to touch or pet a wide array of small animals and fowl, including a dairy calf, rabbits, goats, sheep, ponies, ducks, geese and baby pigs. There will also be pony rides and hayrides.

Paid admission is required at the Carroll County Farm Museum in Westminster and at the National Colonial Farm west of Accokeek, off the Indian Head highway (route 210), in extreme southwest Prince Georges County.

All other locations involve no charges whatsoever. And most of them will also offer free refreshments. This means ice-cold milk at the dairy farms and homemade lemonade or iced tea at many other farms. Some county groups will even be serving free cookies.

One of the Washington County farms will offer a nostalgic look at old-time small grain harvesting with a horse-drawn binder - weather permitting. The wheat or barley will be shocked for curing and later hauled to the Hagerstown Fairground for a steam-engine threshing demonstration during the Washington County Agricultural Bicentennial Days festivities on July 6-8.

Site for the old-time grain harvesting will be the Donald Spickler farm northwest of Hagerstown. The farm is located one mile west of Fairview, off highway 494, or eight miles northeast of Clear Spring on Spickler road.

Brochures giving directions to all 24 participating farms are now available at county Extension offices in participating counties and at public libraries throughout the Baltimore-Annapolis-Washington, D.C., metropolitan area.

Additional information is available from the office of Roy D. Porter, Extension coordinator for special agricultural programs at the University of Maryland in College Park. His telephone number is (301) 454-3712 or 454-4064.

Debra Kreider

[Continued from Page 1]

blue balloons and streamers and the contest included an opening presentation with the seven contestants parading with Uncle Sam hats, waving miniature flags. Patriotic musical selections were sung by Jane Ayers, accompanied by Glenn Hough.

During the on-stage interview, Miss Kreider was asked what she would do if all her peers ordered cola on an outing. She said she would try to convince them to try dairy products - if they didn't want to drink milk she would tell them to use some other form. She said she would also point out the nutritional value of milk.

A surprised winner, Miss Kreider said, "I can't believe it. I think it will be really fun and I'm looking forward to the opportunity of meeting people. I'll do the best I can."

William Roberts, executive chef at the Lemon Tree Restaurant and a former Berks County dairy farmer and American Dairy Association representative, was master of ceremonies for the event. The contestants and judges enjoyed a get acquainted lunch at the Lemon Tree earlier in the day of the contest.

Judges were Mrs. Karen Laughman, district Dairy Princess coordinator, Thomasville; Ray Weber, general manger, Dairy Council, Philadelphia; and William Dickinson, Federal Land Bank, Lebanon.

A patio reception featuring milk punch and cheeses preceded the dinner and contest.

Earlier contestants had been guests at a tea held at the home of Mr. and Mrs. Curtis Akers, Quarryville, parents of the 1975 Dairy Princess, and had participated in a dairy promotion at the Park City Shopping Center.

Chairpersons for the event were Mr. and Mrs. Fred Crider, Nottingham. Co-chairman was Mrs. Robert H. Kauffman, Elizabethtown.

Debra was a member of the chorus and drama department at Manheim Central, as well as the Junior Executive Council and the Future Homemakers of America. She has been a member of the Red Rose Baby Beef 4-H Club for seven years, and is active in the youth group at Mount Joy Mennonite Church.

She works part time in the dairy store which is part of her father's operation, Noah Kreider & Sons partnership. There are currently 525 Holsteins being milked in the operation. Debra has another part time job as waitress at the Horseless Carriage Restaurant in Ephrata.

You can tell more about a person by what he says about others than you can by what others say about him.

There is nothing so easy but that it becomes difficult when you do it with reluctance.

Haldeman promoted to Sr. Extension Agent

By JUDY MITCHELL
Berks Co. Reporter

LEESPORT - James F. Haldeman, county agent with the Berks County Extension Service in Bern Township, was recently promoted to senior extension agent, the highest rank attainable in county extension work.

A native of Danboro, Bucks County, presently residing at Reading R2, Haldeman graduated from Penn State in 1950 with a bachelor of science degree in agronomy, a branch of agriculture dealing with field-crop production and soil management. He has been on the Pennsylvania State University's Co-Operative Extension Service staff since 1953, and prior to his appointment as Berks County extension agent served as assistant Montgomery County agent.

In 1970 Haldeman received the Distinguished Service Award from the National Association of County Agricultural Agents for his service to the state's agriculture.

During his years of extension service, Haldeman has worked with county dairy interests in developing more efficient feeding programs, encouraged numerous farmers to enroll in linear programing as a farm management aid, and helped to conduct experiments to determine the feasibility of utilizing municipal sewage sludge on agricultural land.

Haldeman also participated in the planning of the Berks County Agricultural Center in Bern Township, which houses agricultural agencies.

The Berks County agent is a member of the Pennsylvania and National Associations of County Agricultural Agents, the Reading Kiwanis Club, and Epsilon Sigma Phi fraternity.

Haldeman and his wife Elizabeth have three children: Kathleen, James Jr., and Donald, all graduates of Penn State.

James F. Haldeman, senior extension agent.

BEACON FEEDS

GET MORE with BEACON

LACTO-PELS "16" or "20"

Formulated To Meet

THE NEEDS OF THE HIGH PRODUCER

Beacon Lacto-Pels are formulated to meet the needs of high producing cows, even when roughage quality is average or less than average. Lacto-Pels is a feed designed to get the most milk possible from the grain fed.

Cows relish this highly palatable feed and clean it up readily, even in milking parlors. Because they do, even the highest producers get the energy they need for top milk production without depleting body reserves.

Lacto-Pels are uniform, flow well and are especially suited to bulk handling and rapid feeding.

Protein is guaranteed at 16% or 20%. Fat at not less than 3½% and crude fiber no more than 8%. It's a highly efficient feed.

Palatability comes from the use of cane molasses with wheat middlings and other ingredients. Corn distillers grains are present as a source of fat and energy, and for their milk stimulating properties. Dehulled soybean meal is the chief protein source, and corn and wheat middlings all help provide the highly digestible energy.

Like all Beacon dairy rations, Lacto-Pels are fortified with trace minerals plus 3,000 units of vitamin A per pound and 6,000 units of vitamin D. This is three times the level of vitamin fortification in ordinary dairy rations and gives good insurance against deficiencies caused by poor or insufficient roughage.

Beacon Lacto-Pels help cows to maximum milk production for each 100 pounds of feed.

From Local Ag Teachers:

Thoughts in Passing

Reflections of FFA Week
Dr. William M. Fredd

In the summer of 1931, 45 years ago, I attended my first FFA week at Penn State as a sophomore in Oxford High School. Since, I have participated two times as a student, and as near as I can figure, 25 times as a teacher of agriculture.

FFA week has had a great influence on my life. That first year I judged livestock and was fortunate enough to place in the top three. This made it possible for me to be on the Pennsylvania team and to judge in the national contest at Kansas City in the fall. I had a feeling I lucked out in the FFA week contest, so I asked my ag. teacher, Seth Burt, for something to brush up on. He gave me a text written by Dr. Charles Plumb; this being the current college text on livestock judging.

Here is where I learned to read, never before did I have a purpose for reading. I briefed the book, first studying the pictures and captions, and then I completely read, reread and studied the book continuously until our trip to Kansas City in October. I placed second in the national contest, just three-tenths of a point behind first place. This second place had a scholarship sponsored by Kansas City Star for attendance for any agricultural college in the United States. So it was this $300 scholarship that was the encouragement that got me started at Penn State.

I worked on a farm one year after high school, and with the encouragement of my parents and ag. teacher, I entered Penn State in the fall of 1935. So briefly, this is how FFA week influenced my life and affected my philosophy of FFA week, and perhaps has an effect on Solanco's outstanding accomplishments over the years at FFA week.

This year, Solanco members have won seven gold, seven silver, and an honorable mention awards. Eight of these awards have trips attached, so eight Solanco students will participate in additional and advanced regional or national competition later in the year.

My philosophy of FFA week for Solanco students is that this trip is for those students that have had a good year in our chapter and course work, who have cooperated, are not a discipline problem and have developed proficiency in the contest that he entered. It is said, and I hear grumbling, about Fredd being contest-minded and teaches for contests. There is truth to this, but at the same time isn't this teaching training and developing people. I am simply using these various contests as a motivating device.

Recently, an article in the Pa. Interscholastic Athletic Journal stated, "The best and most proficient teaching in the comprehensive high school today takes place on the athletic field after school hours." If this is true, it is not because of a contest. The student needs to know the necessary skills and perfect himself if he and the school is going to win. Here the student has a purpose for learning. And this is why I feel that teachers of agriculture have a useful and a powerful motivating device in the use and the incorporation of various FFA contests in his teaching of agriculture.

I attended the 1976 FFA week at Penn State with 27 Solanco members and over 1800 members, teachers, and supervisors from all over Pa. It was a real joy to be a part of this group. The some 1800 future farmers really conducted themselves in an outstanding manner. They were more quiet, smoked less, and the general conduct was definitely improved.

I am proud of Pennsylvania FFA week and thankful for the influence it has had on my life and for the incentive it has given Solanco students. I hope Pennsylvania FFA week can continue to provide motivation and growth for young people in future years.

The third-place dairy cattle judging team in the state is this one from the Cloister FFA Chapter, Ephrata. High man on the team, and second among 220 competitors, was John Weiler, right. Teammates were Sheryl Bollinger and Curtis Martin.

Grange to hear Weber

WAKEFIELD - Approximately 80 people attended Fulton Grange's Strawberry and Ice Cream Night on June 14. During the business meeting, it was announced that State and National Grange cookbooks can still be obtained from Mrs. Ruthanne Wood, secretary. Charles McSparren reported that the bus for the July 17 tour of the Gettysburg area is almost filled. People can still sign up for the weekend tour on October 9-10. Glenn Hough and Mrs. Anna Armstrong will be attending Leadership School on June 29 - July 1. Clifford Holloway said anyone interested in going on Wednesday is welcome to go with him.

Harry Baker reported on the Region H Youth Conference held on Sunday, June 13 at Virginville Grange. Four from Fulton Grange attended and Peggy Galbreath had been selected Region H Youth Princess.

The next meeting, June 28, will be under the direction of the agriculture committee. A hay and haylage contest will be held (rules for this contest are the same as for the Solanco Fair hay contest). The guest speaker will be Raymond Weber, director of public relations at Dairy Council, Inc. in Philadelphia. He will speak on the nutritional aspects of milk products. The public is invited to attend.

91st National Holstein Convention slated for Phila.

PHILADELPHIA, Pa. - Delegates from all parts of the United States will be on hand when the 91st annual meeting of the Holstein-Friesian Association of America convenes in Philadelphia on June 30 and July 1. The Sheraton Hotel, 1725 John F. Kennedy Boulevard, Philadelphia, will serve as convention headquarters and site of the annual meeting. Host for the four-day convention is the Pennsylvania Holstein Association. William L. Conynham, Shavertown, Pa., a former member of the HFAA Board of Directors, will serve as general chairman.

The actual business meeting will be preceded by Host Day activities and HFAA and HFS board meetings.

Delegates will have before them two proposals to revise the Association Bylaws. A revision sponsored by the Board of Directors represents changes in procedure for election of delegates to the annual convention. The second revision involves a proposal to further liberalize the color marking provisions, under the sponsorship of a group of six members. Pennsylvania leads all states in the number of delegates based on active membership.

Over 200 junior members of Holstein-Friesian Association will also participate in the convention. The history of our country, dairy educational programs, and plenty of fun will highlight the junior's stay.

Special ladies activities have been arranged which include a luncheon and historical entertainment.

Convention activities will come to a close with the National Convention Sale on Friday morning, July 2. Approximately 70 head of the finest Registered Holsteins from across the nation have been specially selected for the sale managed by the Pennsylvania Holstein Association and R. Austin Backus, Inc., Mexico, N.Y. The sale will be held at the Guernsey Sales Pavilion east of Lancaster at the junction of Rt.'s 30 and 896.

The Pennsylvania delegates who will be attending the convention are: Donald V. Seipt, Easton; J. Mowery Frey, Jr., Lancaster; Neil L. Bowen, Wellsboro; Kenneth Mowry, Roaring Spring; David C. Slusser, Centerville; Harvey W. Stoltzfus, Morgantown; Alpheus L. Ruth, Fleetwood; Fred M. Naugle, Carlisle; Richard H. Packard, Troy; Lynn A. Miller, Towanda; Clarence Stauffer, Ephrata; Emil G. Peters, Port Matilda; Bonnie Ann Miller, Towanda; George H. Bridenbaugh, Martinsburg; Jay E. Landis, Lancaster; George Page, Jr., Columbia Cross Roads; David E. Roth, Loysville; Creedin C. Cornman, Carlisle; E. Wayne Beshore, New Cumberland; Paul R. King, Delta; Marion W. Alsdorf, Spartansburg; Arthur Baxter, Stoneboro; Ralph T. Oakes, Jackson Center; C. Richard Landis, Lancaster; Clark A. Yoder, Salisbury; Ray E. McMillen, Loysville; Duane Mattocks, Troy; Vernon R. Umble, Christiana; Elam Bollinger, Manheim; David R. Spicher, Belleville; Thomas Dum, Jr., Landisburg; and John M. Harnish, Lancaster.

Kempton Co. tractor pull results

By JUDY MITCHELL
Berks Co. Reporter

KEMPTON - More than 100 contestants in 11 weight classes competed in the state-sanctioned Class B tractor pulling contest held at the Kempton Country Fair on June 18.

Winners in the farm class which included 72 entries were:

5500 lb. class - Richard Troxell, Boymanstown, driving a Case DC.

7500 lb. class - Ralph Wolverton, Asbury, N.J., John Deere 4010.

10,000 lb. class - David Gross, Hamburg R1, John Deere 3020.

13,000 lb. class - William Spatz, Bernville R2, International 1066.

15,000 lb. class - Randall Hetrick, Oley R1, John Deere 4020.

17,000 lb. class - Albert Neufield, Jr., Hamburg R1, International 1206.

Taking the top spots in the modified and super stock categories were:

5200 lb. modified - Nathan Wolfe, Bedford R2, driving a F20 Farmall with a 413 Chrysler engine.

5200 lb. super stock - Charles Snyder, Tamaqua R3, Ford 7000.

7200 lb. modified - Donald Landis, Berlin R1, International WD9 with two 440 Dodge engines.

7200 lb. super stock - Chester Snyder, Andreas R1, Ford 8600

Donald Landis of Berlin R1, also took first place in the 9200 lb. open with his International WD9.

Grange leadership school slated

HARRISBURG - Several hundred Grange leaders from all parts of Pennsylvania will be attending the 53rd annual leadership school of the Pennsylvania State Grange that will be held at Gettysburg College June 29, 30 and July 1.

Workshops dealing with a wide variety of subjects will feature the three-day program.

One workshop, scheduled for Wednesday morning, June 30, will deal with a current Grange project, the problems and needs of deaf persons. It will be conducted by Mr. and Mrs. Robert N. Collins, of Lancaster, who also will be featured on the program at Wednesday night's banquet.

Another workshop Wednesday will focus attention on welfare fraud and will be conducted by Mrs. Dorothy M. Forney, of Elizabethtown, president of the National Welfare Fraud Association.

A workshop Tuesday afternoon will involve a panel discussion of news and publicity. Panelists will be Henry Roth, city editor of the Gettysburg Times, representing the daily newspaper field; Dieter Krieg, editor of Lancaster Farming, representing the weekly newspaper field, and Gilson Sheffer, news director of WGET at Gettysburg, for the electronic media.

Held in conjunction with the leadership school will be the Mid-Atlantic Youth Conference that will be attended by young people from the neighboring states of New York, New Jersey, Delaware, Maryland, West Virginia and Ohio, in addition to those from Pennsylvania.

Also, two public speaking contests for young people will be featured on the program.

The first will be held at 3:30 p.m. Tuesday, following the opening ceremony, when the Pennsylvania winner will be selected. The second will be at 9 p.m. Wednesday (June 30) when the Mid-Atlantic Regional contest will be held.

In the Mid-Atlantic contest, the Pennsylvania winner will compete against winners from the neighboring states of New York, New Jersey, Delaware, Maryland, West Virginia and Ohio.

The regional finals will highlight the Mid-Atlantic Grange Youth Conference.

William A. Steel, National Grange youth director, will give the keynote address at the leadership school opening at 2 p.m. Tuesday (June 29) and J. Luther Snyder, State Grange master, will address the closing session Thursday morning.

More than 300 Grange leaders from all parts of Pennsylvania are expected to attend the school, according to Mrs. William Buffington, of Chadds Ford, the State Grange lecturer who will preside at the sessions.

Potato referendum underway

HARRISBURG - Pennsylvania potato growers with 25 or more acres will vote from June 24 through July 7 on whether they want to assess themselves to support a research program to develop improved potato varieties, it was announced recently by Agriculture Secretary Raymond J. Kerstetter.

Kerstetter announced the referendum after studying the transcript of a public hearing on the proposed program, held June 4 at the Agriculture Building here. Testimony was received from 11 individual affected growers and the Pennsylvania Cooperative Potato Growers Association, representing 129 affected growers. All testified in favor of the program.

"In view of the unanimously favorably testimony presented at the public hearing," Kerstetter said, "it would appear the program would be in the best interests of Pennsylvania's potato industry. There's no question about the need for better varieties to fit our varying soil and weather conditions. It makes good sense to set up an on-going program aimed at solving these serious production problems."

Ballots for the referendum went into the mail Wednesday, June 23. They will go to a list of 257 potato farmers who grow 25 acres or more. The deadline for receipt of the ballots at the Department of Agriculture is Wednesday, July 7 at 4:30 p.m.

The ballots will be counted by a teller committee made up of affected growers. If passed by a majority of the growers voting and representing a majority of the production, the program will go into effect July 20 and cover the 1976 crop.

The program calls for an assessment of one cent per hundredweight on all potatoes sold by affected growers. This is expected to raise about $45,000 annually for a research fund to be administered by a board made up of affected growers.

Potato growers with 25 acres or more who do not receive a ballot within a few days after the June 23 mailing, or who wish additional information, should contact the Bureau of Markets, Pennsylvania Department of Agriculture, 2301 North Cameron Street, Harrisburg, Pa. 17120; telephone 717-787-4210.

Crop report issued

HARRISBURG — Warm, humid weather had a noticeably favorable effect on crops throughout the Commonwealth during the week ending June 21, according to the Crop Reporting Service. Statewide, five days were considered suitable for fieldwork, with moisture supplies rated mostly adequate to somewhat short. Northern counties recorded some surplus moisture while central and southern counties had some areas rated moisture deficient.

Pennsylvania's corn crop is still an inch shorter than it was a year ago. Statewide the crop is 9½ inches tall, compared to 10½ inches last year. By area, the crop is eight inches in the north, 9½ inches in central and 12 inches high in southern counties.

Tobacco growers concentrated on transplanting last week. The crop is now 87 per cent set in the field. The soybean crop is now 87 per cent planted compared to 94 per cent last year.

Wheat is now 71 per cent headed with 25 per cent turning yellow, above the 18 per cent yellow last year at this time. By area, 14 per cent has turned in the north, 26 per cent in the central counties and 38 per cent in the south. The barley crop is 59 per cent yellow and 12 per cent ripe, about four days ahead of 1975's crop. Ripening has barely begun in northern and central counties, but is 38 per cent along in the south where combines are rolling in a few fields.

The oats crop is now 48 per cent headed, five days ahead of last year's 28 per cent. In the north, heading is at 40 per cent, with 57 per cent headed in central counties and 47 per cent in the south with some turning yellow.

Operators were busy with haying last week, with the first cutting of alfalfa now 73 per cent done and the second cutting begun. Clo-tim is now 58 per cent cut. The quality of hay made last week was rated good to fair with some getting rained on in the northern counties. Pastures are in good condition and are providing an average amount of feed.

Vegetable crops are generally in good condition but need some added moisture in some areas. Fruit crops, apples, cherries, and pears appear to be sizing well. Grapes are blooming a little earlier than usual, and peaches are now being thinned where needed. The sweet cherry harvest is active, but bird damage is reportedly a problem.

As of June 15, soil moisture was still short in the north central states, although rainfall temporarily relieved dryness in northern Minnesota.

Nationwide, corn was in good condition and growing fast in response to above normal temperatures. The soybean crop was 89 per cent planted, compared with 84 per cent in 1975 and a 76 percent average for that week.

What's New

Frencher Sheller

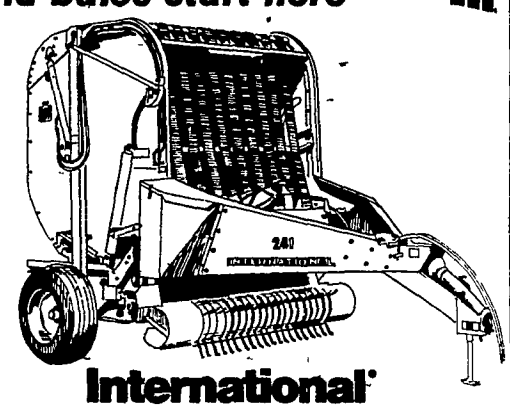
ONEONTA, Ala. - Magic Fingers Ltd., which gained nationwide acceptance with its bean and pea sheller, has begun marketing a Frencher-Sheller, combination appliance which shells peas and beans and French slices green beans.

The new Frencher-Sheller (Model MFS 712) slicing mechanism is designed to slice green beans uniformly, French style. This greatly reduces cooking time and is said to enhance the nutritional quality of beans. Beans or peas are fed into a set of hard-rubber rollers, the rollers de-hull the peas or beans which then drop into the sheller base, and the empty pods are expelled.

The Frencher-Sheller can be driven by a regular kitchen hand mixer or variable speed drill (800 r.p.m. max.).

The dual purpose appliance is dishwasher safe, easily stored and virtually maintenance free.

Bigger savings with big round bales start here



International 241 Bigroll Baler

The many superior features of IH Bigroll Balers give you extra time, labor and quality-saving benefits. Included is the ability to make full 6-ft. diameter bales with loose cores that permit "breathing," yet have extra-tight surfaces for maximum resistance to weathering. And you also get dump-and-go convenience, which means you don't have to back up to eject in order to get all of the windrow when starting a new bale.

- Exclusive lower belt tracking system lets belt float to tolerate loads, reduce wear.
- Exclusive individually replaceable upper belts
- Exclusive twine guide positioning indicator for more convenient and twine-saving wrapping performance
- Exclusive vertical hitch adjustment to maintain level baler operation.

Let's arrange a demonstration. Finance plans available.

Suspected of causing marketing pressures

Boxed beef to be looked into

DENVER, Colo. - Expressing concern over the volatile market for dressed beef in the past few weeks, the American National Cattlemen's Association has set out on a fact-finding mission to determine the possible role boxed beef has played in the erratic market.

Boxed beef means different things to different people, but generally it includes breaking down carcass beef into primal, subprimal and sometimes retail cuts. The cuts are vacuumpackered and put into boxes primarily at the packing-house and retail warehouse level. Recent surveys indicate that about 30 percent of the carcasses are boxed at the packer level.

While the practice of boxing beef is not new, it has increased in recent years. Indications are that more than half of the beef received at retail stores is prefabricated. "Boxed beef clearly is a technological advance that has come of age," said Wray Finney, president of ANCA. "We are not opposed to such technology, in fact we have spoken favorably of it on many occasions. But we are concerned that the lack of information on the exact volume of boxed beef may be affecting beef prices significantly.

"The price in the marketplace is responsive to a number of signals, such as cattle on feed, slaughter, and cold storage reports. Boxed beef is apparently a large volume item and should be considered along with the traditional market indicators. However, no reliable information is available on the amount of boxed beef moving into trade channels. We need that type of information," Finney added.

In an effort to obtain the needed additional information on boxed beef and to seek out possible solutions to the problem, Finney has announced that H. W. "Bud" Harrington, chairman of ANCA's Marketing Committee, and Topper Thorpe, manager of Cattle-Fax, ANCA's market analysis service, will meet with USDA officials in Washington.

"Since boxed beef can be stored for longer periods of time than carcass beef, beef supplies on any given day may appear larger than they really are," Finney said. Since boxed beef is still a perishable commodity, there is a time when it must be sold. The "must sell" situations create pressure on the carcass market since buyers can buy boxed beef cheaper than carcass beef.

As an example, in late March, just prior to the Easter holiday period, fed cattle and dressed beef prices began to move sharply higher. This was a result of a decline in fed cattle available, plus a tough trading attitude on the part of feeders who had been losing money on fed cattle since the first of the year.

The price increases were large and came quickly. Eventually packers could not buy fed cattle at a price level that fit the dressed beef price, and they cut back on slaughter volume. In the past this has always forced beef prices higher, but this did not happen. The reason, it appears, was that more boxed beef was available to retailers at lower prices than carcass beef. Of course there were a number of other factors in the market-place, Finney said, but it appears that boxed beef was one of the main reasons the market responded as it did.

Another recent development in beef merchandising, frozen retail cuts of beef, is gaining greater acceptance. This may yet add another dimension to the complicated beef marketing process.

"In theory, both boxed beef and frozen beef should add stability to the market. When there is an oversupply, beef can go into storage, and when supplies are short, beef can come out of storage, thus leveling out supply and theoretically price," according to Finney. "But in the near future these changes are likely to result in more volatile prices than ever before."

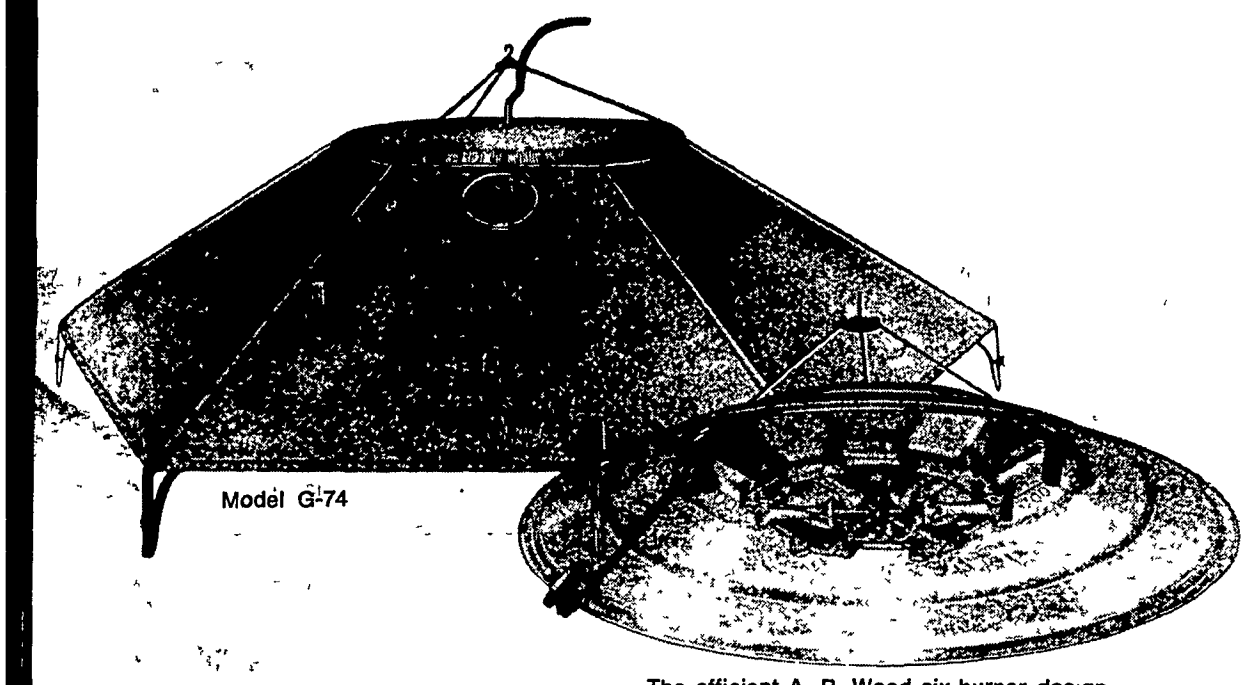
fuel shortage

Cut Fuel Use at Least 40% with an A.R.Wood Brooder



The efficient A. R. Wood six-burner design is also available in dome model G-S6D.

Results of Missouri State Poultry Test conducted January 6th through February 10th, 1972. Eight gas brooder models were tested under identical conditions. Test results available!

Brooder	Propane Gallons Used	Comparison Percentage To G-74
#1 A. R. Wood G-74 Gas	22.2	
#2	44.6	101% More
#3	55.0	148% More
#4	59.6	168% More
#5	31.2	40% More
#6	35.6	60% More
#7	31.8	43% More
#8	32.3	45% More

At least 40% . . . and up to nearly 170% . . . those are the measured savings possible with the A. R. Wood G-74 brooder. It's a fact . . . proven by Missouri State Poultry tests. The A. R. Wood G-74 Brooder conserves fuel by holding the heat where it's needed . . . under the hover. That means substantial savings to you, and conservation of critical energy supplies.

Economy . . . plus safety, accuracy and convenience . . . good reasons why more A. R. Wood brooders are in use throughout the world than any other kind.

Consultant, National Dairy Council

QUESTIONS AND ANSWERS

Q. Everybody seems to recommend milk in the diet. What are some of the concrete reasons for this?

A. No other single food offers the wide variety of essential nutrients that milk brings to you Also milk is probably the original convenience food It's always ready for immediate use You just pour it out and enjoy it, either as a refreshing drink or an ingredient in cooking Hot or cold, there's little fuss with milk

Q. How old is man's knowledge of nutrition?

A. Most sources credit 1900 B C as the earliest date of record The Egyptians spotted night blindness and other eye problems as probably being related to diet Without knowing why, they recommended liver as a remedy Today we know that foods rich in vitamin A, such as liver, egg yolk dark green and deep yellow vegetables, butter, whole milk, cream, cheddar type cheese, and ice cream, can be helpful

Q. What does protein do for me?

A. It builds and repairs all tissues, helps to build blood and form antibodies to fight infection Protein can, if needed, supply energy, but this is nutritionally wasteful Carbohydrates and fats are and should be our main sources of energy

Q. Do I need fat in my diet?

A. Yes Some fat is essential Fats provide a rich source of energy per ounce Vitamins and essential fatty acids also are derived from fats

Q. What about low carbohydrate diets?

A. They can be faddish, and possibly dangerous If you don't get enough carbohydrate in your meals, your body will metabolize fat improperly or even use protein for energy that should be utilized otherwise

Donna Fargo: happiest girl in USA

In June of 1972, a Los Angeles high school English teacher named Donna Fargo, gave her students their finals a week ahead of schedule. The kids didn't mind because they knew that a few days after exams their teacher was opening in Las Vegas. Donna tried to keep life normal by grading the test papers on the plane from California to Nevada. "It's a good thing I was busy with exams or I would have been even more nervous than I was about the performance," she admits now.

When those last exams were corrected, Donna Fargo was on her way to stardom. Just recently, Country Music magazine's Mel Shestack, named her "the next queen of country music." Actually, Donna is difficult to categorize because she has accomplished something that other female country vocalists have failed to do - Donna Fargo has reached a pop and country audience simultaneously. Last year her album "The Happiest Girl In the Whole U.S.A." stayed on the pop charts 43 weeks and remained over a year, exactly 55 weeks, on the country charts. She also garnered two gold singles - one for "The Happiest Girl In the Whole U.S.A." and the other for "Funny Face" - and those two hits on her first LP turned the album to gold, too.

Donna has gone higher on the pop charts than either Tammy Wynette or Loretta Lynn. Those country music ladies never even reached pop's top one-hundred with their records, while Donna's first and second LP's both placed within the top fifty. It seems that Donna Fargo, the tobacco farmer's daughter from Mt. Airy, N.C., has the magic touch.

Donna has a sophistication that is rare for country music performers, and her deviation from the norm started back in high school.

"Everybody was going somewhere to work, or going to get married, and I didn't want that," she comments as she sits sipping tea in her $160,000 concert-touring bus (set up with quadrophonic sound and recording equipment).

After high school her natural introspectiveness guided her toward further studies. She went to a college not far from Mt. Airy and, there, she delved into English, religion, and psychology.

"I think my dream to be a singer was always back there, but it didn't seem as possible as the teaching dream. When I got out of college my first goal was to get a teaching job to see if I really liked it. I did, but at the same time I never gave up the desire to sing."

Donna moved to California because of the progressive educational programs in the state system and recording opportunities there. She took a job teaching high school English and at the same time she began taking 30 graduate credits at USC and LASC. Donna went to an audition in Hollywood and met record producer Stan Silver, who was impressed by her talent and poise. He told her she was a country singer, taught her to play the guitar, and encouraged her to pursue a career in music. "I thought I would try to write a song so I started taking songs apart and tried to put something down on paper that pleased me. I analyzed all the hits on the radio and tried to figure out what made them good."

Four years later she wrote "The Happiest Girl In the Whole U.S.A." and Stan Silver produced the master of the LP which included that hit.

"I'm not very aggressive so I didn't even tell my family about the music until I had a record out," she smiles.

In fact, she didn't even tell her students when "Happiest Girl" was a hit.

"I thought the kids would turn their noses up at it because it was country music. Then one day I was giving a test and walking around the room. I thought I heard a radio, but the sound was so faint that I couldn't tell where it was coming from. All of a sudden, the volume was turned up loud and it was my song. One girl had a radio plugged into her ear and when the song was played, she made sure we all heard it. I ran to turn it off. Then they siad, 'We're proud of you, and we're glad you didn't have a hit last year or you would have had to leave us.' "

Stan Silver is also proud, and now he is more than her producer, he is Donna's manager and husband, too. In September, 1972, Stan and Donna moved from California to Nashville, where they put the "All About a Feeling" album together with 11 of Donna's original compositions. Meanwhile Donna Fargo has captured nearly every prize the country music kingdom has to offer. In 1972 CMA awarded her Single Record of The Year for "Happiest Girl." The Academy of Country and Western Music honored the song with four awards. She won the NARM award for Best Selling Female Country Singer of the Year. In early 1973, Donna captured a Grammy for Best Country Vocal Performance By A Female.

Donna writes tender songs that touch people, and she will always be modest about herself. "I work for things, but I try not to get my hope up because I don't want to be disappointed. So I'm really happy when I do attain something I work for."

Mike Innerst, Red Lion FFA student won the tractor driving contest at the school recently. He will now compete in county-wide competition at the York Fair in September.

Eastern rough riders in saddle

COWTOWN - The 22 year old Cowtown Rodeo saw one of its finest nights ever in the Bull Riding events last Saturday evening as some outstanding marks were recorded among the tough cowboys.

What looked to be an unbeatable score of 80 points for Woodstown's Kaye Kirby riding the bulls, just wasn't enough to impress T.J. Hawkins of Reedsville, W. Va. Hawkins came out of the gate and took a bumpy ride for the required eight seconds and received a high marking of 85 to put him on top. First place prize money was $284.20.

Bull riding is considered to be the most dangerous event on the American sporting scene today and that was clearly evident to everyone in attendance Saturday. A couple of cowboys were stomped by the wild bulls and rodeo clown Rocky Foster was injured trying to lead one of the animals out of the ring.

Once again, Kaye Kirby was top money winner as he collected $471.38 at the pay window. The native hometowner was a victor in the Bareback Bronc Riding contest and took second slot in two other events.

The first event of the evening, Bareback Bronc Riding, saw four local boys take the top spots. Kirby, Andy Harris, and Jimmie Lee Walker, all from the Woodstown area, along with Hartley Morris Jr. of Deepwater, finished up in that order.

Grant Harris placed ahead of Kirby in the Saddle Bronc Riding as he checked in with a mark of 69. Kirby finished with a 68 while R.L. Tolbert was third at 64. First place money totaled $111.72.

You just never know what's going to happen next, and Sherman Shidner's 9.3 second timing in Steer Wrestling looked like it wasn't going to be challenged. However, in the aftershow, Ward Mitchell of Auburn, N.Y. threw the animal in a swift 8.6 seconds to haul in a purse of $295.96.

The top calf roper of the night was Joe Renaud of Lincoln, Rhode Island. Renaud tied the calf in 15.3 seconds for top spot to earn $295.96. Penns Grove's Joe Merola was second as he performed the act in 16.7 seconds.

In the Girl's Cloverleaf Barrel Races, it was two New Yorkers taking the top two positions. Lorraine Alexander and Dale Bibbo finished up number one and two respectively. The winning time was 17.96 seconds.

The purse for the performance totaled $3410.80 and the weather was perfect.

Shorthorn field day draws 100

NEW BRIGHTON — Hidden Valley Farms, Ben and Francy Zeigler, near here, hosted the annual picnic and youth field day of the Pa. Shorthorn and Polled Shorthorn Breeders' Assn. on Saturday, June 5. Approximately 100 members and friends were in attendance.

The Richard C. Peoples Family, Volant, was awarded a plaque for Top Shorthorn Promoter in 1975.

Judging Contest Winners were as follows: Boy's Judging Contest - Ike Nicoll; Girl's Judging Contest - Linda Core; Women's Judging Contest - Pearl Curtis; Men's Judging Contest - Dick McElhaney. All Judging Contest winners received plaques made by Short's Leather Shop, New Brighton.

Youth Showmanship winners were: Sr. division - Beverly Short; Jr. division - Frank Hunter.

Now is the time

[Continued from Page 10]

and then drive slow enough to give the combine a chance to do the job for which it is designed.

To Soil Test For August Seedings

Summer seedings of alfalfa are only four to six weeks away; this means that the ground should be well prepared and treated for lime and fertilizer according to a complete soil test. If lime is needed, it should be worked into the soil before the alfalfa seeding is made; the practice of top-dressing the field next winter or spring with lime is to be discouraged; it should be incorporated into the soil prior to the seeding. A complete soil test should reflect the actual needs of the soil for alfalfa; many times money can be saved on one or more of the fertilizer elements, if the soil is already sufficient in that part of the fertilizer needs.

To Secure Farm Pond Permit

Many pond owners throughout the area are bothered with algae or weeds in their ponds. This material interfers with swimming, fishing, and all types of summer sports. One of the best ways to control the problem is to treat with an acquatic weed killer; there are several materials that may be used depending upon the type of weed. However, before any chemical or herbicide is added to the pond water, a permit should be secured from the Pennsylvania Fish Commission; the application for this permit is available through the local Fish Warden (Water Patrolman) or here at our Penn State Extension Office. We urge pond owners to secure the permit before treating because it is unlawful to treat a pond without it.

To Remove Cherry Trees

Producers with livestock on pasture should be concerned about the presence of wild cherry trees in the area. The fresh cherry leaves are not poisonous but wilting or wilted wild cherry leaves are toxic to most farm animals and will kill them. After wind storms, producers should check the pasture or woodlot area and remove any limbs or trees that have blown down. Animals crave these leaves and will eat them in preference to good pasture. Some producers have cut down all of the wild cherry trees in the grazing area to avoid any poison possibility.

To Control Aphids

Continued dry weather is bringing out all kinds of aphids on many different types of plants and crops. These sap-sucking insects may be found on alfalfa, flowers, shrubbery, and especially on maple trees. Spraying with Diazinon, Cygon, or Malathion will kill the aphids that are currently feeding. Some property owners paint a band of Cygon (diluted with water) around the trunk of the tree earlier in the spring; this is absorbed into the tree and helps reduce the insect problem for the season. The band should be painted at least five to eight feet above the ground to keep away from children and pets. If dry weather continues, additional sprays may be needed to control the aphids.

To Shear Pine Trees

Christmas tree growers will be busy on the next month shearing and shaping the trees; in this part of the state we do not have many Christmas tree growers, but we do have many property owners with pine trees. If these are to be pruned or shaped, the month of June and July is the time to do the work; some folks may want to cut them back to control their size. Spruce and fir trees are not to be pruned until the period from September through March. The appearance of evergreen trees can be improved through proper shearing as mentioned above. Don't start shearing until the tree is at least three feet high, because they may become too short and squatty.

Hog producers

[Continued from Page 1]

pork. Now, by expanding proven and successful programs, the NPPC's investment in promotion and research will make a positive impact on the entire pork industry.

On the national level, producers indicate in the yearly NPPC poll how they want their funds to be invested by NPPC's board of directors.

Henkel, with a ten-year history as a member of the NPPC national executive board, explains further:

"We (pork producers) are putting money in, and we've got a say on how it's spent. Each year our producers are polled. Producers indicated this year that 80 percent of our funds should go for promotion, 10 percent for research and 10 percent administrative." "He pointed out that the NPPC trims expenses and its staff so much that the national organization has a staff of only 10, including secretaries.

The national policy committee, with which Henkel was involved for two years as chairman, has decided to use the 10 cent check-off on marketed hogs in the following way:

Two cents are to go to the National Livestock and Meat Board for their promotional and research work. The remaining eight cents will be appropriated to programs according to a sliding scale which is based on state hog production. Under this plan, for example, Iowa - the nation's largest hog producing state - will receive two cents (out of the eight) for its state-wide programs, while the remainder (six cents) goes to the national level. Pennsylvania, on the other hand, being a comparatively small hog producing state, will receive the bulk of its contributions for its own programs while only about a quarter of the eight cents move on to national channels.

The five cent deduction per feeder pig is to go specifically for production research work - with three cents to stay at the state level, and two cents for national programs.

Under the old five cent check-off program, the NPPC generated funds of about 1.6 million dollars. "That's not very much to carry on any kind of national program," commented Henkel. "It's a drop in the bucket compared to programs conducted by other organizations such as the beef and citrus people."

"There are a lot of misconceptions about pork," the hog producer continued. Cooking temperatures have been changed somewhat because of the better quality meat which is being produced and the flavor and juiciness of the product have thus been improved, Henkel explained. He keeps 125 purebred Yorkshire sows on his 30-acre farm between Strasburg and Quarryville and sells a number of his animals for breeding purposes.

Going into detail about the check-off program on the local and state level, Henkel noted that everyone involved is working for the good of the group on his own time. There are no salaried personnel. "This is what has opened people's eyes," the veteran swineman said proudly, adding that the NPPC and its state organizations have been recognized as the leaders and spokespeople in their field. It's all done by pork producers themselves, with no one else involved, except marketing points. In Pennsylvania about 18,000 hogs went through the check-off program last year.

The check-off program pays off primarily through research and advertising. Among the major such programs are:

1. The "Image City" programs which are presently centered in 1[illegible] major populations center [illegible] the U.S., includin[illegible] Philadelphia, Boston, an[illegible] Baltimore. Along with othe[illegible] metropolitan areas, thes[illegible] "image cities" cover ap[illegible] proximately half of the U.S[illegible] population. Newspaper ad[illegible] radio commercials and T[illegible] spots provide the thrust o[illegible] the promotional programs.

2. The October Pork Fe[illegible] and 3. "Pork for Pop[illegible] programs are advertising campaigns keyed to specific times of the year (October and June).

In addition to the above mentioned avenues for promoting pork, the NPPC sometimes co-sponsors its product with other food companies. "Joint efforts gives us greater mileage with the money we have

Hog producers

(Continued from Page 30)

ailable." Henkel ex-ained.

Organized in 1967, and put to operation in January of 68, the pork check-off ogram went from ground ro to the point where 65 rcent of the hogs marketed e under the plan. Thirty-ve states work along with e NPPC. In some states, cluding Maryland, rginia and the Carolinas, e check-off program is gislated and deductions e mandatory. But Henkel lieves it's better to stay oluntary, although those ho don't contribute are dmittedly reaping the enefits while sowing none of e seeds for improvement. ccording to Henkel, "the rength of the program lies the fact that it is voluntary d executed by producers emselves."

Organization begins at the cal level, Henkel pointed t. Aside from having close nnections at the national vel, he's also an active ader for the state and unty groups. He was a rector for the Penn-lvania Pork Producers uncil (PPPC) for six ars and has served as ief executive to both the ncaster County and state-de organizations.

The biggest promotional programs currently going on in the Keystone State are primarily of an educational nature. The PPPC distributes pork recipes and educational materials to home economics classes and also supplies these participating schools with meat for demonstration purposes. Booklets and pamphlets stress the nutritional value of pork and describe cooking procedures.

The PPPC has also distributed similar kits - each valued at about $400 - to college home ec. curriculums. The materials include film and other educational items.

Research programs are periodically funded across the country, with Penn State receiving grants from time to time. A major emphasis now is to find ways for increasing the efficiency for feeder pig production, Henkel commented.

In addition to these programs, the pork producers' wives have formed groups known as "The Porkettes" - an auxiliary for carrying out cooking and serving demonstrations for pork and related products.

As it's set up now, producers who agree to take part in the program have the proper deductions made right at the market - which could be an auction, a packer, or butcher. It is also possible for the producer to take the program entirely into his own hands by periodically sending a check to the NPPC which would represent the proper amount of deductions.

If a producer is not willing to take part in the program, yet a deduction was made, he may apply for a refund, Henkel explained. He is on the local board and would welcome questions from other producers.

One of the research programs on hogs with which he is directly involved concerns swine diseases. Many of his pigs are marketed at five to six weeks of age for veterinary research. The final prupose is to help find cures for rhinitis and mycoplasma pneumonia, Henkel estimates that between 60 and 65 percent of the U.S. hog population is affected by one or even both of these diseases. Although neither of these production complications have an effect on consumption qualities of pork, they are of concern and exemplify one more area where the check-off program is being put to work.

Penn State breeding research specialist

John Almquist wins prize

UNIVERSITY PARK — Dr. John O. Almquist, professor of dairy physiology at The Pennsylvania State University, won national honors June 22 as recipient of the research award of the National Association of Animal Breeders. The occasion was the annual banquet of the American Dairy Science Association held in Raleigh, N.C. He received $1,000 and a plaque.

The Penn State scientist is internationally known for his work in artificial breeding and reproductive physiology of dairy and beef cattle. The award is his fourth major citation for outstanding achievements since 1959.

John Almquist

Almquist pioneered the use of milk in semen diluters to extend the fertile life of bull spermatozoa. Later he used glycerol with milk to develop and improved semen diluent to retain high fertility over a longer period of time than previously possible. For the latter development he won the Glycerine Producers' Association Research Award in 1959.

In 1963 the American Dairy Science Association presented Dr. Almquist with the Borden Research Award in Dairy Production. The award cited him for studies in the physiology of reproduction. He was honored for significant contributions to the rapid and successful advancement of artificial insemination and the resulting improvement of dairy cattle.

International recognition for achievements was given the Penn State dairy scientist in 1972. This time he received the research award of the Italian Society for Progress in Animal Reporduction during ceremonies at the Italian Embassy in Washington, D.C. Almquist has described his studies of sexual behavior and semen production of bulls at three international Congresses of Animal Reproduction since 1956.

His most recent national honors came in 1974 when he won the Animal Physiology and Endocrinology Award of the American Society of Animal Science.

Almquist was the first scientist to demonstrate the value of adding penicillin and streptomycin to diluted bull semen to control bacterial growth and to increase fertility. As a result, antibiotics are used universally by the artificial breeding industry. Such use of antibiotics has produced a substantial increase in breeding efficiency in the United States as well as in other countries.

He has been in charge of the Dairy Breeding Research Center at University Park since the Center was opened in 1949. He was appointed to the College of Agriculture faculty in 1944 to develop a new program of research and teaching in animal reproduction.

Dairy Equipment

1000 NEW JERSEY, WISCONSIN and CANADIAN DAIRY COWS

LARGEST SELECTION OF TOP NEW JERSEY, WISCONSIN AND CANADIAN COWS AND HEIFERS IN THE COUNTRY BOTH REGISTERED AND GRADES

Both close springers and fresh cows are available as you want them. I will help you improve your herd to higher production and butterfat. DHIA Records. I am interested in building up a good reputation with the dairy farmers of your community.

I follow the breeding of the good herds in New Jersey, Wisconsin, and Canada and know the cows and heifers that do well. To get the top notch cattle in New Jersey, Wisconsin and Canada, I have learned to buy the cattle they do not want to sell. I do not buy any cattle that are for sale. As I am in business alone, I can afford to sell at a more reasonable price. Price — $25.00 less per head than the going price of top Cows I try to price cows at what the dairyman can afford.

YOU ARE CALLING THE RIGHT MAN WHEN YOU CALL ME

If it is your desire, you can come and look at the cows in New Jersey, or if you cannot come, I will send them direct to you. If you prefer, I will also come to your farm and work out the deal. Several dairymen have called me by phone and asked for good cows. They said they did not have time to drive to my place. We arranged by phone that I would select the cows and send them direct to them. We have never met personally, other than our conversation by phone and I have made satisfied customers in this manner. We are a firm that does honest business.

Call me by Phone and Reverse Charges or Write Me and Give your Phone Number

CASH OR CREDIT CAN BE ARRANGED WITH A DOWN PAYMENT.

The cows that I have brought into your state have made me many friends among the dairymen Call me and I will do the same for you.

FREE DELIVERY WITH SMALL TRUCK OR TRAILER.

Me—the farmer.

I'm glad I'm a farmer.
Sometimes I'm angry about being a farmer.
And disappointed. Elated. Puzzled. Worried. And, I suppose, every emotion in the book.
But I'm glad I'm a farmer.
Because I know what I am. And what I feel.
I feel I'm akin to my land and the things that grow on my land . . .
And the sky over my land and the water that falls on it and flows through it . . .
And the livestock that sustains itself upon my land . . .
And the buildings that shelter me and my wife and our children and the machines that help to make my land fruitful.
These are a bone-deep part of me.

As is sweat. Cloudburst. Drought. Repairs. Disease. Heartache. Market losses. And profits. Sowing. Reaping. And a hundred and one setbacks and successes, large and small, that other men may never know. But that I know. And am content with.
Not because farming is easy. It isn't. Or because a farmer enjoys fame. He doesn't.
Or because a farmer like me is a wealthy man. I am not.
It's simply because I know what I am. And I know what I feel.
I wouldn't have me any other way.
Me -- the farmer.

AGWAY

Lime Up Now . . .

to maintain high alfalfa yields and stretch your fertilizer dollar next year.

Liming alfalfa ground now maintains the pH level necessary for continued high alfalfa yields. And on sod, going into corn or alfalfa next year, it provides time for the lime to raise pH to the point where you can get the highest return from the fertilizer you apply.

It's a good time to spread and Agway trucks are ready to roll. If you don't have a soil test to guide you, bring a representative soil sample (one pint) to Agway for a quick, free pH check. Then get that lime put down.

Sandy Lentz enjoys farm promotion

By SALLY BAIR
Feature Writer

"It's the best life," Mrs. Robert R. Lentz said with conviction as she spoke of her life on a dairy farm. But she explained that she didn't always feel that way.

When she was growing up on a farm in Fredericksburg with her four sisters and one brother, the sisters all agreed that they would not marry farmers. Sandy said, "We all worked hard - milking, baling and working the combine." Her parents are Mr. and Mrs. Melvin Shirk.

But she and two of her sisters did marry farmers and she says, "I really enjoy it. You work hard, but in the winter it is not quite so demanding. It is a good place for kids to grow up."

Sandy has been a member of the Lebanon County Dairy Princess Committee for three years and despite her relief that it is over for another year she says, "I think promotion is good - definitely. It's really needed - consumers don't realize what it takes to make a gallon of milk or a pound of meat. Many consumers think farmers have an easy life."

She related a story about a visit to the Pennsylvania State Farm Show where she overheard someone asking the price of a huge piece of equipment. When the man heard the high price he said, "Farmers must really have money to be able to buy that kind of equipment." Sandy said with a laugh, "People think if a farmer needs a new tractor he just buys one." No one thinks of the debts, she said.

She explained about Lebanon County's dairy promotion along with their Dairy Princess contest. It was held at the Lebanon Valley Mall, and on Thursday, Friday, and Saturday there were exhibits in the mall, climaxing with the contest itself on Saturday evening.

Young Farmers, 4-H'ers, and dairy suppliers made the exhibits which showed dairy equipment, what cows eat, the different parts of the cow, how to prepare cows for showing and other dairy-related information. To attract attention the Dairy Council used their life-sized model, "Geraldine," and there was a live cow and two calves there each day. A cow milking contest for young children also resulted in a lot of "pinching and pulling," Sandy said.

Sandy's husband farms 440 acres with his two brothers Jay and Gary. They have 90 milk cows which they put through a double-six herringbone milking parlor, and 130 head of young cattle.

Sandy calls herself the "substitute milker," and says that now she helps to milk only when the others are busy. She said, "This is the time of year when I do the most milking." When she and her husband first started in the dairy business they both did the milking, and Sandy recalls that she milked in the morning before going to her job as secretary for Quaker Alloy.

She said she doesn't work in the fields very much, but she does know a lot about the farm operation because she keeps "all of the records." She said she feels it's good for the wife to be involved in the farming operation in this way.

"I enjoy working with books. There's a lot more to it than I thought it would be. I'm not always caught up, but I take care of all the accounts," she says.

She said she prepares the papers for registration for the Holsteins and added, "We strive for a full registered herd, although it may take a while." The herd is on Dairy Herd Improvement testing, and the latest average was 15,738 pounds of milk, 3.7 percent, 576 fat. The Lentz's also participate in classification with their registered cattle. Their prefix is San-Bo Holsteins.

Young David gets a glass of milk from his mother.

In the few quiet moments that come her way, Sandy enjoys doing her embroidery.

Homestead Notes

The Lentz's now live on Bob's grandfather's farm which Elmer Gibbel purchased in 1921. His father Ray purchased it from the Gibbels in 1959.

Sandy is a full-time homemaker and mother who cares for three children. Brenda is 12 and a member of the 4-H dairy club. She helps with feeding the calves and heifers and helps in the barn during the milking. She will go to Northern Lebanon Junior High in the fall.

David is four and a half and "helps with everything," his mother says. Indeed, during the interview he asked if it was time to go bring in the cows. Karen is 21 months old, and likes "cows and tractors." Sandy says even at this tender age she is completely a tomboy.

Sandy has "a rather large garden" and does a lot of canning and freezing. She said, "I plant almost any kind of vegetable. Every other year we make chow-chow." She

[Continued on Page 51]

Keeping the weeds out of the flowers is sometimes a big job. Here Sandy tries to keep ahead.

My Thoughts and Welcome to Them

(With apologies to James Thurber)

By JOANNE SPAHR

There will be no humor today. I declare a moratorium on funny material. Of course, there's always the possibility that you haven't realized I've been striving for lightheartedness in this column. Then, again, there's the other possibility that nobody's been reading this column in the first place. But, for those who have and are reading, I'd like to change my style for a little.

And, farm wives **can** make a big difference in farming, I believe. I don't mean the typical situation where somebody has to drive tractor, or pitch in with the milking on the spur of the moment. I mean, make a difference by getting active and supporting agricultural groups, especially the ag groups designed for women. You can do so much that your husband can't because of time limitations on him.

Of course, I'm aware that being a farmer's wife is not a simple task. I know because I'm a farmer's daughter and have seen how really overly busy my mother has been at times just doing her part to help keep the farm going. But, I've also seen her get more actively involved in farming in the past few years and know that the little bit she has done has made a difference. And it's made an important contribution to her life, also.

Several of the articles this week are centered around women active in farm organizations, and one of these women said to me, "I think women who weren't raised on a farm make better farm wives than farmers' daughters do — because they don't know what they're getting into."

That may be true enough, but there are many cases in which it isn't. It is really the type of woman who marries the farmer that makes all the difference.

Groups like Agri-Women, Agriculture Council of America, and Farmer's Union to name a few are all working, first, to promote agriculture itself, and, second, to promote understanding between the farmer and the consumer. Any time the agricultural sector and the non-agricultural sector of the country communicate with each other, there is bound to be better cooperation between the two. We need this, and we need more active farm women to be spokesmen for our often misunderstood part of the economy.

xxx

Now that I've given my pitch for getting active in farm organizations, I'd like to give my pitch for getting active in helping me with LANCASTER FARMING. I want to make the woman's section as interesting to you as possible. I know what I'd like to see in it, but I'm not all that sure if my ideas go along with yours. For that reason, I would welcome any suggestions on articles or series of articles that you would like printed in the paper.

I am presently beginning a craft column. My meager start is in the following section. As I state in the forward to that article, I would appreciate any craft or hobby which you might have that you think would be interesting to other women. Don't be shy — if you like a craft, you can be pretty sure someone else will also.

To go even further than this, I would welcome any other suggestions which you might offer. It's **your** paper and I am willing to at least **try** to accommodate your wishes. "Try" of course, has to be emphasized, since many times ideas are good, but too time consuming or difficult to carry out. But, as I said, I want to honor any suggestion you might make, and then, hopefully, act on it.

I'm looking forward to hearing from you soon

Sandy Lentz

[Continued from Page 50]

cknowledged that Grandparents Gibbel assist with ings like hulling the peas and preparing other egetables for freezing which is a big asset.

She is also proud that she now owns a rototiller to keep e garden looking nicer because she says it is so large at hoeing all the weeds is not practical.

A FULL SERVICE BANK

In any spare time she finds, Sandy enjoys doing both crewel embroidery and regular embroidery. "I like to try other crafts - different things."

She said, "I enjoy sewing and I enjoy cooking." In addition to her family, she cooks for Bob's two brothers at noon daily.

A member of Farm Women 5, Sandy said, "I really enjoy Farm Women. You should participate in something which gives you the opportunity to talk with other people."

Sandy is a member of the Bible School Committee and the newsletter committee at the Mt. Zion Road Church of the Brethren.

The Lentz's are - like many farming couples - active in the organizations which serve them. Bob was a member of the board of directors of the Holstein Association and is currently serving as a director of DHIA and the Lebanon County Conservation District.

He is also a member of the Pennsylvania Farmers Association and Sandy served on the women's committee.

Membership in these kinds of organizations has given them a chance to travel and meet others who share their experiences. They just returned from representing Lehigh Valley Cooperative at Pennmarva's Young Cooperator meeting at the Hunt Valley Inn and next week they will travel to Philadelphia for two days to attend the National Holstein Convention. Bob is active in the Northern Lebanon Young Farmers organization.

Sandy said it works out nicely with the three brothers being able to "change off. It's nice if you can get away sometimes. It does everybody good."

The family enjoys snowmobiling in northern Pennsylvania in winter and square dancing. She said they once belonged to the Senior Extension group in the county and danced in competition at the Farm Show.

Sandy and Bob are active young farm people - the kinds whose participation helps get the work of the various farm organizations accomplished.

Manheim Township Community 4-H Club

On Tuesday, June 15, the Manheim Township 4-H Community Club held a meeting at the Farm and Home Center.

At the meeting, Phillip Risser gave a speech and Cindy Risser presented a demonstration. The club toured the WGAL-TV studio after the meeting.

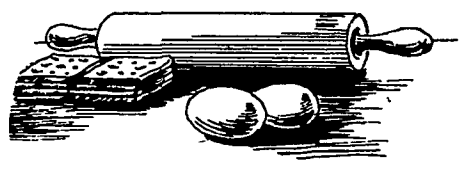
Home on The Range



This week is the week to use up all left-over dessert recipes. The puddings look delicious and will make good light desserts on a hot summer day.

Don't forget the picnic recipes we will be featuring during the month of July. So far, only a few have come in. When you do send a picnic recipe, mark it as such on the top of the page. This will make sorting easier and assure you that your picnic recipe will be published during July.

PUDDINGS

Purity Rice

1 cup whipped cream
1 package lemon jello
1 cup pineapple
1 cup cooked rice, cooled

Prepare the jello as the package calls for. Then cool and whip. Mix all ingredients together and chill and serve.

xxx

Rice Pudding

4 cups milk
1-3 cup rice
½ teaspoon salt
1-3 cup sugar

Mix ingredients and pour into buttered baking dish. Bake for three hours in slow oven.

xxx

Corn Pone

1½ cups flour
1½ cups corn meal
1½ cups sweet milk
½ cup lard
½ teaspoon salt
2 eggs
3 teaspoons baking powder

Mix ingredients and bake in a pan until done. Serve hot with milk and sugar.

Mrs. E. Hoover
Leola, PA

xxx

Bread Custard Pudding

2 cups cubed bread
4 cups milk
4 eggs
2-3 cup granulated sugar
1 tsp. vanilla
2 tablespoons butter
cinnamon

Beat eggs, add sugar, milk, cubed bread and vanilla. Mix well and pour into a buttered 10" pan. Dot with butter and sprinkle with cinnamon on top. Place in a pan of hot water and bake 350 degrees for 45 minutes.

Highly nutritious, tasty and versatile, milk is often characterized as "Nature's most nearly perfect food."

Berks Co.
Extension Service

xxx

Butterscotch Pudding

1 quart and 1 pint milk
1 cup molasses
1¾ cup white or brown sugar
1 tablespoon butter
1 teaspoon vanilla
5 eggs
1 cup flour
½ cup water

Mix ingredients in a kettle and thicken. Makes two dishes.

Mrs. A. Good
R2
Memphis, Mo. 63555

xxx

Cracker Pudding

¾ cup sugar
1 quart milk
1 cup graham cracker crumbs
2 egg yolks
½ cup coconut or chopped nuts
2 egg whites

Heat milk. Mix sugar, cracker crumbs, and egg yolks. Add to milk and bring mixture to a boil. Stir in coconut and pour into glass serving dish. Cool. Beat egg whites and top pudding with them. Place under broiler until lightly brown.

Helen Shertzer
Route 1
Millersville, PA

xxx

Cherry Pie

2 cups cherries, fresh or canned
½ cup sugar
1 cup water
3 tablespoons cornstarch
3 tablespoons water
Pastry

Cook the cherries with sugar and water a few minutes. If canned cherries are used, omit water and use the juice. Thicken with cornstarch and water. Cool. Turn into pastry-lined pie plate, Cover with lattice crust. Bake in a moderately hot oven for 30 minutes. The oven should be 400 degrees for five minutes, then 350 degrees for 25 minutes.

Edna Speck
Alexandria, PA

xxx

Cherry Cheese Pie

1 pastry shell or graham cracker crust
2 three-oz. packages cream cheese
½ cup powdered sugar
½ teaspoon vanilla
1 cup whipping cream
1 can (1 lb. 5 oz.) prepared cherry pie filling

Mix cream cheese, powdered sugar and vanilla until creamed and smooth. Whip cream, fold into cheese mixture carefully. Pour into shell. Cover with prepared cherry filling. Chill before serving.

Mary W. Hoover
S. Main St.
Rt. 2 Stevens, PA 17578

xxx

MISCELLANEOUS DESSERTS

Unbaked Cookies

½ cup milk
½ cup butter or margarine
½ cup cocoa
2 cups sugar
½ cup peanut butter
3 cups quick-cooking oats
1 teaspoon vanilla

Boil cocoa, butter, milk, and sugar until ingredients melt together. Add remaining ingredients and mix well. Drop by teaspoons onto wax paper quickly. Yields 3 dozen.

Janet Kohler
York, PA 17313

xxx

Cocoa Syrup

1 cup cocoa
2 cups sugar
1½ cups hot water

Mix and bring to a full boil and boil for five minutes. Use 4-quart kettle. Add vanilla, then bottle. Can be used for chocolate milk or ice cream topping.

Mrs. A. Good
R2 Memphis, Mo. 63555

Junior Cooking Edition

This week's junior cooks are still sending in great dessert recipes! Most of them feature fruits which are in season and are good buys for this time of year. And, of course, what better dessert is there than homemade ice cream on a warm, moist summer night?

Don't forget the little contest we have going between the Home on The Range Cooks, and the Junior Cooking Edition cooks. The contest is to see who can get the most picnic recipes in for the month of July. The divisions will be sandwiches, salads, finger foods, beverages, and desserts. Personally, I'm rooting for the Junior Cooks - they always supply me with the best and the most recipes. Come on, Junior Cooks. Let's show everybody what good picnic foods you make.

Peppernut Cookies

2 lb. granulated sugar
½ lb. butter or margarine
½ lb. lard
4 eggs (separated)
2 cups sweet milk
2 teaspoons soda
2 teaspoons lemon extract
3 qts. flour (scant)

Cream shortening and add sugar gradually. Beat until fluffy. Add egg yolks and continue to beat. Add stiffly beaten egg whites. Mix soda in milk and add to mixture. Add lemon extract. Add sifted flour gradually and mix well. Drop on cookie sheets. Bake at 325. Yield about 100 cookies.

Vernon H. Wenger
Lititz, Pa. 17543
Box 220
Age 15

xxx

Home Made Ice Cream

3-½ qts. whole milk
2 tablespoons vanilla
4 cups sugar
2 qts. cream
4 to 6 eggs (beaten)
6 or 7 junket tablets

Scald milk, add remaining ingredients, but add junket last. The junket should be dissolved in ¼ cup cold water.

R4
Lititz, Pa. 17543
Age 8

xxx

Frozen Strawberry Dessert

2 cups graham cracker crumbs
1 tablespoon sugar
½ cup butter
1 small package of whipped topping mix
2 cups strawberries
½ cup sugar
1 8-oz. package cream cheese

Combine crumbs, sugar, and butter. Save ¼ cup for top; layer the bottom of the pan with the remainder. Prepare the whipped topping mix and set aside. Add fruit to cheese, gradually beating in sugar. Fold the cheese mixture into topping a little at a time until well blended. Pour into crumb lined trays and freeze.

Doris Zimmerman

New Holland, Pa.

xxx

Starwberry Shortcake

4 cups flour
1 teaspoon salt
4 tablespoons sugar
8 teaspoons baking powder
6 tablespoon shortening
2 eggs
1 cup milk (more if necessary)

Bake at 350 for 20 to 25 minutes. Makes two 8-inch layers. Serve with fresh strawberries, crushed, and sweetened with sugar and milk or whipped cream.

Teresa Martin

Port Trevortan, Pa. 17864
Age 8

xxx

Frosted Pineapple Squares

½ cup sugar
3 tablespoons cornstarch
¼ teaspoon salt
1 beaten egg yolk and 4 unbeaten egg yolks
1 lb. 14 oz. can pineapple chunks
2-3 cup scalded milk
1 teaspoon sugar
1 package yeast
¼ cup warm water
1 cup margarine
4 cups sifted flour

Combine sugar, cornstarch, and salt in saucepan. Stir in 1 beaten egg yolk, and pineapple chunks, stirring. Cook until thick and set aside to cool. Scald milk and add 1 teaspoon sugar. Cool to lukewarm. Dissolve 1 package yeast in ¼ cup very warm water. Add milk. Beat in the 4 egg yolks. Cut margarine into sifted flour with pastry blender. Beat in yeast mixture. Divide in half. On flour board roll out ½ to fit and overlap edges of jelly roll pan. (about 16" x 10"). Spread with filling. Roll out remaining dough to cover. Seal edges, slit dough surfaces to let steam escape. Cover, let rise in warm place free from draft until doubled (about 1 hour). Bake at 375 for 35 minutes. Frost with plain icing.

Anna Lantz
Gordonville, Pa. 17529
Age 13

xxx

Fruit Cake

2 cups brown sugar
2 eggs (beaten)
½ cup oil
2 cups fruit or applesauce
2 heaping cups flour
2 teaspoon soda
Pinch salt

Sift flour, soda, and salt. Mix all ingredients well. Grease the sides of pan and sprinkle with flour. Crush the fruit if desired. Bake at 350 for 40-45 minutes.

Icing:
¼ lb. butter (melted)
¾ cup brown sugar
¼ cup milk
Vanilla

Boil for five minutes. Add ¾ cup nuts. Cool before putting on cake.

Barbara Stoltzfus

Age 13

xxx

Tropical Pudding

3 eggs
3 tablespoons flour
¾ cup sugar
½ cup pineapple juice
½ cup water
Pineapples
2 to 3 slices banana
½ dozen marshmellows

Combine eggs, flour, sugar, pineapple juice, and water. Boil until thick. Mix pineapples, bananas, and marshmellows. Combine ingredients - serve.

Blueberry Delight

Crust:
2 cups graham cracker crumbs
¼ cup softened butter
1 tablespoon sugar

Mix ingredients together and press in bottom of pan.

Top:
2 cans blueberries
½ qt. water
1 cup sugar
3 heaping tablespoon clear jell

Filling:
2 cups heavy cream
8 oz. cream cheese
1 package gelatin
½ cup cold water

Whip cream. Add cream cheese and beat with egg beater. Soak 1 package gelatin in ½ cup cold water. Add to mixture and beat again.

Farm Women Societies

Society 3

Society of Farm Women 3 met Saturady, June 19, at the home of Mrs. Elam Shelly, 84 Front St., Lititz.

During the business session conducted by the president Mrs. John Edwards the following business was transacted: $30 was given to help defray the expense of the 4-H club members from Lancaster County who will attend the 4-H Congress at Penn State University, June 21 to June 24.

Mrs. Clarence Stauffer and Mrs. Willie Stober were appointed on the membership committee.

Plans were made for the family picnic July 18 at Shady Grove Park. A picnic lunch will be served at noon. The entertainment will be miniature golf and games for children and adults.

Mrs. June Hanaman, a director of the State Council of Republican Women was the speaker. Her subject was: "Women's Work Is Never Done."

A social hour followed, refreshments were served by the hostess.

Society 8

Farm Women Society No. 8 met in the home of Isabel Endslow Marietta, R1, June 19 at 2 p.m. Grace Bixler, president, was in charge of the meeting and led the group in singing several songs. Sixteen members and one visitor were present.

Mrs. Ruth Musser had charge of devotions. Mary Grace Martin, secretary, read the minutes. Each individual mentioned her choice of a fragrance or aroma as roll call was taken. Elizabeth Shuman gave the treasurer's report. There was nothing new to report from the other committees this month.

Doris Thomas, home economist for Lancaster Co. was the main feature of the afternoon. She gave a demonstration on summertime desserts. She shared a number of recipes and treated the ladies with some of her delicious preparations. Hostesses Isabel Endslow, Elizabeth Shuman, Viola Greider, and Ruth Musser also supplied and served food to the ladies.

July is vacation month and members will be notified if plans for a trip are made. August 4 is the date for the County Picnic when each one will provide a covered sih.

September 18 at 2 p.m., the meeting will be held at the Church of the Brethren, Florin.

Society 27

Farm Women Society 27 and their husbands met at Brubaker's Spring House, Route 1, Mt. Joy, for a Hawaiian Luau, Saturday evening, June 19th. Mr. and Mrs. Mark Nestleroth roasted and served fresh pork hams. The food committee prepared the other Hawaiian dishes. Mr. and Mrs. Luke Brubaker served the dessert from a canoe at the foot bridge.

After the meal and fellowship the group gathered for devotions lead by Mr. and Mrs. James Garber. Garber was in charge of giving away fresh pineapples and coconuts as prizes. Husbands answered roll call by telling where they went for their honeymoon and how long they stayed.

The guest speaker, Mrs. Mark Nestleroth, spoke on the high protein low fat pork that is on the market today. She also showed a film of how to buy and prepare delicious meals of pork. A booklet Hawaiian Parties Indoor and Out with the recipes of the meal were available to pick up, plus many other booklets on buying and preparing pork.

Mr: Albert Fry accompanied his wife on the autoharp and sang several selections. Mrs. Larry Miller served as hostess with cohostesses, Mrs. James Brubaker, Mrs. Luke Brubaker, and Mrs. John Nissley.

Society 31

The June meeting of the Lancaster County Society of Farm Women No. 31 was held at the Southern Lancaster County Community Fair Grounds, Quarryville. The meeting was in the form of a family covered dish picnic. A short business meeting was held, followed by a softball game including farm women and their husbands and some children.

The next meeting will be the annual bus trip to the ocean. The bus will leave Mechanic Grove Church of the Brethren for Ocean City, N.J. on July 19 at 7:00 a.m.

Berks Co. Society 6

The Society of Farm Women, Group 6 of Berks Co., met at the Agriculture Center in Bern Township, Tuesday, June 15, at 8 p.m. Mrs. Fay B. Strickler, home economist of Berks Co., spoke on "Latest Sewing Tips."

The next meeting will be held at the home of Mrs. Earl Hoffman, Oley R1, on July 20 at 8 p.m. It will be a Bicentennial program.

The ladies were reminded of the family picnic which will be held at the home of Mr. and Mrs. Anthony Yetto on Sunday, June 27, at 12:30 p.m. A covered dish and a beverage is to be brought with them to the picnic. Hot dogs will be provided by the group.

The ladies will take their husbands or a friend to the Berks Campus Theatre on Saturday, July 17, at 8 p.m. to see "1776". The group will meet in the auditorium of the theatre at 7:45 p.m.

The president, Janet Schlegel, gave a report of the picnic held at Berks Heim, Sunday, June 13. She was the only person from the group to attend.

A donation was made to Muscular Dystrophy.

The 14 members who attended the meeting went to Dempsey's Restaurnat for light refreshments.

Ida's Notebook

Ida Risser

I enjoy seeing a neat farm with white painted fences as much as anybody else. And, I like to have my yard and garden well-kept and weed-free.

But you know, there are advantages to letting some areas grow wild and untended; as where would the thrush build her nest if there were no thickets. Also, we probably wouldn't see indigo buntings and the beautiful red-headed woodpeckers if there were no wooded areas for them to enjoy.

This spring I was able to gather many meals of poke from fence rows. This plant is similar in appearance and taste, when young and tender, to asparagus. In these same fence rows we find blackberries and wineberries.

So others may chop down every tree in sight and farm right out to the road and sometimes even on the road, but I prefer to let nature have some things to herself.

xxx

Trying to pick cherries [illegible] year, was a different [illegible] perience. The morning of [illegible] third day that the orcha[illegible] was open, we gathered o[illegible] buckets and pails. It w[illegible] almost a waste of time as [illegible] discovered only a fe[illegible] cherries left in the treeto[illegible] and I wasn't about to sway [illegible] the breeze and risk anoth[illegible] accident; as just last week [illegible] tore a ligament in my fo[illegible] and have been hobblin[illegible] around ever since.

So, I picked some cherr[illegible] off the ground and felt li[illegible] the Bibical gleaners w[illegible] took what others left. I d[illegible] find a man's wrist watch, [illegible] having my nose to t[illegible] ground and I turned it [illegible] when we paid our bill. It w[illegible] surprising to hear them sa[illegible] "Thank you for your time[illegible] Maybe next year.

Tips on how to cook for large groups

f you are asked to serve a kitchen crew for a mily gathering or picnic, a dding, or a class reunion, ughts of preparing food in ntities of 20 or 40 gallons be mind-boggling.

The biggest problem in ding groups is usually the anization of the kitchen w. Too many cooks, or too , can be a real problem ecially if the help isn't anized into an efficient rking group, reminds th M. Hand, Extension me-economist.

Plan Ahead. Begin any ge meal by first finding who is going to help. en assign specific duties cording to the skill and me available of each rson.

Give each worker a copy of ir recipe well in advance. en later on you can scuss their needs and sign them the utensils, uipment, and space necessary to do a particular job.

Go through each cooking process mentally - or better yet, on paper. When you go over each process step-by-step you can identify when, where, and how to do the work, who you need to help and what steps you can eliminate or combine. The goal is to foresee problems and eliminate them before the actual cooking begins.

Once you've finalized the work process for all the foods on the menu, put these steps down in writing so they become a work schedule. Include times to begin and end each process. Then post this list ahead of time in a prominent place where all your kitchen crew can refer to it.

Also, prepare the work area ahead of time - empty out refrigerator, set up heating equipment, assemble needed tools, arrange for sufficient counter space.

Menu Selection. Plan a varied menu when serving large groups of people so hopefully everyone will be able to find something they like. Offer contrasts in color, size, shape texture, and flavor of food. Oven fried chicken or roast ham make good choices for the main course. But if you want versatility choose a rolled rib of beef - it's easy to prepare and is good served hot or cold.

When choosing foods for the menu stay away from potentially hazardous foods, such as fish, meat, foods with mayonnaise, and egg and milk products. Consider your equipment, too, for to serve foods safely you must serve hot foods hot - above 140 F - and cold foods cold - below 40. Bacteria will develop if foods are left at room temperature for any length of time.

Unless you have ideal storage conditions, don't plan to store any food for more than 24 hours. Instead, buy ingredients as close to serving time as possible and choose the most fresh and wholesome looking produce.

Bacteria can be transferred easily from one food to another - even between raw and cooked foods. When preparing foods for the meal, make sure hands, equipment and work surfaces are clean. Be sure that all kitchen help wash their hands with soap and water after each activity.

Food safety can be more of a problem when cooking in large quantities. Therefore, be sure all recipes are followed exactly - cooking to meet time and temperature requirements. Cook large amount of food in small batches to control the temperature variations which occur when cooking large volumes of food.

Serving Food To Large Groups. If food must be taken to a site other than where it's been prepared, travel with foods chilled - do the reheating at the serving site.

Remember that portable servers are not meant to heat or chill foods - they only help maintain a food's temperature. Make sure all pans of food are already at the safe temperature before placing them in or on food servers.

Serve food in small quantities. Keep additonal pans on reserve in the refrigerator or oven. Serve chilled foods in shallow pans on a bed of ice, if possible.

Because heated trays will not keep foods at the safe temperature of 140 F, use a double boiler system when using portable sterno fuel. Place heated food container over a pan of already boiling water which is above the fuel source.

Keep the serving area clean - cooked as well as raw foods are susceptible to bacteria. Try to keep food covered when it's not being dished up. Once the group has helped itself, cover and store leftovers at once. Guests wanting more food later on can help themselves in the kitchen. But if you have planned well, you should have few leftovers to store.

Information on adapting recipes to serving large groups, may contact Mrs. Ruth M. Hand, extension home-economist, Schuykill County Extension Service, P. O. Box 404, Schuylkill Haven, Pa. 17972, telephone - 717 - 385-3431.

Sewing series on channel 12

CHESTER - Increased family clothing costs have created an interest among women and girls - and men and boys - in learning how to create clothes for themselves and their families.

To help you lern how to sew, SEW SMART - "Beginning to Sew" - a series of 13, half-hour color programs, will teach you basic clothing construction skills at home. "Beginning to Sew" was produced by the Cooperative Extension Service of The Pennsylvania State University and WPSX-TV, the University's educational television station.

"Beginning to Sew" will be broadcast each week on Channel 12 on Tuesdays at 11:30 a.m. It began June 22.

Ruth Ann Wilson, extension textiles and clothing specialist, will show you the "how-to's" as they apply to children's clothing. She will help you create garments that have individuality and will be fun to wear as well as save you money.

Some of the topics covered in the series are tools for the job, know your sewing machines, fabric facts, patterns for children, facings and fasteners, pants, tops, raglan sleeves knit jackets, set-in sleeves and collars, buttonholes, buttons and hems.

To find out how you can enroll, free of charge, in the "Beginning to Sew" series and receive your viewer's guide, contact the Chester County Extension Office, 235 W. Market St., West Chester, or phone 696-3500.

Mt. Joy 4-H

The Mt. Joy 4-H Club held its first meeting on June 15. The club toured Donegal Mills and saw how bread is made. After the tour, the group had refreshments of homemade bread and ice cream.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

How to Embroider on Sewing Machine

Embroidered clothing is popular among both young and old to add charm and individuality to clothing and accessories. You can add this touch to clothing easily with a zig zag sewing machine.

To use a zig zag machine for embroidery work, set the machine on a fine stitch, medium width zig zag. Remove the presser foot and lower the feed dog so that there is nothing to force the fabric through the machine. Draw the pattern on the fabric, or use embroidery transfers - then place the fabric in an embroidery hoop.

Now you're ready to sew. Outline the design first with a smooth satin stitch. The needle should be the only part of the machine that is moving. You will have to move the hoop back and forth and up and down to follow the outline of the design. To fill in the design, move the hoop rapidly back and forth in the direction of the zig zag. This fills in the design and looks very similar to the short and long stitch used in hand embroidery.

Lightweight fabric, such as blue chambray shirts, need to be reinforced with fusible interfacing or a piece of brown paper under the area to be embroidered. A fast motion of the needle and a smooth movement of the hoop makes professional looking embroidery. While machine embroidery thread is available, good results can be obtained with regular sewing thread.

Even if you have never found it easy to do hand embroidery, you should be able to embroider with a zig zag machine with a minimum of time and effort.

What to Look For in a Livable Home

The true beauty of a house is not its furniture or carpeting - you can change these things. What makes a house beautiful to live in are such things as "traffic patterns," "work triangles," and "room relationships."

I would like to advise you to check these features when you're buying, renting, building or remodeling a home.

It's aggravating when everyone must pass through the middle of the living room whenever they want to go from kitchen to bedrooms. It's maddening when the children trail dirt throughout the house on their way to wash up for dinner. And it's unsafe and unsanitary walking directly through the area where food is prepared. But these things happen in many houses - those with poor traffic patterns.

Trafficways that connect one part of the house with another are sometimes confined to halls or stairs. If, however, these paths must go through rooms, the normal activities should not be disturbed by people passing through. The most direct route or passageway through a room should channel traffic along one edge or across a corner.

Every house has activity areas - places where the family works, lives and sleeps. But some houses can have more satisfactory areas then others.

The relationship between rooms is important, too. How do you get the food from the kitchen to the dining area, or outside for a picnic? How close is the bathroom to the bedrooms? How private is it from the rest of the house?

You spend much of your time in the kitchen so it should be convenient and well-planned. This is where the work triangle is important. Measure an imaginary triangle, using the distance between the center fronts of your sink, range and refrigerator. The sum of the three sides of the triangle should be between 16 to 26 feet for greatest step saving.

Our Goal is to make work as much fun as play

And here are the Super Tools from Piston Powered Products to make it happen

In the world of portable power, you can't do better!

Question of the week

What kinds of Fabrics can be used For Embroidery?

You can use anything-even suede or leather, if you can get the needle through it. A range of fabrics from fine guaze to heavy upholstery materials of all weights and weaves can be used. Your selection, of course, depends on what your making - clothes, bedspreads, chair seat cover or wall hangings.

Incidentally, metal or plastic screening is fine for doing artwork to hang on wall. You can use its through quality as op spaces in your design.

Your selection of e broidery "thread" will keyed to your type of fabr

Dainty craft of paper cutting is revived

Beginning this week, LANCASTER FARMING will feature one craft a week that would be an interesting and enjoyable hobby for farm women. The column will be run on an exchange basis such as the recipe exchange, which is a regular feature of the newspaper.

If you have a hobby or craft that you enjoy, or if you know of another person who spends her leisure time doing an interesting craft, let us know. Send your name and address or the other person's name and address, a little background information on the person who does the craft (how long involved, how became interested, etc.,) and the directions to the hobby or craft. Any printable pictures would also be appreciated. We will then choose one a week to feature.

Scherenschnitte is the old art of paper cutting. It has a long history which goes back 3000 years to ancient China. From the Asiatic countries, it moved to Europ and to the Alps and Rhine area where it picked up the name it is known by today.

According to Claudia Hopf of Womelsdorf, Pa., who has been doing this art since 1969, the craft came to the colonies in the 1600's and 1700's where it was a favorite pasttime of children on a rainy day.

Primarily, however, it was used to ornament house documents and birth certificates, but it also became popular for shelf paper and doilies.

When the industrial revolution came about, the craft was temporarily lost as an art, because people thought it was a waste of time. But, today, many artists are reviving the popularity of this simple, but dainty and elegant craft.

How To Do It

Anyone can learn this simple art. The first thing to do is choose a pattern. The first one should be simple, Mrs. Hopf points out. A good source for patterns is "Folk Art of Rural Pennsylvania," by Frances Lichten. This book shows the old Pa. German motifs. At present, Mrs. Hopf is also working on another book with more patterns. However, the work has yet to be published.

The next step after finding a pattern is to trace the design with a soft lead pencil onto tracing paper. Mrs. Hopf recommends a B-2x pencil for this part of the craft.

The third step in the process is to transpose the design off of the tracing paper and onto white linen paper. The white paper can be the cheapest possible with a linen finish. The kind Claudia Hopf uses costs her anywhere from 29 to 59 cents in the supermarket.

To transfer the tracing onto the linen-finished white paper, lay the tracing paper with the lead design faced down next to the linen finish.

Mrs. Claudia Hopf, of Womelsdorf, Pa., demonstrates the art of scherenschnitte, or paper cutting.

Then take the sharp edge of a spoon and rub over the pattern until the image tranfers to the linen paper.

After this part of the process is complete, the only step remaining is the cutting

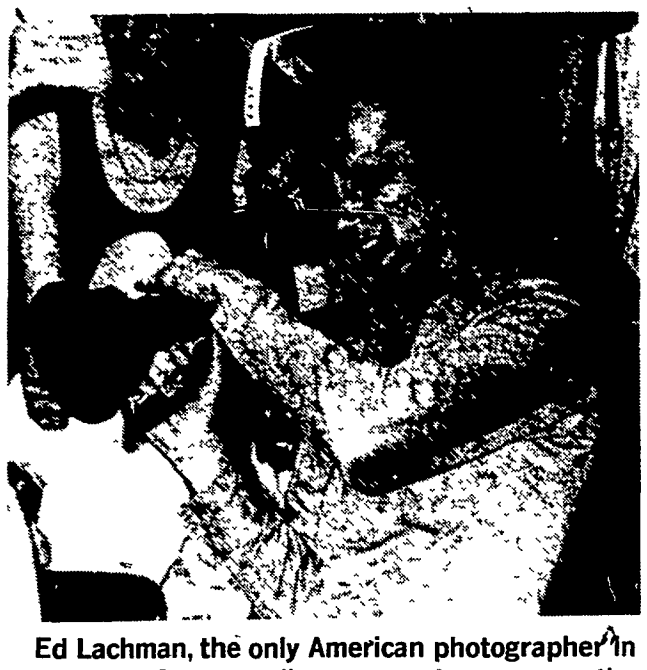
Welcome to the 13th Annual 1976 LIVESTOCK AUCTIONEER WORLD CHAMPIONSHIP



Ed Lachman, the only American photographer in the three German film crews, focuses on the auctioneering competition for a film to be made for German audiences.

The German film crew was interested in filming the Pa. Dutch ties to the Old Country.

Paul Sanger of Lebanon, Pa., had the honor of being the oldest auctioneer at the World Championship. He is 65 years old and has been auctioneering for 50 years. Next summer he will attend the championships in Calgary, Alberta, to celebrate a half-century of dedication to his work.

By JOANNE SPAHR

NEW HOLLAND - It was a big event last Saturday at the New Holland Sales Stables, Inc., when the World Livestock Auctioneer Championships took place. A motley crew of cosmopolitan auctioneers in white cowboy hats and business suits, farmers in their work-a-day jeans, women in high quality pantsuits and makeup, and Amish in their traditional garb all rubbed elbows and swapped facts while a German movie crew looked on, filming the whole process for posterity and a TV audience back home.

Why the excitement?

"It's the Miss America pageant of auctioneering," drawled Ralph Waite, this year's reserve champion sponsored from Coffeyville, Kansas, while awaiting his turn at the block.

Waite was one of 53 contestants from across the United States who signed up to compete in this year's annual event which has taken place for 13 years now.

According to Gerry Nevins, coordinator of the contest and Advertising Business manager of the Livestock Market Digest who conducted the affair, this year's turnout was one of the best ever. Many of the participating auctioneers, returning for their third and fourth times for a try at the coveted title, agreed with Nevins' observations. Most said that there seemed to be more interest in auctioneering in this area than in other parts of the country.

This is part of the reason New Holland Sales Stables was chosen to host the event. Nevins said that when the Livestock Market Digest, Inc., was looking for a place for this year's contest, the East Coast was chosen as the basic region. From there, it was a process, of elimination.

"We knew competitive marketing was strong in the region, so we chose it, and there's been a record crowd," explained Nevins. "Abes" also been a great man to work with," he added.

Abe Diffenbach, president of the New Holland Sales Stables, had prepared for 2000 to 3000 people, and his expectations were easily met. In fact, after the contest, he estimated that there were at least that many people in the arena alone, watching the sale.

There's no doubt that the arena was packed. Normally, according to Diffenbach, it holds anywhere from 400-500, but during the auction it was crammed past its capacity. Not a single spot was vacant. Crowds were overflowing and pushing out onto the catwalks where the vision was limited, but word of mouth was good.

Also, in the horse barn, Diffenbach had four closed-circuit cameras set up - two facing each direction.

Although it began at noon, to get a good seat most people arrived early in the morning.

"We got here at 9:30," said Krall Hostetter and Ed Bowers, two interested local people who planned to come to the event for over three weeks.

"You never know when you'll get to see something like this again," they continued while snacking on the free lunch of ring bologna, cheese, olives, pickles, potato chips, and pretzels set up by the New Holland Sales Stables.

It will be some time before the event returns to Pa. Next year it will be held in Calgary, Alberta.

Sponsored every year by the Livestock Marketing Association and conducted by the Livestock Market Digest, Inc., a subsidiary company, in conjunction with the Livestock Marketing Congress, which was held at Hershey this year, the contest stresses professionalism in auctioneering.

(Continued on Page 60)

Super affluence and old world traditions met and meshed on Saturday as auctioneers in Stetson hats and Cadillacs swapped ideas and opinions with local Amish farmers.

THE AUCTIONEERS
By Wynn C. Walker, Sr.
Written at New Holland Sales Stables
June 19, 1976

The fans turned slowly in the summer breeze,
Up close the New Halland Sales Barn's eaves
While far below in the different pens
The steers moved round and round again
Waiting their turn to move through the gates
To get on the scales for their sale weights.

The auctioneers' voices rose loud and clear
Over the noise of cattle and people here
At the National Livestock Auctioneering Contest
Each giving his call his very best
To the judges and buyers in the arena packed
Who purchased the steers from the auction block

Western hats, western jeans, sport coats, ties
Colored shirts were seen,
As the auctioneers moved down the wooden walkway
To reach the arena and have their say,
Trying all his auctioneering tricks
To be named the auctioneering Champion 1976.

Ron Ball, last year's World Champion Auctioneer from Brush, Colo., began the day's festivities by auctioning off the first set of cattle at the World Livestock Auctioneer Championships on Saturday. Seated beside him is Alan Diffenbach, clerk at the stables.

Longacre ELECTRICAL SERVICE INC AND SURGE

CORDIALLY INVITE YOU TO ATTEND

Open House

VIEW ONE OF THE MOST AUTOMATED MILKING SYSTEMS ON THE EAST COAST!

DATE — TUES., JUNE 29th

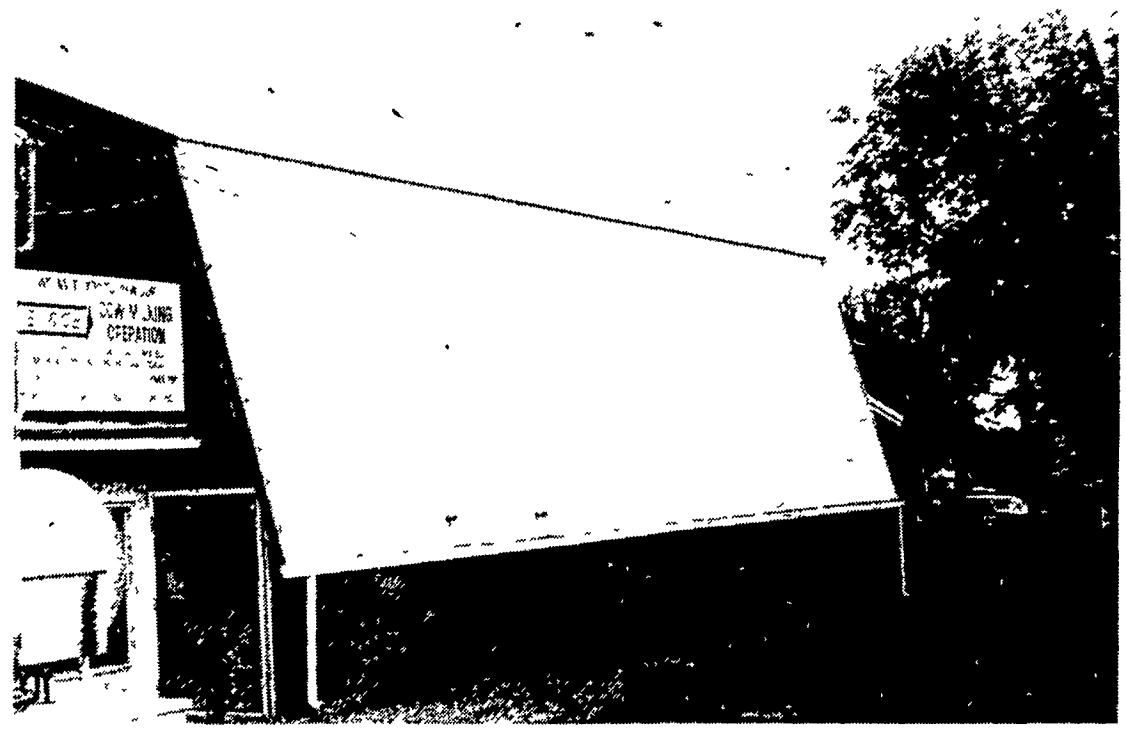
TIME — 10 A.M. TO 8 P.M.

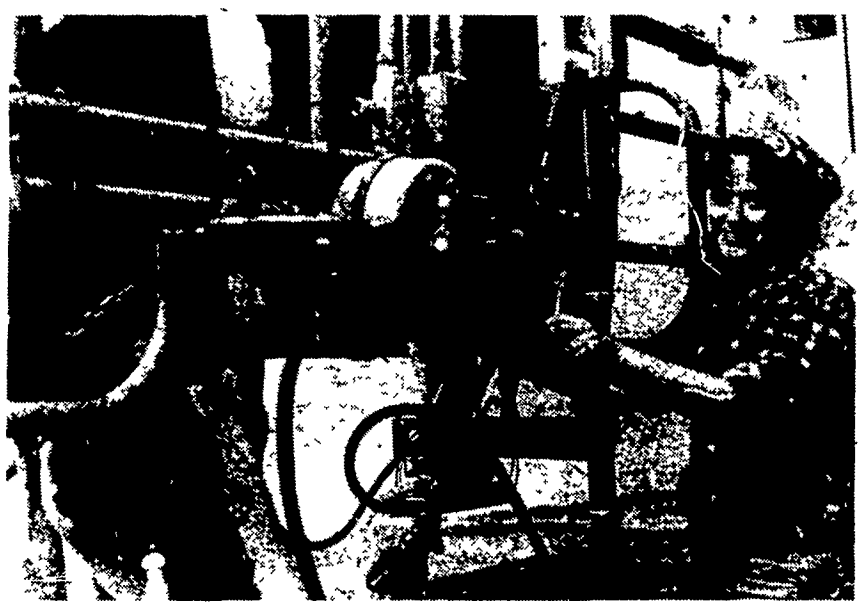
AT

LOCKHART FARMS

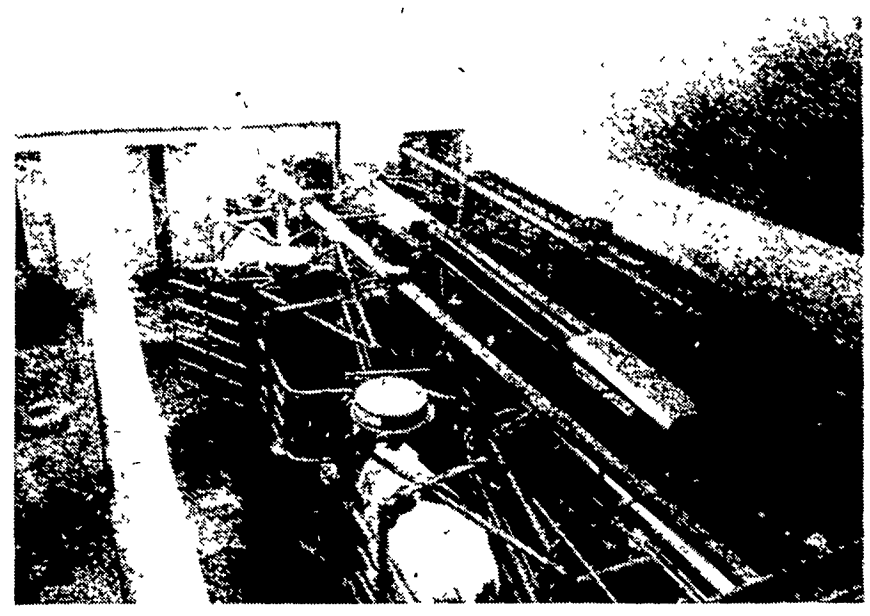
CHALFONT, PA.

Turn East off Route 309 South of Souderton, Pa. at Zoto Diner; Proceed approx. 3 blocks and bear right on Township Line Road; Go to 1st stop sign, turn right on Sellersville Road and go 1 block to Curly Mill Road, turn left to Lockhart Farms.





Meg Snyder demonstrates the ease of operation of this fully automated system. Two persons easily handle the 12-stall system at Lockhart Farms.



Six of the twelve stalls are shown in this picture of the Lockhart Farms system. Automatic gate sequencing allows constant flow of cows through the stalls.

Longacre Electrical Service, Inc. has installed the latest SURGE milking system for the Lewis Family at Lockhart Farms. The combination of Surge Prep Stalls, Surge QTO Milkers and Surge Automatic Gate Sequencing has improved production and cut milking time in half for the 225 Head herd at Lockhart Farms.

Auctioneer

[Continued from Page 58]

Gerry Nevins explains it this way, "A good auctioneer never quits making you money and a poor auctioneer never quite costing you money."

Each contestant was sponsored by a livestock market and had to pay $125 entry fee to be able to compete. Evaluated by nine judges, three each from the western, central, and eastern regions of the country, each contestant had four sales and only a few minutes to prove his talents.

The biggest criterion of evaluation used by each judging was an intrinsic reaction to whether he (the judge) would want the auctioneer to handle sale of his animals. This breaks down into finer catagories such as clarity, speed, personal appearance, dictation, ability to catch bids, and ability to convince the buyers to bid higher.

Actually, the bidding wasn't all that much higher on Saturday than the previous day. According to Norman Kolb, secretary-treasurer of the New Holland Sales Stables, the prices were steady with Thursday, or possibly a little higher. Top price for fat cattle was 42.00 and 47.25 for stockers. In the five hours of auctioneering, 860 cattle were run through the block. Of these, 650 were fat cattle and 200 were feeders and stockers. These cattle were consigned to the Showcase Cattle Sale, arranged especially for the contest.

"They are fine, grain-fed cattle, but nothing extraordinary," commented Ron Ball, last year's world champion. "You can't have anything exceptional because you want to test the auctioneer's real ability to sell cattle, not just prize winners."

Ball, from Brush, Colo., held the coveted title for the past year. He says it helped to stimulate sales and acted as free advertising and publicity. And, just as in any other tile, the holder's value goes up in the eyes of those purchasing his services. But, mostly, it is just the great honor involved that makes it such a desired title.

One exceptionally exciting event Ball took part in due to his title was the International Stock Show in Chicago where he sold the Grand Champion. That event was part of a 30-minute TV program.

This year's contest at New Holland was also being taped for television - German television. Werner Herzog, academy award nominee and winner at the Cannes Film Festival, taped the whole event. It will be aired in about four months and will hopefully be available to American audiences.

Three camera crews were on hand to capture the whole event. Herzog wants to dipict auctioneering as a form of poetry, as a dying American tradition, and as a tie to the old country. The German crew had seen an auction in Colorado where they had created the idea for the film.

Of the three crews, only one photographer Ed Lachman, was an American. He has also won an Emmy and an academy award nomination for his work. He is now doing a feature film of his won entitled "Trapped."

After the auction, all contestants headed to Hershey Motor Lodge and Convention Center by bus or by car where the winners were announced at an awards banquet. Steve Liptay, of Bowmanville, Ont., Canada, was the World Champion. Reserve champion was Ralph Waite of Miami, Okla., and Leon Wallace, West Monroe, La., was runnerup.

The regional winners were: Eastern Region, Marvin Alexander, Siler City, N.C., regional champion; Bobby Russell, Canton Miss., regional reserve champion, and Phil Tuck, Cedartown, Ga., regional runner up; Central Region Armon Wolff, Golden Valley, N.D., regional champion, Alan Drake, Houston, Tex., regional reserve champion, and Bill Zobel, Creighton, Neb., regional runner-up; Western Region, Chuck Cumberlin, Brush, Colo., regional champion, Jim Odle, Brush, Colo., regional reserve champion, and Ken Younglund, Miles City, Mont.

Religious heritage music festival

LITITZ, Pa. - The Lititz Bicentennial Choir will present an evening of choir and instrumental music, narrated to highlight the area's religious music heritage. The program will be presented on Sunday evening, July 4th, at 7 p.m. in the Lititz Springs Park or, in event of rain, in the Warwick High School auditorium.

The choir is composed of more than 140 singers from the churches of the Lititz area led by Mrs. Julia Keehn and Mrs. Virginia Burkey. The choir will be accompanied by Mrs. Donna Burkholder and Mrs. Grace Fulweiler at the piano and organ and by a Trombone Choir directed by John H. Yerger. A narration by Dr. Byron Horne will identify the selections and relate them to the establishment of the various churches in the area. There will be no admission charge.

The program should be over in time for you to attend the Pageant of Light and Sound at 9:00 p.m. in the Moravian Church Square.

Lincoln 4-H Sewing Club names leaders

The Lincoln 4-H Sewing Club is divided into six categories with the following leaders. Mrs. Miriam Moore, Mrs. Molly Royer, and Mrs. Shirley Martin help the "Start Stitching" girls, who are the beginning sewers. The second year group, "Making a Skirt," is led by Mrs. Judy Leaman.

Miss Debra Myers and Miss Pat Hetrick lead the third year group, "A School Outfit," and the "Wool" and "Freelance" groups are both led by Mrs. Nancy Good.

IFYE candidate

Raelene Harbold prepares for Pakistan

By SALLY BAIR
Feature Writer

Raelene Harbold, Elizabethtown R4, is busily preparing for an international experience which will take her halfway around the world to Pakistan where she will live and work with rural families for four months.

She was selected as one of five Pennsylvanians who will participate in this year's International 4-H Youth Exchange (IFYE). Although accepted in the program last winter, she just recently found out her country assignment and is now trying to learn all she can about the country and the people before her August 15 departure date.

A 1972 graduate of Elizabethtown High School, Raelene resigned from her job as dental assistant to Dr. Werner Z. Fetter in early June and is now preparing herself for the trip.

She decided to apply to be an IFYE when she felt she had reached a point "where I really needed a change. I look at this opportunity as a step to getting back into the agriculture field."

Raelene, the daughter of Mr. and Mrs. Ray Harbold, Elizabethtown, was raised on a dairy farm and spent ten active years as a 4-H'er in Lancaster County. The IFYE program is sponsored by the National 4-H Foundation in Washington, D.C.

"The IFYE program appealed to me because it is a once-in-a-lifetime opportunity and if I'm going to do something like this I should do it now. Most people do not have the chance to travel like this. If you wait for 'someday' most likely you don't get it done," she said.

Raelene said she is especially looking forward to meeting the seven IFYE's who will travel to Pakistan with her. They come from all over the United States. "It's seems funny to go abroad and not have traveled the United States, but this will be one way of learning about our country."

Raelene demonstrated some of the knowledge she has acquired about her host country. Pakistan is about the size of California and has 70 million people, 96 percent of whom are of the Muslim religion. The official language is Urdu, with English the second language. But, she says, there are five other languages used. Right now, she's wondering where she might find an Urdu language book.

When she first applied for the program she said, "I was thinking of going to Europe, but the more I thought about it the more I realized that Europe is really not much different. So I prepared myself to get a different assignment."

"Going to this part of the world I will probably learn a lot more. It will be quite different than if I went to a more familiar country. I'm really looking forward to it." She added thoughtfully, "A more similar country would not have challenged me as much. And I'm sure it will help me appreciate more what we have here."

Pakistan is really halfway around the world, as Raelene points out on the globe.

Another aspect of the IFYE program she finds appealing is that she will actually live with families in Pakistan. She said, "I will learn to know what the country is like rather than traveling as a tourist. I will get to see areas quite different from what a tourist sees."

The National 4-H Foundation has sent her information and reading lists about the country and things to help her learn about this country and herself, and to adjust to cultural differences. She said that even though she isn't much interested in politics, she's trying to keep up with election news, since the election will take place while she's there.

She has learned that the chief products in Pakistan are rice, wheat, and cotton. "People eat a lot of rice in rural areas - I guess I will get used to it."

Raelene feels confident that meeting the families will not be a big problem. In 4-H she participated on the dairy judging team and traveled to the national contest in Ohio where she

Nutrena Controlled Release CLS — so different, it's patented

Your cattle will like Nutrena Controlled Release CLS and you'll like the benefits behind this new development in liquid supplements. The patented process controls the release of protein-building ammonia nitrogen in the rumen compared with a conventional urea-based liquid supplement. This improves the feeding efficiency of the urea. And, the slow-down means an extra margin of safety from urea toxicity—that's important when self-feeding liquid supplement.

Nutrena Controlled Release CLS liquid supplement—a product of Cargill research. It's great for dairy herds as well as beef cattle on range, pasture, stalks, stubble or in the feedlot.

Raelene Harbold

[Continued from Page 61]

was second in the nation in giving oral reasons for her placings. Consequently she has the ability to express herself with confidence.

Raelene was also a Lancaster County Dairy Princess in 1973 and second runner-up in the state, so she feels that experience will be helpful as an IFYE. "I feel the dairy princess program taught me to be able to handle myself in public and go places where I didn't know anyone," she said.

Raelene is an advisor to the youth group at the Congregational Bible Church in Marietta and is presently teaching bible school. She said her pastor has given her the names of some missionairies to Pakistan who are now home in Massachusetts. Raelene has written to them with many of her questions about customs and dress.

She points out that this is the first exchange with Pakistan in many years so there are no IFYE's from last year to correspond with to get up-to-date information.

Although she doesn't yet know how many families she will have, Raelene is taking pictures of her family and surroundings here to help show her host families how she lives. She is also busily embroidering gifts to give them for their hospitality.

Another required preparation is somewhat painful - to travel to Pakistan Raelene needs to get ten shots, ranging from cholera, yellow fever and malaria to the more common tetanus.

In 1976 there will be 76 young people participating in the IFYE program nationally and 76 exchangees living with families in this country. Each participant from this country must provide the first $1450 of the average $3950 required for each two-way exchange. In Lancaster County a committee is soliciting the funds from 4-H groups, Farm Women, agriculture organizations, service and civic clubs, and local business and industry. Donations may be sent to Treasurer David Lapp, 392 Myer Terrace, Leola, 17540.

Raelene says she feels an exchange program such as this "gives us a better understanding of other countries and ourselves - we tend to take our life for granted. It is a great opportunity to experience rather than see on television. It helps us appreciate more what we have and we can be more sympathetic with others." She is already planning to share her experiences upon her return.

What are her friends reactions to this journey around the world? Raelene said with a laugh, "They are either very much for it and say 'I wish I had that opportunity,' or they say, 'you're crazy to go that far from home.' "

None of these reactions bother Raelene however. She just laughs and says, "I think it's a really great opportunity. I'm greatly looking forward to it."

Her positive attitude is sure to help her win friends as she travels as a goodwill ambassador.

Paper cutting

[Continued from Page 57]

out of the design. Mrs. Hopf recommends an Iris surgical scissors which is not curved, but straight.

"You're only as good as your tool," she says.

When beginning to cut, take the inside tiny areas first, so there is more surface to work with.

To cut out the small areas, handle the scissors as though it were a needle . . . Wiggle it through at the center of each area to be cut out and work toward the outside traced lines.

The last step is to cut out the edge.

As in all crafts, there is a trick to making the scherenschnitte turn out "professionally." That trick is to cut with the tips of the scissors and to use good cutting habits.

If you have a spare minute and a love for pretty little things "just for fancy" try the inexpensive, but enjoyable hobby of scherenschnitte.

Read the Farm Women Calendar.

Milk production up

HARRISBURG - Milk production in Pennsylvania during May totaled 696 million pounds, up four per cent from a year earlier according to the Crop Reporting Service.

The number of milk cows in the Commonwealth during May was 707-000 head, up 4000 from a year earlier.

Milk production per cow averaged 985 pounds in May, up 30 pounds from last year. United States milk production during May totaled 11,184 million pounds, up three per cent from a year earlier. U.S. production per cow averaged 1011 pounds, a record high, up 43 pounds from a year ago and 4 pounds above May 1974. Milk cows on farms totaled 11,061,000 head, down one percent from a year ago and one percent below May 1974.

Ears tuned to U.S. corn crop

SHINGTON, D.C. - "On 30 and July 12, world ion from such diverse ls as Tokyo, Brussels, London, New Delhi ost certainly Moscow ocus on Washington. ill not be because the States plans to make foreign policy an- ements on those dates - st none of which I am aware," said Asst. Secretary of Agriculture, Richard Bell, recently.

"But rather, the focus will be on the Crop Reporting Board of the U.S. Department of Agriculture," he continued. "On June 30, the Board will issue its first reports on the acreage of corn planted in the United States this year. On July 12, the Board will issue its first official forecast of the 1976 U.S. corn crop.

"Corn has always been the dominant crop in the United States, and during the past several years U.S. corn has also become extremely important to many people living elsewhere in the world.

"The United States will export a record 42 million metric tons - 1.65 billion bushels - of corn during the current 1975-76 corn marketing year ending next September 30. This will be equivalent to nearly 30 per cent of the record 1975 U.S. corn crop. As a result of the record exports and a 12.5 million metric ton increase in domestic use of corn, the entire 1975 record U.S. corn crop will be utilized during the 1975-76 marketing year.

'We will export about one-third more corn in 1975-76 than we will wheat. Few people are aware of the fact, but this will be the fifth successive year in which the United States has exported more corn than wheat. U.S. wheat and flour exports in 1975-76 are expected to be nearly 33 million metric tons or about 1.2 billion bushels.

"The value of U.S. corn exports in 1975-76 - currently estimated at $5 billion - will be about the same as the value of our wheat exports and will exceed the export value of our soybeans and soybean products. Together, the export value of our grains and oilseeds and oilseed products amounts to nearly $15 billion a year.

"These three commodities - corn, wheat and soybeans - are three of the United States' greatest foreign exchange earners. The foreign exchange they earn is used to purchase the imports - petroleum, television sets, cameras, small foreign cars, minerals and other raw materials and manufactures - which permit our high standard of living in the United States.

"When it comes to producing and exporting corn, the United States has no peer. We account for about 45 per cent of the world's corn production and over 70 per cent of its corn exports.

"Last year's record U.S. corn crop of 5.8 billion bushels was equivalent to 146 million metric tons. World corn production in the 1975-76 marketing year was about 319 million metric tons.

"About 58 million metric tons of corn will enter international trade during the 1975-76 marketing year and 42 million tons of it will be from the United States. U.S. corn exports will account for about one-fourth of world trade in all grain - wheat and coarse grains - in 1975-76.

Peach crop way down

ANNAPOLIS - Maryland's 1976 peach crop is estimated to be some 13 million pounds according to the Crop Reporting Service a cooperating agency with the State Department of Agriculture.

The crop, which was badly damaged by freezing weather in April and May and hail storms in late May and June, will be some 10 million pounds under the 1975 harvest of 23 million pounds. This would make it the smallest since 1972 and the fourth smallest since 1944.

Condition of the crop was surveyed June 1st by the Crop Reporting Service in preparing this year's forecast.

Normally, Maryland's peach crop runs approximately 22 million pounds. Production figures for recent years are: 1975-23 million pounds; 1974 - 22 million pounds; 1973 - 15 million pounds; 1972 - 12½ million pounds; 1971 - 23 million pounds; 1970 - 23 million pounds; 1969 - 22 million pounds.

National FFA president advises:

Have a dream, always pursue it

By DIETER KRIEG
UNIVERSITY PARK

Bobby Tucker, a 21-year old agribusinessman from Texas, stunned the audience he addressed Wednesday night at the new University Auditorium, here. Appearing very much at ease when he took the microphone into his hands, and speaking with a typical Texas rapidity, he drew the crowd closer to him with a succession of amusing stories. He appeared like a pro would before TV cameras.

Then he offered a rapid-fire pep talk, which was probably very similar to other such speeches, and yet radically different. Towards the end he seemed emotionally strained, and many in the audience were near tears. Only minutes before they had laughed at his funny stoires.

When Bobby Tucker bade them farewell for the evening, the full house of people jumped out of their chairs to give the young man a rousing standing ovation.

"Make up your mind to act; exhaust every opportunity; never give up!" the Texan exclaimed. He noted that too often the people who do the most complaining about anything are those who don't care enough to step into the ring to try and change things. Whether it's in personal life, the community, or even larger spheres, Tucker challenged the more than 1500 people before him to become more involved. "Do your part," he said, "we never know how far we can go until we try."

"Have a dream and enough guts to stay in there fighting," he continued. To dramatize his message he cited the failures and faults of Peggy Fleming, who went on to become a world champion figure skater. But the pretty girl on skates was too far away both physically and in listeners' minds, to pin the message onto everyone's ear. Tucker continued his talk by reciting one failure after another in the life of a person whom he knew well and was right on stage!

"If there's anyone here who knows what it's like to fall flat on his face ... I know what it's like," he said, surprising the audience abruptly. He noted that he had suffered many defeats but he wouldn't trade anything for the failures he faced and told the group:

Bobby Tucker

"You are a winner as long as you're in there fighting."

The young man found the going a bit difficult as he continued with his message, informing the group that his father was facing a serious battle with cancer. Inspired by the words and actions of his father, Tucker announced emotionally that "things aren't always as bad as they seem."

"As long as there's someone who thinks you can ... go ahead," he said. "Have the courage to reach for a dream ... the courage to fight for it ... and the courage to stay in there fighting. When you're in there fighting, you're not a loser - and never lose track of your goals," he said.

Tucker's dream in life was to move up in the ranks of the FFA. He claimed he had been a nobody - a loser - one who placed near or at the bottom of every competitive event he entered. But he said he kept sight of his ambitions.

The young Texan said he once entered a public speaking contest and finished eighth out of nine

xxx

The man in the upstairs apartment yelled to the man downstairs: "If you don't stop playing that clarinet, I'll go crazy."

"Too late now," the other fellow yelled back. "I stopped playing an hour ago!"

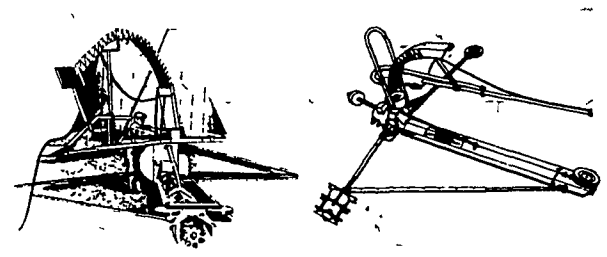
contestants. More recently he placed third in the national FFA public speaking contest and was noted the organization's president last November.

Tucker was on the Penn State University campus to take part in the 48th annual summer convention of the Pennsylvania FFA. More than 1800 FFA students from all over the state took part in FFA Week here and entered more than 20 competitive events.

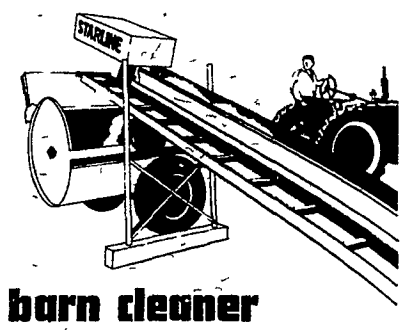
AGWAY



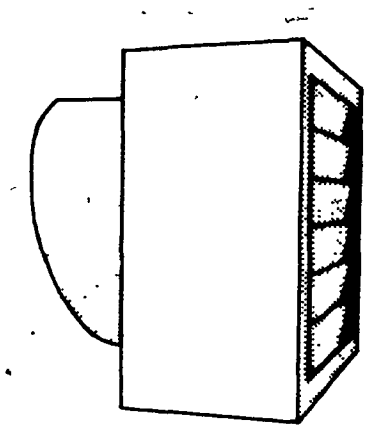
Match performance to capacity
Starline Silo Unloaders

MODEL 101
—for big silos
• Ideal for 20'-30' diameter silos
• 30" impeller throws down tons of silage per hour
• Self-aligning discharge chute

MODEL 70
• For 14'-20' diameter silos
• Delivers up to 30 bushels of corn silage in three minutes
• Frees even frozen silage



Starline barn cleaner
• Saves up to 1/3 the power over conventional systems
• No load starting, gear-box free drive and other friction-cutting devices
• Unique, money-saving installation ideas keep down initial costs



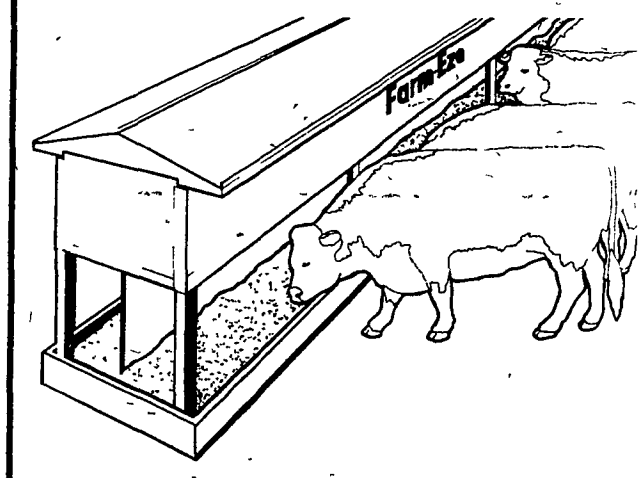
fresh air for all seasons... these reasons:

1 Removes moisture, odors, gases and disease organisms
2 Keeps temperatures comfortable
3 Helps hold profitable performance

Agway variable speed ventilating fans can provide your barn set-up with just the right kind of fresh air most conducive to good animal production. Constantly fresh air with no drafts, no sudden gusts, no sudden starts or stops in air circulation. Variable speed control fans come in 20 or 24" blade sizes with capacities up to 3840 cmf at .05" SP.

Agway can design and install a variable speed fan system to deliver maximum cow comfort helping protect herd health and your profits.

Check Agway for more details.



Faster feeding, less work, better profits!

Farm-Eze conveyor bunk feeder

There's a Farm-Eze Feeder just right for your operation, and it's so quiet, safe and simple-to-operate, you'll wonder how you ever got along without it! Get a minimum of 250 pounds of feed per minute. The exclusive Farm-Eze plow provides an even feed distribution for each foot of bunk regardless of length. And the Farm-Eze comes in lengths to 165'. 1½ hp motor.

Ask Agway about designing a work-saving, time-saving Farm-Eze system for you.

Joyce and Leroy Bupp: they get involved

By JOANNE SPAHR

YORK - Joyce Bupp, Seven Valleys R2, could make farming look attractive to a Washington socialite. In no time she would probably have the lady feeding her calves in her "nursery" and talking about Agri-Women and the organization's importance to farming. Somehow, she could do it - she just has a certain something about her.

One admirer has said of Joyce, "She's just so full of life and vitality and vim and ... well, just about anything you can name."

A short meeting with her will verify that comment. She's a perky and petite little brownette with a pixyish curlie haircut and a twinkle in her eye, and she can charm her way around almost any situation. Fortunately for those involved in agriculture, she has put this energy and charm to work for farming.

Active in many, many organizations at the statewide and county levels, she does exclude some obvious womens' organizations for one reason.

"When I get into an organization, I make sure it actively supports farming and agribusiness. That's because men just don't have the time to get out there like we do, so women just have to take hold and do something about it," she explains.

Then, she adds, "This is why I think women in agriculture can be a real moving force."

She certainly is a moving force, herself. Joyce has a flair for public relations work, so many activities and offices within the various organizations are centered around this type of thing.

She's on the National Public Relations Committee for Agri-Women treasurer for the dairy princess fund for York Co., news reporter and advertising coordinator for the Holstein Association, and coordinator of "Dairy Princess Ponderings" in LANCASTER FARMING. She's also active in PFA, and on the county level, the York Co. Farmer's Association. This year she'll be helping with a mall display promoting agricultural products and "Farm Women on the Go."

The Bupps are a loving family who work together to keep the farm operation in tip-top shape.

"That's to exhibit hobbies and crafts that farm women do to show people we do more than get dirty feeding the cows and working in the fields," she says point blank.

Joyce hopes to display some of her wine that she makes as a hobby. She starts from scratch and makes black raspberry, red raspberry, peach, dandelion, elderberry, blackberry, and an assortment of others.

"I just decided one day that I was going to make wine and so I did," she announces with her typical vital and chipper attitude.

She also loves to garden. She has a large, bountiful garden which includes cauliflower, broccoli, corn and many, many other vegetables that she uses around home and, of course, cans and freezes for winter.

"This year I mulched everything because when Bible School starts and other activities come, the garden just gets away from me, and this year I don't think it's going to," she explained.

The only thing that could possibly get away from her in the garden is her vegetables - and her green thumb. She has a habit of letting this get away from her.

She giggles when she tells the story of a neighbor who brought a couple dozen cabbage plants down to his garden which is situated right beside hers. When she saw that he intended to plant all of them she couldn't help but remark that he was going to have cabbage coming out his ears. To this he replied that he always plants a lot and never gets good results.

"So, I decided he was going to have cabbage this year," she says.

"I got out there and watered the plants and fed them plant food, and now he has so much cabbage that he doesn't know where to go with it," she chuckles as he walks past with baskets full of huge cabbage heads.

As she says, there are a few things that take her away from her garden. Teaching Vacation Bible School can do it. This year, however, she is only teaching part-time for the first time. Besides teaching Bible School, she is a church councilman at St. Paul Lutheran Church at Glen Rock, where she also types out the church bulletin.

When she's not working with children at bible school, she is having them out to her

Lebanon DHIA MONTHLY REPORT

The high herd in Lebanon County's DHIA program for May was Edwin Funck's. His 38 Holsteins produced an average of 61.2 pounds of milk and 2.25 pounds of butterfat per day per cow.

The top cow for the month was Willow Maple Farm's "Lillian," a six-year old Holstein which took first place in both milk (24,899 pounds) and butterfat (930 pounds).

Crouse cow cited

BRATTLEBORO, Vt. - A registered Holstein cow owned by Galen W. Crouse, Stevens, Pennsylvania, has completed a production record exceeding 30,000 pounds of milk according to the Holstein-Friesian Association of America.

D-T-Y Vigo Charmcross Dancer 7569384-VG, who started her record at the age of five years, two months, produced a total of 30,092 pounds of milk and 1,225 pounds of butterfat in 365 days on a twice daily milking schedule. This is more than three times the average milk production.

"Dancer" was bred in the herd of David T. Yoder, Belleville, Pennsylvania. She was sired by Vigo Charmcross 1504414-EX.

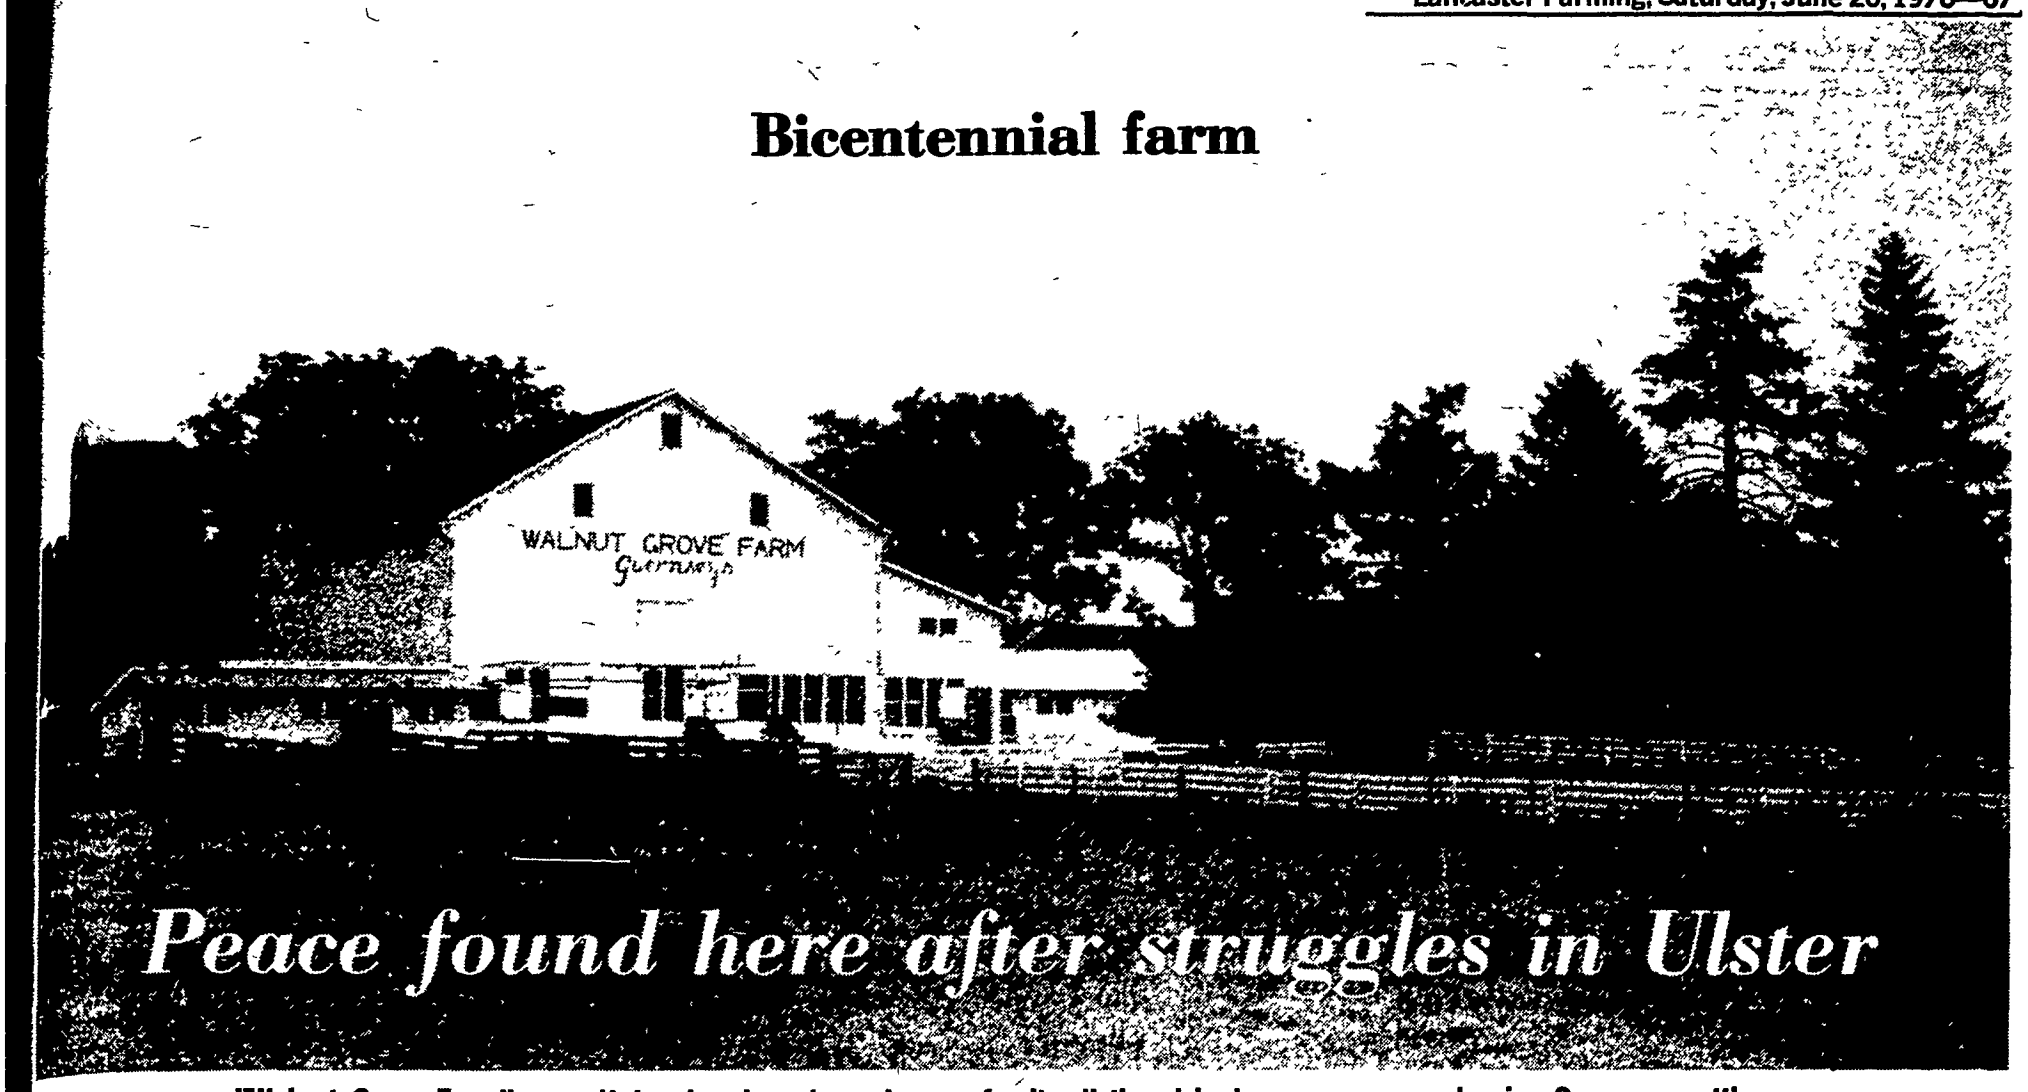
Bicentennial farm



Peace found here after struggles in Ulster

"Walnut Grove Farm" near Union has long been known for its distinguished appearance and prize Guernsey cattle.

EDITOR'S NOTE: During this Bicentennial Year, LANASTER FARMING is recognizing and saluting farms in uth-central and southeastern Pa. which have been in the me family for 100 or more years. This is the 17th such rticle in a continuing series.

By DIETER KRIEG

UNION — The story is told that Alexander Morrison left his tive Northern Ireland (Ulster) due to religious perecutions, wars, and killings. Both of his parents reportedly st their lives in the struggle.

When authorities came after him too, young Alexander abbed a pitchfork and hurled his assailants across a stone wall. Then he fled to America and settled in southern Lancaster County.

Meanwhile, during approximately the same time span (early 1800's), another young man from Northern Ireland was running into difficulty because his marriage wasn't approved. He and his bride came to America and thus started the Ferguson family in southern Lancaster County.

Both the Morrison and Ferguson names were dominant in the area at one time, says Hervey Ferguson, a descendant of both families, but they're just about all gone now.

Hervey Ferguson and his wife, the former Bertha Foulk, live on a beautiful 212 acre farm near here, a part of which was originally purchased by Alexander Morrison in 1829. He purchased 99 acres for $750. A year later he built a magnificent, large, brick home at a cost of just $1500. The bricks were made in kilns right on the farm and timber came from trees on the property. Now, more than a century later, the lawn is dotted with numerous flower beds and stately trees and a handsome white board fence outlines the immediate area. "Walnut Grove Farm" is painted in big letters across one end of a huge white barn.

For the past nearly 70 years the farm has been known for more than its serene setting and immaculate condition. Some of the finest cows of the Guernsey breed once made their home here, and the Fergusons are still enthusiastic followers of Guernsey tradition. Although they sold their milking herd

[Continued on Page 68]

NEVER FORGET THE INDIVIDUAL NEEDS OF THE LAYING HEN

The Purina Laying Chow Bio-Rating gives the relative fortification of amino acid, vitamins and minerals. Bio Layena 100 is the base product. For example, Bio Layena 114 contains 7 percent more fortification than Bio Layena 107 and 14 percent more than Bio Layena 100. Each of the above feed intake ranges represent approximately 7 percent less feed consumption than the previous range. Thus a drop of 7 percent in feed intake (approximately 1½ pounds per 100 hens per day) is compensated for by an increase of 7 percent in ration fortification. In this way daily intake of amino acids, vitamins and minerals remain constant. The correct level of fortification is exactly matched to the hen's feed intakes. If during stress conditions a more highly fortified ration is desired, just choose the amount of extra fortification by checking the Bio-Rating of each Purina Laying Chow.

PURINA BIO-RATED LAYING CHOWS

Product	Feed Intake Range Fed Lbs./100 Hens/Day
Bio Layena 100	Over 25.0
Bio Layena 107	23.4 to 25.0
Bio Layena 114	21 7 to 23.3
Bio Layena 121	20.0 to 21.6
Bio Layena 128	Under 20.0

PURINA CHOWS®

The Purina studies have not relied just on chemical analyses of feedstuffs to determine their nutrient content. Rather with the Bio-4 Laying Chows an extensive new approach has been taken to determine biological availability of such nutrients. The Bio-4 Chows rely upon specific biological tests to be sure the amino acids, energy, vitamins and minerals in a feedstuff are available for use by the hen or chick. This type of formulation gives use to rations that are highly efficient yet maximize shell quality, egg size, egg production and feed efficiency.

Guernsey cattle have been the business, pride, and joy at "Walnut Grove Farm" since 1907. Mr. and Mrs. Ferguson sold their milking herd last Fall, but kept 60 heifers, a few of which they're examining here.

Bicentennial farm

[Continued from Page 67]

last Fall, they have 60 heifers and are going back into the dairy business.

The Guernsey herd was started in 1907 by Ferguson's father, Roy H., a charter member of the Lancaster County Guernsey Club. Prior to the decision to go for an all Guernsey herd, the family had a mixed assortment of several breeds and crossbreds.

Guernseys were the cows to have, Ferguson explained, because of the butter their milk yielded. The market of the time emphasized butter, not milk. According to Ferguson, the breed first got a strong foothold in the Philadelphia area where wealthy families had them for status symbols and tax benefits, besides making butter.

The Guernsey herd at Walnut Grove started with two heifers, and a bull who was a full brother to "one of the greatest cows in the Guernsey breed," Ferguson said with a note of pride in his voice. She was "Nella Jay 4th," who had a phenomenal record of 20,709 pounds of milk and 1019 pounds of fat to her credit. "Mention 'Nella Jay' and the prices at sales would go way up," Ferguson commented.

Disaster struck in 1930 when the entire herd — by now very much "on the map" in Guernsey circles — was wiped out by Bang's disease. They started up again, and by 1933 had acquired a top bull from Florham Farm whose dam was the first two-year old of the breed to check in with more than 900 pounds of butterfat in one lactation. Some of his daughters in the Ferguson herd milked 60 pounds of milk per day, which was quite remarkable at the time.

The Fergusons shipped what was known as "A" milk approximately 50 years ago. It had to be at the Oxford railroad station by 6 a.m., which meant that the dairyman had to get up mighty early in the morning to meet the train on time. The cans were hauled to Oxford on a wagon which was fitted with an old automobile windshield for some protection from inclement weather.

Although Guernseys have dominated Walnut Grove Farm in more recent years, Ferguson's father also had a sizable apiary and chicken business on the place. Not one to be left behind by advancing technologies, the elder Ferguson was

Grange airs environmental views

HARRISBURG - The Pennsylvania State Grange this week called for inclusion of the Agriculture Department in a study and review of a proposed Master Environmental Plan for Pennsylvania.

Testifying at a hearing before the Pennsylvania Environmental Quality Board, Charles E. Wismer, Jr., Grange legislative committee chairman, stated that the section of the proposed plan on prime farmlands "should be directed to the Department of Agriculture and it (the Department) should be responsible to study the problems and suggest policies for the implementation of a program.

"If other additional critical areas mentioned in the proposed plan have an effect on agriculture, then the Department of Agriculture should be involved in helping to determine policies."

In addition to prime farmlands, critical environmental areas mentioned in the master plan are: Watersheds with high quality streams, fllood plains, coal resources, areas with limited water supply, clean air resourve areas, open space in metropolitan areas, and geologic areas with development restraints.

Wismer also stated that the Grange favors legislation pending in the General Assembly (House Bill 2406) which would prohibit the Department of Environmental Resources from adopting rules or regulations regarding air contaminants and air pollution that would interfere with the normal production of agricultural commodities.

He also recommended that agriculture be accorded priority in the use of water for irrigation as the need arises.

Following the hearing, J. Luther Snyder, State Grange master, pointed out that the proposed Environmental Master Plan states that "human survival, the survival of all other living things, and the general well-being of society depend upon the health and maintenance of the natural environment, clean air, pure water and the protection of the complex ecological relationships."

Snyder said the statement falls short of a realistic and practical goal for a sound environment by failing to recognize food as necessary for survival, along with clean air and pure water.

"It is necessary to recognize that the three basic needs of man are clean air, pure water, and sufficient food for good health and sound bodies," he stated. "In our zeal to protect any one of these, we must be careful not to harm or destroy another. We must keep all three in balance if man, and other living things, are to survive," he added.

Embargo lifted

HARRISBURG - Pennsylvania Agriculture Secretary Raymond J. Kerstetter recently signed a notice rescinding the Commonwealth's embargoes that restricted imports of swine from areas in Massachusetts, New Hampshire, New Jersey and Rhode Island that were quarantined for hog cholera.

The notice states that "all embargoes and embargo modifications" against these four states "concerning the movement of swine from those areas, as the result of the presence of the disease hog cholera, are hereby revoked."

Pennsylvania's action follows the removal of federal quarantines in the four states, the latest being June 7 in New Hampshire. "No areas in the continental United States remain under quarantine for hog cholera," Kerstetter pointed out in his notice.

Take the lid off your milk production

It takes more than just a protein number to supplement your silage or hay - unless you want your feed to keep milk production as much as 20% under what it could be. Nutritional shortages can prevent your cows from ever milking up to their bred-in potential.

Now there's a proven way out. Whether your milk production level is 12,000, 15,000 or even 19,000 lbs. per cow, you can expect Wayne Maximizer™ nutrition to boost production as much as 20%. It has taken the lid off milk production in herds just like yours.

Maximizer assures a balance of six nutritional factors - protein, energy, fiber, calcium, phosphorus and magnesium.

It starts with your roughage - having it analyzed so you know what it provides and what it lacks. Then you look at your herd and its current production . . . and at the new production level you want.

Next, your Wayne Feed representative goes to the Wayne line of dairy supplement - from the Dari-Blens to the complete Wayne dairy feeds, whichever fit your situation - to build the required nutritional balance and level to take the lid off your milk production.

WAYNE Sweet 18% Krunch . . . the economical, convenient dairy feed

Wayne Sweet 18% Krunch was designed to properly balance roughage feeding of corn silage at high intake levels.

The low energy of Wayne Sweet 18% Krunch compensates for the high energy in excellent quality corn silage.

And, Sweet 18%'s high fiber balances the low fiber level found in corn silage.

Wayne Sweet 18% Krunch . . . economical, convenient and designed with your corn silage in mind. Ask your Wayne Feeds dealer about it today.

'Johnsongrass Week' held

FREDERICK - Frederick County, rich in Maryland's agricultural history, is going to record another first for the state. The County Commissioners declared the week of June 21st, "Frederick County Johnsongrass Week."

Aim of the week, which featured a kickoff luncheon, various displays and programs at local civic clubs, was to spread the word that johnsongrass is a major agricultural pest and needs to be attacked and controlled.

Spearheading Johnsongrass Week activities was Michael Irons of Buckeystown, the County's fulltime johnsongrass control officer. Irons has been with the County's program since it was established three years ago in cooperation with the Maryland Deparment of Agriculture's Weed Control Section.

Johsongrass, one of America's pest imports, is a tall growing grass which spreads quickly by seed and by underground rhizomes. It is illegal in Maryland to allow it to set seed or to transport it.

It grows so thickly that it can completely chok food and grain crops ro them of water, nutrient light. It also can jam vesting equipment Frederick County acres of tillable land infested and Irons an County Johnsong Control Committee ha active program to ed farmers and landow about means, and the for control. Irons als dertakes spraying property owners who re the service.

Bicentennial farm

(Continued from Page 68)

irst farmer in the County to erect a wooden silo in 1915 measured 11 feet in diameter and 30 feet high.
ign of the more progressive farms of the time was the ouse, in which ice was stored for more than six months.

The facility on the Ferguson farm was underground, measuring 14 feet square at the bottom and nearly 16 feet deep. "We'd start at daylight to haul ice off the pond, and it would take all day to fill it," Ferguson recalled. Normally the men would wait until the pond was frozen over to a depth of four to six inches, after which the ice was cut into blocks with saws, and hauled out by horses. After being chopped down to more manageable sizes, the chunks of ice were loaded on wagons and hauled to the "ice house," which was really nothing more than a hole in the ground with a roof over it.

When finished, the men covered the ice with straw. That insulated the contents enough to stay frozen until July. "We could have had enough ice to last all summer," commented Ferguson about the then modern method for cooling farm products, "but we would have had to have a larger ice house." Prior to this innovation, milk and other products were simply cooled by spring water. Once the ice was used up, farmers had to buy ice in town.

Other signs of the times at the Ferguson farm were an old wooden windmill which was used to pump water prior to 1930, close to 1½ miles of "worm fences" and a woodpile which was 60 feet long. The fences and woodpile kept men and boys busy if there was nothing else to do.

The "worm fences," had a tendency to blow over whenever a storm swept through the area, according to Ferguson, and he used to hate the thought of having to go after stray cows and erecting fences. They were later replaced by the post and rail variety. After that came woven wire fencing and today it's barbed wire and attractive board fences.

Another recollection the Fergusons have concerns schooling. They report that "everybody went to a private school until the early 1900's. Pupils started at age seven and stayed in for up to 10 years. Ferguson, who is a Penn State graduate with a degree in agricultural economics, noted that there were eight to 10 one-room school houses in Colerain Township when he was a boy, and yet only seven members in his 11th grade graduating class at Kirkwood. He spent his senior year at Quarryville. During those years (the 1930's) it was also required that students pass entrance exams before going on to high school.

Reflecting on his family's past, and pondering about present developments, Ferguson says work was a lot harder a generation ago and longer. He can remember filling three barns full with loose hay right up to the roof, for example, and adds that the practice was still common prior to World War II.

"You can't get rich farming," he concluded, "it's just a way to make a living. It's inflation of land values which make farms worth so much." He also noted that the struggle in Northern Ireland which gave cause to his ancestors' hasty departure is still going on.

Mr. and Mrs. Hervey Ferguson and friend.

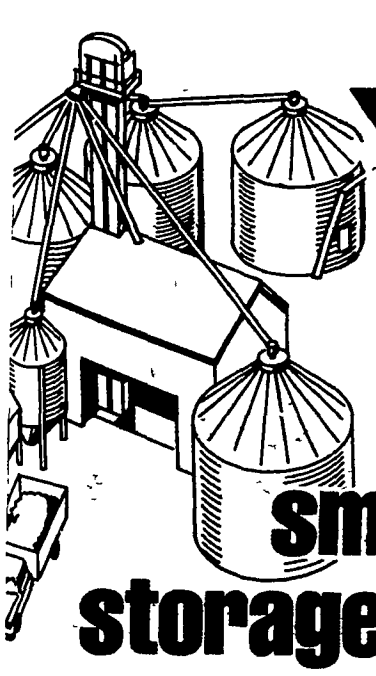
Greek heads R. L. team

UNIVERSITY PARK - Leonard Greek, a student at Red Lion High School, York County, paced his school's dairy cattle judging team to second place in the state during FFA Week, held here recently on the Penn State University campus. He was incorrectly identified in a picture appearing on page 31 of last week's issue of Lancaster Farming. The Red Lion student, who was coached by vo-ag instructor, Clyde Myers, placed eighth in a group of 220.

NOW is the time to PLAN, Budget and Select YOUR STORAGE, DRYING and HANDLING SYSTEM.



BAZOOKA® Feed/Grain Movers

give you a long lasting, smooth running storage system.

Bazooka augers offer a wide range of capacity, choice of drives and accessories for automated grain and feed handling. These matched components make a system that can be expanded. You can be sure the system we design and install will move your grain or feed smoothly, safely . . . and for a long, long time.

In addition to Bazooka Portable augers, we can furnish high-capacity 10" unloading systems for bins to 48 ft. diameter and the new Model GC 101 GRAINCLEAN'R (scalper with cleaner and built-in fines collector). Call for literature and prices.

GRAINCLEAN'R T.M.

BAZOOKA® Model GC101

- Scalps and cleans corn, milo, soybeans, wheat or rice to improve grade and storability
- Fully enclosed to prevent flying chaff, help control dust and give weather protection
- 56 sq. ft. of screen can remove 80% of fines in dry corn at 500 bu/hr . . . up to 2000 bu/hr capacity
- Can be equipped with trailer undercarrige, tow bar and 6" or 8" fill auger which swivels beyond 180° and rides on top of cleaner during transport

4-Hers take part in Leadership Congress

York and Berks County 4-H members learned specialized leadership skills and participated in Bicentennial programs when they took part in Pennsylvania 4-H Leadership Congress, June 21-24, on the Pennsylvania State University main campus.

The two county delegation's joined with approximately 1300 other 4-H members from all counties in the Commonwealth to share and contribute ideas which will improve local community programs. At 4-H Congress, they took part in assemblies, discussion and interest groups, and recreational activities.

Members from York Co. participating in 4-H Congress were: Linda Brown, Laurie Dobrosky, Helen Marsteller, Jonathan Myers, Kay Swartz, David Warner, Bonnie Wire, Tommy Welsh, Linda Ebaugh, Tim Eisenhart, Christy Waltersdorff, Karen Hemminger, John Mummert, Terri Lehigh, Paul Myers, III, Sue Schneider, Tim Beck, Marvin Krone, and Kerry Zinn.

The Berks Co. delegates were:

Club Congress; Marie Adam, Demetra Blaine, Lisa Breininger, Darlene Dietrich, Sharon Everhart, Mark Folk, Linda Fryer, Donald Lengel, Judy Malsbury, Randy Moyer, Todd Moyer, Tina Neufeld, Wanda Oswald, Brenda Procopis, Debbie Richards, Sonia Rivera, Karen Sattazahn, Shawn Scheidt, Alane Seiler, Lisa Spatz, Lori Spigelmyer, Nadine Stoudt, Christine Vos, Lorrie Wesner, and Glenn Yanos.

Leadership School; Kathy Hoffman, Karen Kniss, and Janis Malsbury.

Street Camping; Diane Evans, Carol Hartman, John Keim, Melody Kohler, Kim Oswald, Susan Prydybasz, Lynda Reppert, and Steve Zettle.

Report to the State; Jackie Henne.

Adult Leaders Forum; Mrs. Mirta Althouse, Mrs. Stella Richards, and Mrs. Lucille Stoudt.

David Schuler and Mary Schuler of Fleetwood Berks Co., also attended the Congress as Leadership Council representatives, supervising program activities along with 58 other selected 4-H members throughout the state.

Another Berks county 4-H member, Herman Manbeck of Womelsdorf served as a Leadership School Advisor.

The Leadership Council delegates and Leadership School advisors arrived on the Penn State Campus on June 18 for two days of counseling and orientation to prepare them for their duties for the remainder of the week.

They get involved

(Continued from Page 65)

farm to experience rural life. She has been written up in other newspapers for her work in this area.

She, alone, is a notable individual, but her story wouldn't be complete without Leroy Bupp, the farmer on whom she started using her charm in ninth grade and obviously hasn't quit to date. Together, the Bupp's have done a lot for agriculture and dairy farming in particular.

For three weeks during July they will be traveling through five Western European countries and Russia representing the United States with the Pennsylvania Agriculture Leaders Delegation. They will be seeing the farms in these countries while utilizing the foreign embassies.

When asked how they were chosen to be part of this tour, Joyce smiled and said nonchalantly, "Gee, I really don't know how we got picked. We just got a letter one day."

A little delving into the past, however, opens the door to understanding why the Bupp's name came up on the list.

It all started back in 1966 when Leroy, a dedicated young FFA'er, received his American Farmer Degree from the FFA at Kansas City. This was just the start of a long string of awards, and equally important to Leroy, the beginning of many trips connected with farming.

"We've been sort of lucky when it comes to vacations," he says with a good-natured, easy grin.

That is an understatement. In 1967 the Bupps traveled to Washington and Va. to receive the National JayCees Outstanding Young Farmer Degree, then in 1968 they were off to Texas to attend a National Rural Electric Cooperator convention where they were named Outstanding Young Farm Couple.

They have also been to Florida where they represented the Maryland Milk Producers Cooperative. This was in 1971 when Leroy was Outstanding Young Cooperator.

In 1972 the Bupps received their last award from the Young Farmers Association of Pa. At that time Leroy was named Outstanding Young Farmer.

What's Leroy got that other people don't? Leroy would probably be the first to modestly say "nothing." But, statistically, he owns 300 head of cattle, with 55 milking cows on his own farm and 75 on one that he leases from a neighbor. At one time, his cattle had been 100 per cent registered, but he has gotten some grade cows mixed in with his purebreds and is working to build his herd up to all registered again. His rolling herd average is 14,700 pounds of milk and 579 pounds of butterfat. Leroy terms this "just a little better than average," but this concerns him very little. He really is concerned more with type and longevity than with herd average. His Breed Age Average, 103.7, is the statistic that is more satisfying to him. This places him tie for third in the county.

Leroy and Joyce also farm 250 acres of corn, 130 of hay, and 50 of oats, with some of the land in pasture. It must be noted that they don't do this alone. They have a full-time herdsman and a a beef and crop manager. Also, their son, Richard, age 4, is a big help.

"I help him combine," announces Richard with a huge smile and an air of importance that only a four-year-old can muster. Patty, age seven, helps, too, and will probably grow up to be another busy Bupp.

Leroy's farm-related activities are as many as Joyce's. This is his second year as county president of the Holstein Association, and is county sales representative for the organization. He is also president of the county DHIA, and is on the policy development committee of Pa. Farmers Association.

Between their farm, their organizations and their travels, the Bupps are busy people. And now in July they will be off for a three week tour of Europe and Russia, where together or alone they will be good representatives of Pa. farmers.

4-H camp has openings

FLEMINGTON, N.J. - The Hunterdon County 4-H office still has several opeings for campers for its six-day summer camp program, scheduled for July 21 through July 26. It will be conducted at the 600-acre Rugers 4-H Outdoor Education Center at Beemerville, in Sussex County.

The program is open to all boys and girls, ages 10 through 14, regardless of whether or not they are members of an organized 4-H club.

"Our policy in the past used to limit camp enrollment strictly to 4-H members", said Joe A. Buchel, County 4-H Agent. "However, we discovered that this camp experience provided a wonderful opportunity for non-4-H youngsters to meet new friends and see what 4-H is all about before taking that step to join a formalized 4-H club. Through educational workshops and physical exercise, 4-H summer camp is a week of intensified fun and learning," adds Buchel.

Another addition this year will be horses! Youngsters who ride are invited to bring along their horses to 4-H camp. A special program has been developed for them to improve their equine abilities. Newly-constructed stables at the 4-H camp will accommodate 80 animals.

The fee for campers for the full week is only $32 ($35 if you bring a horse). A $5 pre-registration deposit is due at the 4-H office by July 9. Applications and further information may be obtained from the county 4-H office, 782-5911.

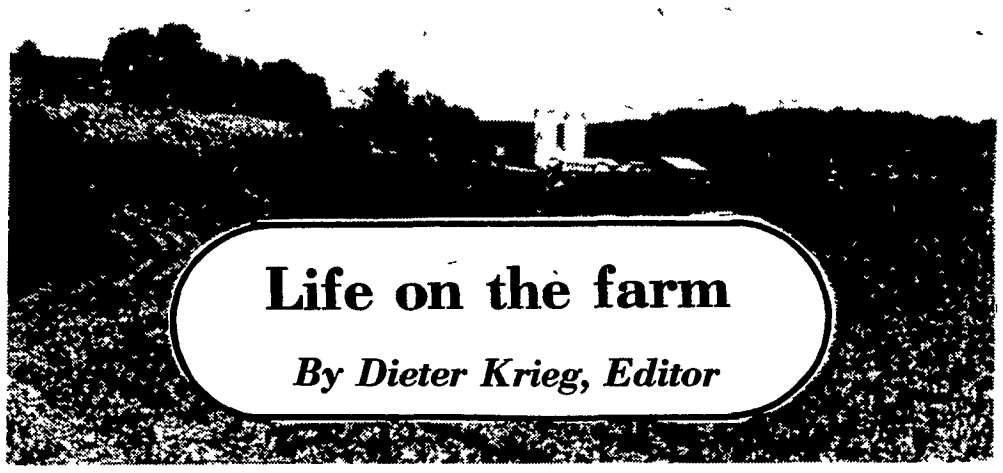
What's New

New Ring Drive Silo Unloader

P & D Mfg. Co., Inc., Plainfield, Ill. has recently introduced a new positive ring drive silo unloader which incorporates the popular features of their Golden Gobbler silo unloader line.

Highlighting the ring drive are dual augers, a positive mesh ring and drive sprocket supported with 3" channels. The unloader is suspended from a tripod by four supporting cables. Unloader does not depend on silage for traction. Also featured is the self-cleaning Golden Gobbler rotor housing assembly.



Life on the farm

By Dieter Krieg, Editor

Every morning — about the time that the first rays of the sun had sparked life into the birds in the trees, and the chickens began cackling and scratching — he was there.

Usually the dew was still hanging in small droplets on the leaves of his plants, and the air was cool and refreshing. This was the way he liked it. A retired coal miner, with a history of heart ailments, Mr. Baldwin, our neighbor, spent every morning in his garden.

He carefully weeded, hoed, and even inspected many of the plants — making sure that none had become infected with a disease or parasites. His efforts and devotion showed, too, because every year he had the nicest garden in the neighborhood. There wasn't a weed anywhere. Neat rows of peas, cabbages, onions, beans, carrots and most anything else stood erect and proud, as though they knew their master loved them. And probably they did.

Vegetables weren't all Mr. Baldwin grew in his garden on our farm. Along the edges and bordering the road were hundreds of flowers. These, too, were taken care of with pride and love.

Although Baldwin, an amiable and generous man with big hands and thoughtful eyes, preferred to work before the sun's heat baked the countryside, he attacked weeds and bugs at any time of day until beads of sweat rolled from his face and arms.

Occasionally he'd pull out a handkerchief and wipe the moisture from his brow, the way Louis Armstrong used to do during his performances. Only here, surrounded by corn fields and pastures, there was no roar of applause — just the pleasant sounds of chirping crickets, singing birds, cackling hens and a crowing rooster.

But I wonder just how many cars might have come by in which the occupants exclaimed: "My, what a magnificent garden!"

Hired labor increased

HARRISBURG — A noticeable shift in the composition of Pennsylvania's farm labor force has taken place this year, according to the Pennsylvania Crop Reporting Service. This shift was reflected in a survey conducted during the week of April 11-17, 1976.

The Commonwealth's total farm labor force numbered 129,000, roughly equal to the labor force a year ago.

Family workers, however, declined by 16 per cent, from 106,000 in 1975 to 89,000 year. Hired farm workers 1976 now total 40,000, increase of 74 per cent o the 23,000 employed at time last year.

Farm labor wage rates all methods of pay conver to an average hourly rate $2.66 during the surv week. This compares to average rate of $2.42 hour last April, an incre of 24 cents an hour.

Bull Summaries for colored breeds listed

llowing are the top Ayrshire, Brown Swiss, Guernsey, Jersey, and Milking Shorthorn as compiled by the United States Department of Agriculture. The bull summary was ued by USDA in May of this year and ranks bulls in order of predicted difference in LANCASTER FARMING lists those bulls of each breed which have a predicted dif- ce in milk of 400 or more pounds. It should be noted that a number of bulls with less 400 pounds of milk in predicted difference actually come up significantly higher in cted dollar difference due to a higher fat test. This list of bulls is no guarantee that n from them is available. Check with the bull stud at which the bull is located. Bull are identified by code number which they were assigned by the National Association imal Breeders. A key to those code numbers follows:

Gov. Shapp calls for efficiency

HERSHEY - Gov. Milton J. Shapp last week told the Livestock Marketing Congress at their 1976 luncheon that "just as cheap transportation allowed the livestock industry to move west of Pennsylvania, the rising cost of transportation may bring industry east again."

He noted that "our growing population and rising standards of living overseas present us with a market in which there is room for Eastern producers."

To emphasize his point, Shapp said that 54 per cent of the nation's population resides within a 500-mile radium of central Pennsylvania.

"In this day and age of scarce and expensive energy," he said, "nearness to markets will become an ever-increasing factor."

Shapp explained that the state had a large beef herd industry prior to the 1840's when railroads began delivering cattle from the cheaper grazing lands of the mid-west.

Since that time, he explained dairy farming became the state's chief agricultural business, doing more than $500 million in business annually. He noted that Pennsylvania is the nation's fifth largest milk producing state, and a leading state in the number of slaughter houses.

But, he said, "Livestock and dairy farming has had difficult times in recent years as farm prices lagged woefully behind sharply rising production costs of feed, fertilizer, fuel, credit and land." The number of cattle on feed is still below that of three years ago.

The governor said that a more efficient marketing system is needed to decrease the wide variations in prices which have an economic impact on the farmers.

"Part of the problem," he said, "is that livestock moves through too many middlemen from farm to consumer."

Shapp urged the congress to find the way to meet the needs of the farmer and the consumer.

Angus show outlined

RHINEBECK, N.Y. - Young cattlemen from 20 states have entered 183 animals in the Eastern Regional Junior Angus Heifer Show set for July 8 and 9 at the Dutchess County Fairgrounds, here.

The entries have come from 132 different boys and girls who are junior or life members of the American Angus Association. A highlight of the event will be a tour of Rally Farms, Millbrook, New York and Sir William Farm, Hillsdale, New York on Thursday, July 8. The tours, through some of the most beautiful and historic country in New York, will give visitors an opportunity to inspect both of these registered Angus herds and to take part in a judging contest and cattle selection class at the farms.

Buses leave for the tour from the fairgrounds at 9:30 a.m. and lunch will be served courtesy of Rally Farms. Buses will return by 3:00 p.m. and arrangements will be made to look after the cattle at the showgrounds during the tour.

The cattle will be shown starting at 8:15 a.m. on Friday, July 9. Show judge will be Doug Parrett, University of Illinois, Urbana. Another special event for youngsters will be a dance on Thursday night sponsored by the New York Junior Angus Association and the Eastern Angus Association. Cattle will be checked in beginning at noon, July 6 and must be at the showgrounds by noon July 7. There will also be a dinner exhibitors and parents on Thursday at 6:30 p.m. Tickets will be available at the show. Master of ceremonies will be Jay Penick, manager of junior activities for the American Angus Association.

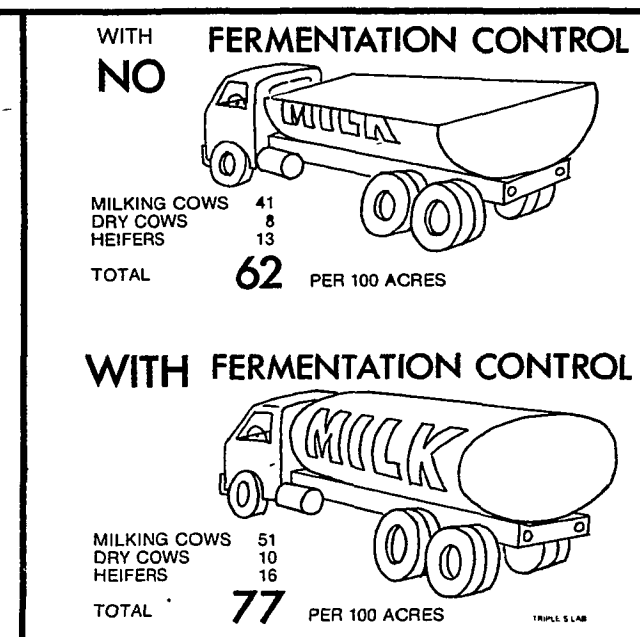
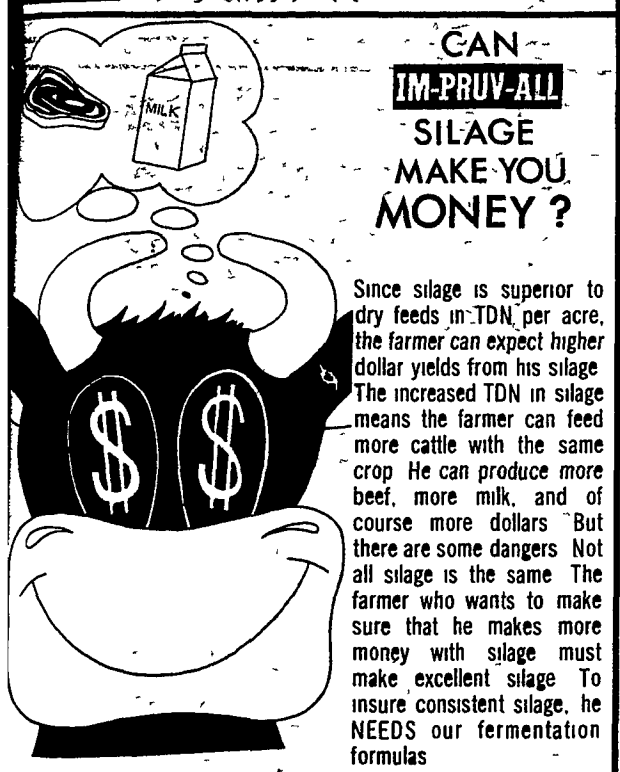
HEAD BEEF CATTLE PER 100 ACRES WITH NO FERMENTATION CONTROL
184
HEAD BEEF CATTLE PER 100 ACRES WITH IM-PRUV-ALL FERMENTATION PRODUCTS

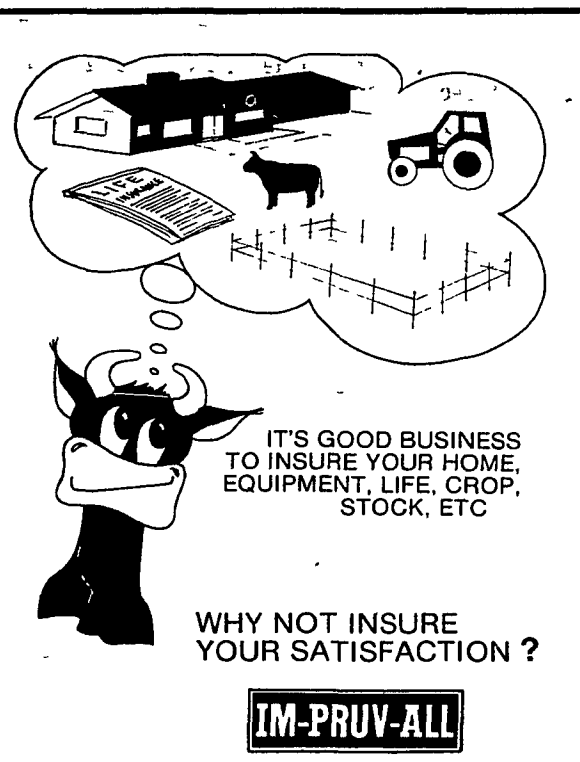
Since controlling time and heat in the ensiling process can result in more TDN, it is no surprise that more cattle can be fed from the same crop acreage. Studies have shown that the same 100 acres which can feed 153 beef cattle with regular silage can feed 184 beef cattle with silage to which our fermentation products have been added (based on in weight 450 lbs out weight 750 lbs)

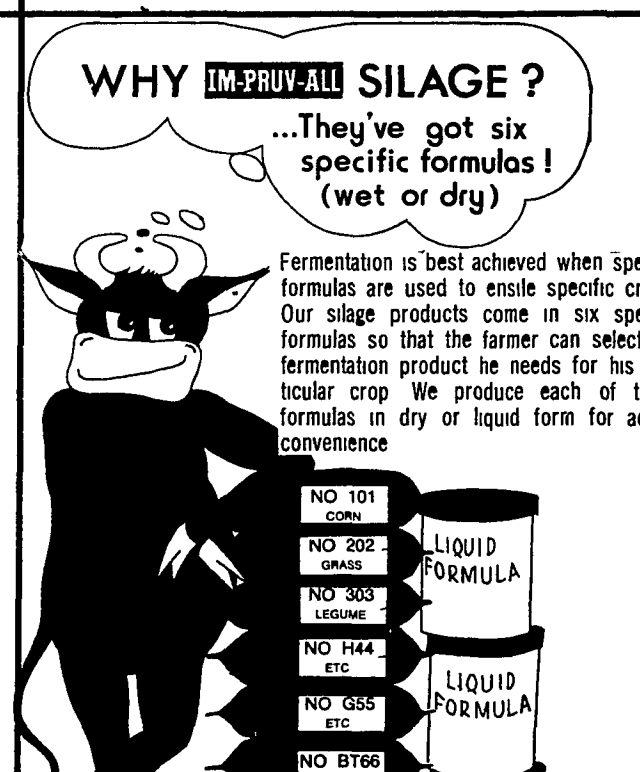


Studies have shown that more dairy cows can be fed from the same acreage when our fermentation products are added to the silage When regular silage from 100 acres feeds 62 dairy cows, fermentation controlled silage has been found to feed 77

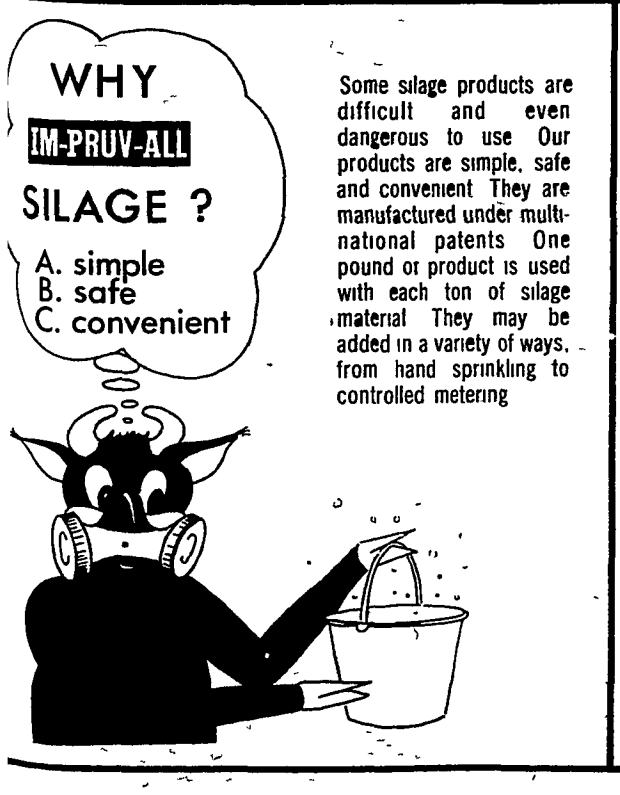


Since silage is superior to dry feeds in TDN per acre, the farmer can expect higher dollar yields from his silage The increased TDN in silage means the farmer can feed more cattle with the same crop He can produce more beef, more milk, and of course more dollars But there are some dangers Not all silage is the same The farmer who wants to make sure that he makes more money with silage must make excellent silage To insure consistent silage, he NEEDS our fermentation formulas

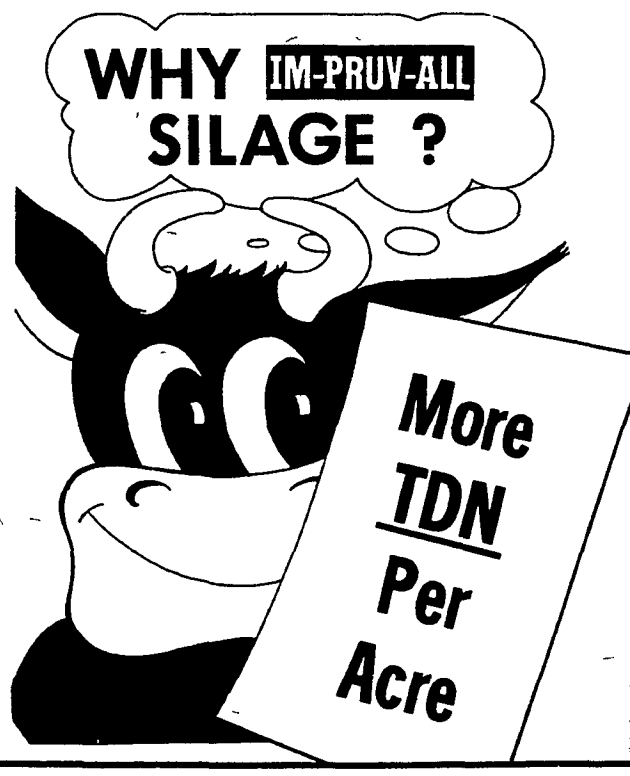




Fermentation is best achieved when specific formulas are used to ensile specific crops Our silage products come in six specific formulas so that the farmer can select the fermentation product he needs for his particular crop We produce each of these formulas in dry or liquid form for added convenience



Some silage products are difficult and even dangerous to use Our products are simple, safe and convenient They are manufactured under multi-national patents One pound or product is used with each ton of silage material They may be added in a variety of ways, from hand sprinkling to controlled metering



Because of the large amount of Im-Pruv-All 101 sold in this area, we can reduce the price to those of you who place your order and accept delivery before Aug. 15, 1976 on this large shipment.

Kilby named young cooperator

BALTIMORE, Md. - A 30-year-old dairyman from Cecil County was selected Thursday as the 1976 Outstanding Young Cooperator by the Maryland Cooperative Milk Producers, Inc.

William B. Kilby, Colora, Md. won the title in competition with nine other young dairymen, seven from Maryland and two from Pennsylvania, as the MCMP held its 15th annual Young Cooperator program at the Hunt Valley, Inn, Cockeysville, Md. As the winner he and Mrs. Kilby will represent the young dairymen of the MCMP at a number of functions including the National Young Cooperators meeting to be held later this year in San Francisco, Calif.

First runner-up in the contest was Roy W. Crum Jr., Woodbine, Md., Howard County, and second runner-up was Charles R. Pool, Westminster, Md., Carroll County.

Kilby and his wife Phyllis are partners in Kilby's Inc., a family corporation farm of 600 acres. The Kilby's have a herd of more than 450 registered and grade Holstein cattle including 290 in the milking line. The herd averages more than 17,000 pounds of milk per cow per year and in 1973 the herd had the highest average per cow production in the state for 75 cows or more. In 1974 the Kilby's earned the MCMP's Gold Certificate for outstanding quality milk production.

The Kilbys have three children. Both Mr. and Mrs. Kilby are active in a number of farm and civic organizations. Bill is president of the Cecil County Farm Bureau and a director of the Maryland Farm Bureau. He has served two years on the American Farm Bureau Young Farmer and Rancher Advisory Committee, presently serving as second vice president of the Committee. He is a past president of the Cecil County DHIA and a director of the Cecil County Fair Board. He serves as a local 4-H Club leader and is a member of the Rising Sun Better Business Association.

Mr. and Mrs. Crum, the first runners-up, will represent the MCMP at the American Institute of Cooperation meeting in late July at the Virginia Polytechnic Institute. The Crums, who have two children, farm 425 acres in a father-son partnership and have a herd of 150 registered and grade Holsteins. The herd average per cow is more than 15,000 pounds of milk for the 75 cows in the milking herd.

Crum, 30, is active in the Calvary Lutheran Church, a director and vice president of the Board of the Howard County DHIA, a director of the Maryland DHIA, Board member for Southern States Cooperative and Sire Power, president and past secretary of the Howard County Holstein Association and a member of the Howard County Young Farmers and Farm Bureau. He was awarded the 1976 Howard County Soil Conservation District's Cooperator of the Year and the 1976 Southern States Leadership Award.

The MCMP young cooperator contest was part of the 6th annual Pennmarva Dairymen's Federation Young Cooperator program. In addition to the MCMP two other Federation members named outstanding young dairymen winners. Mr. and Mrs. Kenneth Smith, Culpepper, Va., were nam to the top honor by Maryland and Virginia Producers Association, Mr. and Mrs. Paul Ying Martinsburg, Pa., by Inter-State Milk Produc Cooperative.

More than 300 yo dairymen and their gu participated in the two- program that included t of the East Coast Ice Cr Novelty plant at Laurel Maple Lawn Farm, Ful Md.

The MCMP is the lar Maryland based m marketing cooperative more than 1,000 member Ma., Pa., Va., and W. During the past year Cooperative marketed m than 620 million pounds milk valued at more than million.

Virginville Grange news

On June 16 the Virginville Grange met. They draped the charter for Lawrence F. Sunday.

Elanore Hill thanked all who helped at the reception and sandwich sale and for the 25 sho-fly pies that were taken to Berks Heim. The Grangers will help at the Folk Festival.

The youth meet Monday night to get Folk Festival display things ready. The county youths set up a display at the Reading Fair. They will meet July 12 at the Kutztown Grange Hall.

The softball team lost their first game to Bernville 10-2, but won games at Marion 11-2, and Womelsdorf, 16-2.

The Robert Kieffer family was honored for being Farm Family of the year.

James Adam thanked the Grange for the savings bond he received upon graduation. The Grange gave a donation to the families of Richard and Allen Weisner to help rebuild their barn, which was destroyed by fire.

The Grange will also help send the juniors to camp.

There will be no meeting July 7 because of the Folk Festival. The next meeting will be July 21 with a doggie roast and a ball game.

Zion Church News

Friday, everyone is invited to attend the Bible School closing program in the fellowship hall at 7 p.m. Serving this Sunday were: acolyte, Scott W. Miller; greeters, Mr. and Mrs. Richard Schappell and Mr. and Mrs. Robert Keller; nursery attendatnts, Suzanne Kline and Debbie Miller.

The flowers were in the altar vases in loving memory of Mr. and Mrs. Charles Schappell, and for the anniversary of Mr. Schappell's birthday by the family.

The bulletins were presented in honor of the birthday Debra Sheetz by her grandparents, Mr. and Mrs. Lawrence Sunday. The flowers in the chancel were in memory of Lawrence F. Sunday by his family.

ANCA Convention set

DENVER, Colo. - The American National Cattlemen's Association's 80th Annual Convention and Trade Show are scheduled for February 1 to 4, 1977, in Atlanta, Ga.

The Convention sessions and the Trade Show will be held at the new Georgia World Congress Center. Headquarters hotels will be the Hyatt Regency and the Hilton.

Richard A. McDougal, American Nation Cattlemen's Association's ANCA first vice president and convention committee chairman, said that advisory councils and committees will meet on February 1, and the Convention General Session program will be presented February 2-4.

The Trade Show will run from Tuesday, February 1, through Friday, Frebruary 4.

Complete Convention materials will be sent to ANCA members in September.

Information on the Trade Show and Convention may be obtained by contacting Tom Pellet, ANCA, P.O. Box 569, Denver, Colo. 80201 (303-861-1904).

Facts for dairymen

By Alan Bair

Assoc. County Agent
Lancaster, Pa.

Summer Comfort and Safety For Dairy Cows

During a recent visit to Penn State, on a hot afternoon, Dick Adams and I were trying to keep cool and celebrate Dairy Month by enjoying some famous University Creamery ice cream. Since Dick is a dairy specialist concerned with the cow end of the industry, our conversation soon fell from chocolate chip mint vs. maple walnut to trying to keep the cows going during hot weather.

Hot, humid weather can adversely affect milk production, milkfat test and reproductive performance of dairy cows. These effects may be at least partially overcome, if cows are made as comfortable as possible and feed intake is maintained close to normal.

Summer comfort requires shade and good air movement. Sometimes it may be best to keep cows inside bank barns or properly ventilated free-stall units during the day and turn them out only at night. Such a barn must have a lot of air movement from forced or natural ventilation.

Cows left outside should have access to natural or artificial shade in a spot where prevailing breezes can hit the cows. Most of the heat produced by the cow must be dissipated via skin and lung evaporation. Thus the importance of air movement.

Shading is necessary to prevent overheating of the cow and particularly the rumen. Artificial shades should be high enough for good air movement and be covered with light material to reflect as much sunlight as possible.

Feed, cool water and trace mineral salt should be provided in the comfort spot to encourage eating and drinking. Provide cows with the best quality forage possible during hot spells. This may help keep the production of body heat at a minimum and maintain metabolism as close to normal as possible. Cows often will eat twice as much forage at night during warm weather. Take this into account in your feeding practices.

Signs of heat stress in cows include lowered feed intake, reduced milkfat test, decreased production, moist skin and rapid breathing. In a bad situation they will pant much like a dog. Cows showing obvious heat stress should be moved to a cooler place and perhaps water-cooled with a hose or sprinkler.

When thunder showers threaten, remove cows from areas with trees and even open fields. Numberous cattle are killed each year by lightning. Extra cow comfort is needed in humid weather when temperatures reach into the mid 70'1 and 80's. Cows are more apt to show heat symptoms in early morning and early evening during the warmer months. Observe them at these times for more successful breeding.

BEHLEN Pork Factory

for controlled environment, greater pork profits

The first Behlen Pork Factory was erected in 1963 —The heavy gauge steel Farrowing House and Nursery pictured is the result of continuous Behlen Research in this field This 26' wide unit holds two rows of farrowing stalls Interior can be efficiently insulated and protected with a stainless steel wainscoating Behlen-integrated components include stainless steel flooring pens partitions ventilation system bulk feed tanks

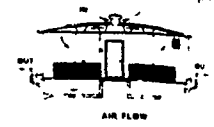

Diagram shows Behlen Ventilation System —pushes clean air through the building leaving no odors or gases —See us about this new profit-way to raise hogs

HONEY OF A HARVEST? HANDLE IT WITH A HUNTER SYSTEM... IT'S A HONEY!

HEAVY-DUTY GALVANIZED ELEVATOR LEGS — DISTRIBUTORS SPOUTING — CONVEYORS — GRAIN CLEANERS for a "Gentle Touch"

The Hunter line of grain handling equipment is built Bear-Strong for long dependable service All parts are computer controlled during manufacturing for accurate matched fit Elevator legs are available in 5 series sizes from 500 to 25,000 bu/hr, and, are all designed so that increased capacities within the limits of each series are attained by adding extra buckets at closer intervals — without changing the speed of head shafts So, handle your harvest from wagons to dryer-to storage-with HUNTER IT'S A HONEY!

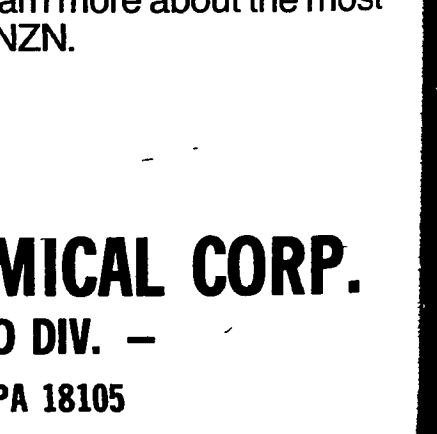
NZN™ gets into plants faster than any other zinc.



It's not often that a new product comes along that's significantly more effective than its competitors but is still very economically priced. But we have one. A new zinc material called NZN.

NZN is actually a combination of 5.5% zinc and 22% nitrogen. It's this special patented combination that makes NZN significantly outperform all other zinc materials on the market today. Because NZN gets into plants faster and in greater amounts than even the chelated zincs. Yet NZN costs less to buy than chelated materials.

Try NZN in foliar sprays, in irrigation water, in regular soil applications of liquid fertilizers. Frankly, you'll be amazed at how much more effective NZN is at getting through to plants and overcoming zinc deficiencies.

Stop in and see us and learn more about the most economical zinc you can buy. NZN.

Central Dairy Club meets

At a recent meeting of the Central Dairy 4-H Club held at the home of Jeff Stambaugh, Spring Grove, final arrangements were made for the "June is Dairy Month" display which was held at the North Hanover Mall last week.

Carl Anderson reported on the tour for July 6 to Lancaster County to see a carousel milking operation. Cindy Rutter announced that the Dairy Fun Day will be held on August 17 after the 4-H Dairy Roundup.

Roy Thompson presented his demonstration on "Grooming Your Heifer." Jeff Stambaugh, Carl Anderson, and John Mummert showed how to trim hooves.

The next meeting of the club will be July 6 at the home of Brian Lehman, York R1.

USDA suspends grain inspection agency

WASHINGTON, D.C. - Grain inspection officials in the U.S. Department of Agriculture (USDA) announced today that they have suspended the designation of the Greater Baton Rouge Port Commission as an official grain inspection agency. The suspension was made at the commission's request.

In announcing the action, a spokesman for USDA's Agricultural Marketing Service (AMS) said South Louisiana Grain Service, Inc., has been authorized to provide grain inspection services on an interim basis at facilities previously served by the port commision.

On Jan. 23, AMS grain inspection officials initiated proceedings to permanently revoke the official designation of the Greater Baton Rouge Port Commission as an official grain inspection agency. In a complaint filed that day, AMS charged the commission with failing to adequately supervise the work of its licensed grain inspectors.

AMS officials said that the complaint and proceedings against the port commission are still pending, and the suspension does not affect the earlier action. The temporary extension South Louisiana Gr Services' designation last 90 days or until the p commission is able resume inspection activi or a replacement agency designated.

Under the U.S. Gr Standards Act, AMS responsible for ministering the natio grain inspection syste AMS, however, has authority to provide orig inspection of U.S. grain is required to desig private firms and st agencies as official g inspection agencies specific geographic ar

Poultry production up

HARRISBURG - Poultry production in Pennsylvania continued above 1975 levels during the week ending June 12, 1976. According to the Pennsylvania Crop Reporting Service, placement of broiler chicks in the commonwealth were 1,637,000. This figure is 14 percent above the same week a year earlier, but eight percent below the previous week.

Average placements during the past ten weeks were 18 percent above a year ago.

In the 21 key poultry producing states, placements were 68,575,000, about the same as the previous week and 12 percent above the same period in 1975.

Average placements in the 21 key states were 12 percent above a year earlier.

Women Working

Recent statistics indicate that almost 37 million women held jobs in the United States in mid-1975. That comprises 40 per cent of the nation's workforce and includes 46 per cent of all women 16 years of age and older Figures show that the number of women under 20 in the labor force has increased about 2½ times as fast as the total population.
